

AT&T Advanced TV: Giving Consumers TV Choice

Looking for an alternative to cable? Tune into AT&T Advanced TV, which includes AT&T U-verseSM TV and AT&T | DIRECTV. With more HD channels, interactive features and unmatched value, AT&T Advanced TV offers you a TV choice that's better than cable.

AT&T U-verse TV and AT&T | DIRECTV are award-winning services, 100-percent digital, and use ENERGY STAR certified receivers. Advanced DVR capabilities and unique features put you in control and let you do more with your TV.

You can conveniently bundle either TV service with your AT&T broadband, home phone and wireless services. AT&T delivers complete and flexible quad-play bundle options that include wireless – something cable doesn't offer.

AT&T U-verse TV

AT&T U-verse TV is AT&T's lead TV offer and is an Internet Protocol-based TV service delivered over the company's fiber-rich network. IP technology means that your TV, PC, home phone and wireless devices can be integrated so that they all work together, giving you unmatched features, more control and more personalization.

U-verse TV features include Total Home DVR, remote access to the DVR, and an expanding list of interactive applications such as the ability to view your online photos on your TV screen or view customizable weather, sports, stock and traffic information with AT&T U-bar. U-verse TV offers an extensive HD channel lineup, and most packages include an HD-ready DVR with Total Home DVR capabilities.

AT&T | DIRECTV

AT&T | DIRECTV offers a terrific TV alternative to customers who can't yet order U-verse TV. AT&T | DIRECTV features more than 130 HD channels, exclusive sports programming packages, remote access to the DVR and several interactive features.

AT&T | DIRECTV customers also enjoy great value with ongoing monthly bundle discounts on qualifying packages
