SAFETY AND SECURITY

> **Spam Protection Filters.** Industry-leading filtering technology helps block and filter unwanted e-mail and IP addresses.

> **AddressGuard™.** Create disposable e-mail addresses to protect your e-mail account when using unknown or unsecured Web sites.

> **Anti-Virus Protection.** Help protect your entire PC with anti-virus software that continuously scans your computer for worms and viruses.

> **Pop-Up Ad-Blocking.** Control the quantity and types of pop-ups, or block them completely.

> **Firewall Software.** Build a wall between you and hackers with firewall software and hardware that help protect your personal information.

> **Anti-Spy.** Scan your computer for unwanted software, and review and remove any applications that you find and do not want. Remove software, like adware and spyware, to help prevent hackers from accessing your computer.

> **Award-Winning Parental Controls.** Customize settings for kids, teens, and young adults to help control Web browsing, e-mail, instant messaging and chat. Manage computer settings, or view children's online usage from any Web-connected computer, and receive online permission slips.
