

# AT&T Wi-Fi GROWTH

AT&T's mobile broadband customers are increasingly using the company's Wi-Fi network — the nation's largest\* — to connect online for checking e-mail, searching the Web and downloading music and video. AT&T continues to lead its competitors by including Wi-Fi for nearly 32 million customers (as of first quarter 2010) with AT&T High Speed Internet, AT&T U-verse® High Speed Internet, and qualifying smartphone and 3G LaptopConnect plans.

**1Q10**  
**53.1 Million**  
Connections

Smartphones and integrated devices account for **69%** of 1Q10 connections, up from **35%** of total connections in 1Q09. Laptops account for the remainder.
