PACIFIC BELL - "EDI/CORBA Local Pre-Ordering Customer Service Inquiry (CSI) and Directory Listing (DL)/Directory Assistance (DA) Information Initial Notification and Local Pre-Ordering Workshop Invitation"

Date: April 23, 1999

Number: **CLECCS99-052**

Contact: Pacific Bell Account Manager

This is to provide Initial Notification of the EDI/CORBA Local Pre-Ordering CSI release scheduled for October 17, 1999. The release is based on CSI EDI 10 Issue 1269, 1712, 1737 and 1368 guidelines from the Ordering and Billing Forum (OBF) and the EDI Service Order Subcommittee (SOSC) Pre-Order Matrix – LSOG #4.

The initial specifications for this release are documented in the Pacific Bell Local Service Pre-Ordering Requirements (LSPOR) Revision Notes, CSI/DL/DA Field Descriptions and CSI/DL/DA Inquiry Scenarios. This information will be incorporated into the LSPOR document, which will be made available with the Final Notification of the release specifications on June 25, 1999. Until Final Notification, the specifications are on our CLEC website at: <http://info.sbc.com/lwc>. Once there, click on:

-  Customer Handbook
-  The applicable state
-  User Guide.

PACIFIC BELL - "EDI/CORBA Local Pre-Ordering Customer Service Inquiry (CSI) and Directory Listing (DL)/Directory Assistance (DA) Information Initial Notification and Local Pre-Ordering Workshop Invitation"

On the left of the screen is the table of contents with various options. Click on "Initial Requirements for the 10/17/99 Release" under the LSPOR option for the CSI specifications.

Pacific Bell previously announced that this release would be available September 26, 1999 in Accessible Letter CLECCS99-042. This date has been changed to October 17, 1999. The original date was contingent upon receiving the draft CORBA structures by May 1999. However, the T1M1 Ordering and Billing Service Subcommittee will not meet to finalize the CORBA structures and produce a draft standard until the week of May 10, 1999. This new date will allow time to review the T1M1 Subcommittee draft standard. The resulting CORBA structure may cause a change to include data groupings in Pacific Bell's Final Notification specifications. CLECs should review the specifications document and provide comments back to their Pacific Bell Account Manager by June 4, 1999. Pacific Bell will review the comments and provide appropriate responses with the Final Notification of the specifications on June 25, 1999. Testing will be available from September 27, 1999 through October 10, 1999. General Availability of this release is planned for 12:01 a.m. CDT on October 17, 1999.

In addition, this letter serves as your invitation to an EDI/CORBA Local Pre-Ordering Workshop to be hosted on May 25, 1999, in San Francisco. This workshop will provide a basic understanding of the EDI/CORBA Local Pre-Ordering CSI process and the CSI business specifications that will be added to the LSPOR. The scope of this workshop will be from an SBC corporate perspective; therefore, specifications will be discussed relative to Southwestern Bell and Pacific Bell/Nevada Bell requirements. In order for the workshop to be meaningful it is requested that participants have a basic understanding of the EDI or CORBA CSI structures. The agenda for the workshop is also attached.

The workshop will be held on Tuesday, May 25, 1999, from 8:30 a.m. to 4:00 p.m. PDT in the Embarcadero Hall at 370 3rd Street, San Francisco, California. To confirm your participation in this workshop, please contact Claire Ong on 925-824-7401. Please make your reservation before May 21, 1999.

Questions may be referred to your Pacific Bell Account Manager.
