### Manage Your Bills Conveniently Online

AT&T eBill, one of the most powerful eServicing tools on the AT&T Account Manager portal, enables you to receive, manage, and pay your AT&T bill online.\* With AT&T eBill, you can enjoy the simplicity of a single bill – for your local line, Internet service and wireless service – so you can eliminate the hassle of multiple bills and payments.

#### Enjoy Hands-on Control with Electronic Billing

With AT&T eBill, you can view, save, email and print a portion of your online bill – all while relying on industry-standard security practices to protect your data. You can even change your bill due date, change your billing address, schedule a future payment, or set up automatic monthly payments that help you eliminate late fees. Or if you prefer to initiate an electronic payment each month yourself, you can do so either by using your credit or debit card, or by executing an EFT transaction from your checking or savings account. And with AT&T eBill, you will enjoy greater convenience as you save both time and postage costs.

#### Manage Your Account More Effectively Online

AT&T eBill offers an interactive version of your online bill that provides you with more effective ways to manage your accounts. For example, with a few mouse clicks, you can sort your call details, and view charts and graphs that will provide insight into how you spend your telecommunications dollars. In addition, if there is a phone number on your bill that you

do not recognize, you can perform a reverse number lookup instantly.

#### Go Green and Enjoy Additional Benefits

With paperless billing, you can help protect our environment by eliminating paper waste. In addition, electronic billing will put your monthly bill in your hands sooner than paper billing – and will reduce the chance that your confidential information will reach the wrong hands. With paperless billing, you will have access to six months of interactive bills online, and any time you do need a hard copy of your bill, you can go online, print a portion of the bill, or download your bill to a CD. There are seven years of online billing history for your convenience.

#### Enjoy Monthly Reminders

Each month, you will receive an email reminder when your bill is ready to be viewed. You may also receive an email payment reminder. Optionally, you may also have your reminders sent via a secondary email, a text message, or a telephone call. You can also establish a notification threshold when your bill reaches a certain amount.

#### Access Your Billing History Online

Once you are registered to use the AT&T Account Manager tool, you can enjoy AT&T eBill 24/7 from any Internet connection. With AT&T eBill, you can view up to seven years of your billing history online at any time; access, view, and download your bills in pdf format; or download your bills onto a CD for easy storage.
