Important information

Please read the *Important information* leaflet before you use your mobile phone.

! This User guide may reference services or applications provided by third parties. Use of such programming or services may require separate registration with the third party provider and may be subject to additional terms of use. For applications accessed on or through a third party Web site, please review such Web sites' terms of use and applicable privacy policy in advance. Sony does not warrant or guarantee the availability or performance of any third party Web sites or offered services. Some of the services and features described in this User guide are not supported in all countries/regions or by all networks and/or service providers in all areas. Without limitation, this applies to the GSM International Emergency Number, 112. Please contact AT&T to determine availability of any specific service or feature and whether additional access or usage fees apply.

Use of certain features and applications described in this guide may require access to the Internet. You may incur data connection charges when you connect to the Internet from your phone. Contact your wireless service provider for more information.

Android™ – what and why?

Your Xperia smartphone from Sony runs on the Android platform. Android phones can perform many of the same functions as a computer and you can customise them to your own needs. For example, you can add and delete applications, or enhance existing applications to improve functionality. On Google Play™ you can download a range of applications and games from a constantly growing collection. You can also integrate applications on your Android™ phone with other applications and with online services that you use. For example, you can back up your phone contacts, access your different email accounts and calendars from one place, keep track of your appointments, and engage in social networking.

Your Android™ phone is pre-loaded with Google™ services. To get the most out of the provided Google™ services, you should have a Google™ account and sign in to it when you first start your phone. You also need to have Internet access to use many of the features in Android™.

Getting started

Assembly

To remove the top cover
- Using your thumbs, slide off the cover on the top of the phone.

To insert the memory card and the micro SIM card
1   Turn off your phone and remove the top cover from the back of the phone, then insert the memory card into its slot on the left side, with the gold-coloured contacts facing down.
2   On the top right side, pull out the micro SIM card holder.
3   Turn over the micro SIM card holder.
4   Place the micro SIM card into the holder.
5   Turn over the micro SIM card holder.
6   Insert the micro SIM card holder back into the phone.

!   The memory card may not be included at purchase in all markets.

To remove the memory card
1 Turn off the phone, or unmount the memory card from **Settings** > **Storage** > **Unmount SD card**.
2 Remove the top cover, then press against the edge of the memory card and release it.
3 Draw the card outwards to remove it.

To remove the micro SIM card
1 Turn off your phone and remove the top cover, then pull out the micro SIM card holder.
2 Turn over the micro SIM card holder.
3 Remove the micro SIM card from the holder.
4 Turn over the micro SIM card holder.
5 Insert the micro SIM card holder back into the phone.

To attach the top cover
1 Place the top cover over the top back of the phone, then fit it into the slots.
2 Slide the top cover downwards. You hear a sound when the cover locks into place.

Turning the phone on and off

To turn on the phone

! Make sure that the battery is charged for at least 30 minutes before you turn on the phone for the first time.
1 Press and hold down the power key ⓘ on the right side of the phone until the phone vibrates.
2 If your screen goes dark, briefly press the power key ⓘ to activate the screen.
3 To unlock the screen, drag 🔒 to the right across the screen.
4 Enter your SIM card PIN when requested, and select **OK**.
5 Wait a while for the phone to start.

-ʘ- Your SIM card PIN is initially supplied by AT&T, but you can change it later from the **Settings** menu. To correct a mistake made while entering your SIM card PIN, tap ⌫.

To turn off the phone

1 Press and hold down the power key ⓘ until the options menu opens.
2 In the options menu, tap **Power off**.
3 Tap **OK**.

! It may take a while for the phone to shut down.

Screen lock

When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touch screen when you are not using it.

To activate the screen

- Briefly press the power key ⊙.

To unlock the screen

- Drag 🔒 to the right across the screen.

To lock the screen manually

- When the screen is active, briefly press the power key ⊙.

Accounts and services

Sign in to your online service accounts from your phone and benefit from a range of services. Combine services and get even more out of them. For example, collect contacts from your Google™ and Facebook™ accounts and integrate them into your phonebook, so you have everything in one place.

You can sign up to online services from your phone as well as from a computer. When you sign up for the first time, an account is created with your user name, password, settings and personal information. The next time you sign in, you get a personalised view.

Google™ account

Having a Google™ account is key to using a range of applications and services with your Android phone. You need a Google™ account, for example, to use the Gmail™ application in your phone, to chat with friends using Google Talk™, to synchronise your phone calendar with your Google Calendar™, and to download applications and games, music, movies and books from Google Play™.

Microsoft® Exchange ActiveSync® account

Synchronise your phone with your corporate Microsoft® Exchange ActiveSync® account. This way, you keep your work email, contacts and calendar events with you at all times.

