AT&T has introduced two next-generation video services, as part of its entertainment portfolio, that give consumers compelling and innovative new choices.

AT&T U-verse℠ TV and AT&T Homezone℠ service — which differ in content delivery, services and technology — are complementary services that enable AT&T to offer an advanced video solution to customers across its footprint and to strengthen its integrated bundles.

		AT&T U-verse TV	AT&T Homezone Service
CONTENT	*Linear Television Service Provided By*	AT&T, through content deals with leading networks.	AT&T | DISH Network
	Broadband Service	AT&T Yahoo!® High Speed Internet *U-verse Enabled*	AT&T Yahoo!® High Speed Internet
	Video-on-Demand (VOD) Content	Customers receive VOD content via AT&T U-verse TV. The VOD library offers a range of titles, including movies, live events, music, and sports, through aggregator and studio relationships.	Customers download video content using AT&T Yahoo! High Speed Internet. VOD content is provided by Movielink and Akimbo. More VOD partners will be announced in the coming months.
SERVICES	*Features*	High-quality picture in standard- or High Definition, innovative and easy-to-use program guide, DVR with ability to record up to four programs at once, fast channel-changing, Web and Mobile Remote Access to schedule and manage DVR recordings, program search capabilities, picture-in-picture functionality, more than 320 channels and a VOD library.	Internet-based video and content with standard or High Definition satellite TV programming in a seamless in-home experience, DVR, movies on demand, photo- and music-sharing and storage for both and wireless or Web-based remote access to schedule and manage DVR recordings.
	Pricing	Current U-verse offers range in price from $44 to $129 a month, depending on the selected programming and Internet packages.	AT&T Homezone service is bundled with AT&T | DISH Network and AT&T Yahoo! High Speed Internet packages for an additional $9.99 a month and $5.98 a month for DVR service.
	Availability	AT&T has commercially launched services in markets across its 13-state local service territory. Specific information on availability and pricing is available at *uverse.att.com*.	Service is available within most of AT&T's DSL footprint across its traditional 13-state service territory.
TECHNOLOGY	*Primary Customer Premise Equipment*	• U-verse Receiver (Motorola, Scientific-Atlanta) • U-verse Gateway (2Wire)	• Homezone Receiver (2Wire) • 2Wire Home Networking Gateway
	Network	AT&T U-verse TV is delivered by AT&T's all-Internet Protocol (IP), two-way network, deployed through its Project Lightspeed fiber initiative.	AT&T Homezone TV content is delivered via satellite by AT&T | DISH Network. Movies on demand and other broadband content are delivered by AT&T's DSL network.
	Integration Enabled By	AT&T U-verse TV's enhanced features and integration capabilities are enabled by IP technology and fiber network.	The AT&T Homezone receiver and 2Wire Home Networking Gateway hardware/software perform integration work to seamlessly converge television and broadband services.
