

National Average Mobile Broadband Speeds

Download a 45-minute (40 MB) album,* on average, **one minute faster** than next-fastest competitor.

That same album would take, on average, **more than two-and-a-half minutes longer** to download on AT&T's largest competitor's network, under the same circumstances.

Source: Global Wireless Solutions (GWS), based on national average mobile broadband speeds.
*For example purposes, the album is the same across all carriers under the same common conditions.