Facebook™ account

Facebook™ is a social networking service that connects you with friends, family and colleagues around the world. Set up Facebook to work on your phone so that you can stay in touch from anywhere.

☰	Menu	• Open a list of options available in the current screen or application
⌂	Home	• Go to the Home screen from any application or screen • Press and hold to open a window showing your most recently used applications
↰	Back	• Go back to the previous screen • Close the on-screen keypad, a dialog box, an options menu, or the Notification panel
⌕	Search	• Shortcut to Google™ Search

Battery

Your phone has an embedded battery.

Charging the battery

Charge your phone for at least 30 minutes before you turn on the phone for the first time. When you connect the phone charger cable to a power source, such as a USB port or a phone charger, it may take a few minutes before the battery icon ▨ appears on the screen. You can still use your phone while it is charging. Charging the phone over a long period of time, for example, overnight, does not damage the battery or the phone.

! The battery will start to discharge a little after it is fully charged and then charges again after a certain time when the phone charger is connected. This is to extend battery life and may result in the charge status showing a level below 100 percent.

To charge the phone
1   Plug the phone charger into a power outlet.
2   Plug one end of the USB cable into the charger (or into the USB port of a computer).
3   Plug the other end of the cable into the micro USB port on your phone, with the USB symbol facing up. The battery status LED lights up when charging starts. If the battery is completely discharged, it may take a few minutes before the LED lights up after you connect the phone charger cable to a power source.

4   When the battery status LED is green, the phone is fully charged. Disconnect the USB cable from your phone by pulling it straight outwards. Make sure not to bend the connector when removing the cable from the phone.

Battery LED status

Green	The battery is fully charged
Flashing red	The battery level is low
Orange	The battery is charging. The battery level is between low and full

To check the battery level

1   From your Home screen, tap ⊞ .
2   Find and tap **Settings** > **About phone** > **Status** > **Battery level**.

Improving battery performance

The following tips can help you improve battery performance:

* Charge your phone often. This will not affect the lifetime of the battery.
* Downloading data from the Internet is power consuming. When you're not using the Internet, you can save power by disabling all data connections over mobile networks. This setting does not prevent your phone from transmitting data over other wireless networks.
* Turn off GPS, Bluetooth™ and Wi-Fi® when you don't need these features. You can turn them on and off more easily by adding the Quick settings widget to your Home screen.
* Use the **Power Saver** feature to reduce battery consumption. You can select the power saving mode that best suits the way you use your phone. You can also customise the settings of each power saving mode.
* Set your synchronisation applications (used to synchronise your email, calendar and contacts) to synchronise manually. You can also synchronise automatically, but increase the synchronisation intervals.
* Check the battery usage menu in the phone to see which applications use the most power. Your battery consumes more power when you use video and music streaming applications, such as YouTube™. Some applications downloaded from Google Play™ may also consume more power.
* Close and exit applications that you are not using.
* Lower the screen display brightness level.
* Turn off your phone or activate the **Airplane mode** setting if you are in an area with no network coverage. Otherwise, your phone repeatedly scans for available networks, and this consumes power.
* Use a Sony original handsfree device to listen to music. Handsfree devices demand less battery power than the phone's loudspeakers.

14

- Keep your phone in standby whenever possible. Standby time refers to the time during which the phone is connected to the network and is not being used.
- Disable any live wallpaper.
- Go to *www.att.com/tutorials* to get the latest battery performance tips for your phone model.

To access the battery usage menu
1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **Battery** to see which installed applications consume the most battery power.

To add the Data traffic widget to your Home screen
1 From your Home screen, press ☰.
2 Tap ⊕.
3 Tap **Tools** > **Data traffic**.

To add the Quick settings widget to your Home screen
1 From your Home screen, press ☰.
2 Tap ⊕ > **Tools**.
3 Select the **Quick settings** widget.

Reducing battery consumption with Power Saver

Use pre-set power saving modes to manage power consuming applications and reduce battery consumption. With Power Saver, you can also customise the settings within each power saving mode to the way you use your phone.

To activate a power saving mode
1 From your Home screen, tap ▦.
2 Find and tap **Power Saver**.
3 Tap the icon next to the power saving mode that you want to activate.

To deactivate a power saving mode
1 From your Home screen, tap ▦.
2 Find and tap **Power Saver**.
3 Tap the illuminated icon next to the active power saving mode to turn it off.

To change the settings for a power saving mode
1 From your Home screen, tap ▦.
2 Find and tap **Power Saver**.
3 To open the settings menu, tap the name of a power saving mode.
4 Adjust the settings as desired to save power.
5 Tap ↰.

To display power saver notifications
1 From your Home screen, tap ▦.
2 Find and tap **Power Saver**.
3 Tap ▮.
4 Mark the **Status bar** checkbox.

