

AT&T Internet Quick Start Guide

Welcome to AT&T Internet

Go Wi-Fi®

- 1 Go to your computer's Wireless Network Settings and refresh the network list.
- 2 Select your Wi-Fi Network Name from the list.
- 3 Enter the Wi-Fi Password in the Password field.

Repeat these steps to configure all of your Wi-Fi enabled computers, notebooks, tablets, and smartphones. If your computer doesn't have built-in wireless capability, install and configure a wireless adapter according to the manufacturer's instructions.

Find your Wi-Fi Network Name and Password

The Wi-Fi Network Name (SSID) and Wi-Fi Password (Wireless Network Key) needed to connect your devices to your home network are located on the side of the gateway. The Wi-Fi Network Name begins with "ATT" followed by several characters.

Connect via Ethernet

Connect Ethernet cable to an available yellow Ethernet port on the Wi-Fi Gateway. Then connect the other end of the cable to the Ethernet port of your computer, notebook, or printer.

Need to set up Internet-connectable devices, such as a surveillance camera, game console, or other remote-access tool? If yes, then go to **att.com/portforwarding** for easy set-up instructions.

Email

For email support, visit **att.com/esupport/email.jsp**

To access email from your desktop or mobile device:

- 1 Go to **att.net**
- 2 In the upper-right side of the screen, select the **MAIL** icon.
- 3 Enter your full **Email Address** (including the portion after the @ symbol) and **Password**.

Note: Your email address and password are usually the same as your primary member ID and password.
