

International Travel Tips

With an AT&T Passport package, you can travel abroad and continue to call, text, email, and post.

What to do before you leave:

- **Pick the right AT&T PassportSM or AT&T GlobalSM package** by checking your average monthly data usage on past AT&T billing statements. Estimate your international data usage based on the number of days you'll be traveling.
- **Disable apps** running in the background if you don't need them while abroad.
- **Download the AT&T Passport app** to access participating Wi-Fi hotspots in select countries abroad. Available for iOS[®] and Android[™] devices. Visit att.com/intlwifi for details.

For example: If you normally use 900 MB over 30 days and you'll be away for 10 days, then choose a 300 MB package. (See chart below.)

What to do upon arrival:

If you buy a package and track your data usage while you're away, it's easy to keep your bill predictable.

- **Track your data usage** with your device's usage tracker, if available.
- **Check your email manually** by disabling your device's auto-check function. Use Wi-Fi when available as an alternative to the cellular network.
- **Streaming radio or video is not recommended** as it can use a lot of data.
- **Use the "Data Roaming" toggle** on your device to turn cellular data roaming "off" but continue to allow talk and text.