Using the touchscreen

A protective plastic sheet is attached to the screen of your phone when you buy it. You should peel off this sheet before using the touchscreen. Otherwise, the touchscreen might not function properly.

When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on

the touchscreen when you are not using it. You can also set personal locks to protect your subscription and make sure only you can access your phone content.

❗ Your phone screen is made from glass. Do not touch the screen if the glass is cracked or shattered. Avoid trying to repair a damaged screen yourself. Glass screens are sensitive to drops and mechanical shocks. Cases of negligent care are not covered by the Sony warranty service.

To open or highlight an item

- Tap the item.

### To mark or unmark options

- Tap the relevant checkbox or list option.

☑	Marked checkbox
☑	Unmarked checkbox
⦿	Marked list option
⬤	Unmarked list option
Zooming

The zoom options available depend on the application you are using.

To zoom

- When available, tap ▬ or ▬ to zoom in or out.

❗ You may have to drag the screen (in any direction) to make the zoom icons appear.

To zoom with two fingers

- Place two fingers on the screen at once and pinch them together (to zoom out) or spread them apart (to zoom in).

💡 Use the zoom function when viewing photos and maps, or when browsing the web.

Scrolling

Scroll by moving your finger up or down on the screen. On some web pages you can also scroll to the sides.
❗ Dragging or flicking will not activate anything on the screen.

To scroll

- Drag or flick your finger in the direction you want to scroll on the screen.

💡 To scroll more quickly, flick your finger in the direction you want to go on the screen.

To flick

- To scroll more quickly, flick your finger in the direction you want to go on the screen. You can wait for the scrolling movement to stop by itself, or you can stop it immediately by tapping the screen.

Sensors

Your phone has sensors that detect both light and proximity. The light sensor detects the ambient light level and adjusts the brightness of the screen accordingly. The proximity sensor turns the touch screen off when your face touches the screen. This prevents you from unintentionally activating phone functions when you are engaged in a call.

Using the lockscreen

On the lockscreen, you can still view notifications, for example, notifications of missed calls and messages that arrived since the phone was last locked. You can also control the playback of audio tracks without unlocking the screen.

To view missed calls from the lockscreen

1 To activate the screen, briefly press the power key ⓞ.
2 Drag 🔄 to the right across the screen.

To view new text messages from the lockscreen

1 To activate the screen, briefly press the power key ⓞ.
2 Drag 📧 to the right across the screen.

To play an audio track from the lockscreen

1 To activate the screen, briefly press the power key ⓞ.
2 To display music player controls, place a finger on the time and date area and flick to the left.
3 Tap ▶.

To pause an audio track from the lockscreen

1 To activate the screen, briefly press the power key ⓞ.
2 When the music player controls appear, tap ⏸.

To change the currently playing audio track from the lockscreen

1 To activate the screen, briefly press the power key ⓞ.
2 When the music player controls appear, tap ⏪ or ⏩.

Home screen

Your phone Home screen is the equivalent of the desktop on a computer. It's your gateway to the main features in your phone. You can customise your Home screen with widgets, shortcuts, folders, themes, wallpaper and other items.

The Home screen extends beyond the regular screen display width, so you need to flick left or right to view content in one of the screen's four extensions. ○○●○○ shows which part of the Home screen you are in.

The items in the bar at the bottom of the screen are always available for quick access.

18

To go to the Home screen

- Press ⌂.

To browse the Home screen

- Flick right or left.

Widgets

Widgets are small applications that you can use directly on your Home screen. For example, the Music player widget allows you to start playing music directly.

Some widgets are resizable, so you can expand them to view more content or shrink them to save space on your Home screen.

To add a widget to the Home screen

1 From your Home screen, press ☰.
2 Tap ⊕.
3 Find and tap the widget you want to add.

To resize a widget

1 Touch and hold a widget until it magnifies and the phone vibrates, then release the widget. If the widget can be resized, a highlighted frame and resizing dots appear.
2 Drag the dots inward or outward to shrink or expand the widget.
3 To confirm the new size of the widget, tap anywhere on the Home screen.

To get an overview of all widgets on your Home screen

- Pinch on any area of your Home screen. All widgets from different parts of your Home screen are now displayed in one view.

 When all Home screen widgets are combined in one view, tap on any widget to go to the part of the Home screen containing that widget.

Rearranging your Home screen

Customise the appearance of your Home screen and change the features that you can access from it. Change the screen background, move items around, create folders, and add shortcuts and widgets.

To view customisation options from the Home screen

- From your Home screen, press ☰, then tap ⊕.
- Touch and hold on any part of the Home screen, then tap ⊕.

