

Nearly half of commuters admit to

texting while driving

More than teens ...

49% of commuters self-report texting while driving¹, **compared to 43% of teens.**²

Despite knowing the risks ...

98% said sending a text or email while driving isn't safe.¹

More than they used to ...

six-in-ten commuters said they never texted while driving three years ago.¹

For many, it has become a habit ...

More than 40%

of those who admitted to texting while driving called it a habit.¹

What can you do to stop it?

① Make a personal commitment.

Go to ItCanWait.com to take the pledge to never text and drive, and to download the AT&T DriveMode[®] no-texting-while-driving app.*

② Speak up.

Let others know that no text is worth a life.