To add a shortcut to your Home screen

1 From your Home screen, press ☰.
2 Tap ⊕.
3 Tap **Shortcuts**, then find and select a shortcut.

 Add an application shortcut directly from the Application screen by touching and holding the application.

To move an item on the Home screen

1 Press ⌂ to open your Home screen.
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the new location.

To delete an item from the Home screen

- Touch and hold an item until it magnifies and the phone vibrates, then drag the item to 🗑.

To create a folder on the Home screen

1 Press ⌂ to open your Home screen.
2 Touch and hold an application icon or a shortcut until it magnifies and the phone vibrates, then drag and drop it on top of another application icon or shortcut.
3 Enter a name for the folder and tap **Done**.

To add items to a folder

• Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the folder.

To rename a folder

1 Tap the folder to open it.
2 Touch the folder's title bar to show the **Folder name** field.
3 Enter the new folder name and tap **Done**.

Changing the background of your Home screen

Adapt the Home screen to your own style using wallpapers and different themes.

To change your Home screen wallpaper

1 From your Home screen, press ☰.
2 Tap ⊘, then tap **Wallpaper** and select an option.

To set a theme for your Home screen

1 From your Home screen, press ☰.
2 Tap ⊘, then tap **Theme** and select a theme.

! When you change a theme, the background also changes in some applications.

Accessing and using applications

Open applications from shortcuts on your Home screen or from the Application screen.

Application screen

The Application screen, which you open from your Home screen, contains the applications that come installed with your phone as well as the applications you download.

The Application screen extends beyond the regular screen width, so you need to flick left and right to view all content.

To open the Application screen
• From your Home screen, tap ⊞.

To browse the Application screen

• From the Application screen, flick right or left.

To create a shortcut to an application on the Home screen

1 From your Home screen, tap ⊞ .
2 Touch and hold an application until it appears on your Home screen, then drag it to the desired location.

Opening and closing applications

To open an application

• From your Home screen or the Application screen, tap the application.

To close an application

• Press ↰.

💡 Some applications are paused when you press ⌂ to exit, while other applications may continue to run in the background. In the first case, the next time you open the application, you can continue where you left off. Remember that some applications may cause data connection charges when they are running in the background, for example, social networking services.

Recently used applications window

You can view and access recently used applications from this window.

To open the recently used applications window

• Press and hold down ⌂.

Application menu

You can open a menu at any time when you are using an application by pressing the ☰ key on your phone. The menu will look different depending on which application you are using.

To open a menu in an application

• While using the application, press ☰.

❗ A menu is not available in all applications.

Rearranging your Application screen

Move the applications around on the Application screen according to your preferences.

To arrange applications on the Application screen

1 From your Home screen, tap ⊞ to go to the Application screen.
2 Tap ⤵ and select an option.

To move an application on the Application screen

1 Open the Application screen, then tap ⊞ .
2 Touch and hold an item until it magnifies and the phone vibrates, then drag the item to the new location.
3 Tap ⤵ to exit edit mode.

❗ You can only move your applications when ⤵ is selected.

1 From your Home screen, tap ▦.
2 Tap ▦. All uninstallable applications are marked with a ❌ icon.
3 Tap the application you want to uninstall, then tap **OK**.

Status and notifications

The status bar at the top of your screen shows what's going on in your phone. To the left you get notifications when there is something new or ongoing. For example, new message and calendar notifications appear here. The right side shows the signal strength, battery status, and other information.

A notification light also gives you battery status information and some notifications. For example, a flashing blue light means there is a new message or a missed call. The notification light may not work when the battery level is low.

Checking notifications and ongoing activities

You can drag down the status bar to open the Notification panel and get more information. For example, you can use the panel to open a new message or view a calendar event. You can also open some applications that run in the background, such as the music player.

To open the Notification panel

• Drag the status bar downwards.

22
To close the Notification panel
- Drag the tab at the bottom of the Notification panel upwards.

To open a running application from the Notification panel

- Tap the icon for the running application to open it.

To open the phone settings menu from the Notification panel

- Tap ✕.

To dismiss a notification from the Notification panel

- Place your finger on a notification and flick left or right.

To clear all notifications from the Notification panel

- Tap ✕.

Phone settings menu

View and change your phone settings from the Settings menu.

To access the phone settings

1 From your Home screen, tap ▦.
2 Tap **Settings**.

💡 You can also drag the status bar downwards on the Home screen and tap ✕ to access the phone settings.

Typing text

You can use the Android keyboard provided by Google™ or the Xperia™ keyboard provided by Sony™ to enter text. The Xperia™ keyboard is similar to the Android keyboard, but also has other features such as Gesture input.

To display the on-screen keyboard to enter text

- Tap a text entry field.

To hide the on-screen keyboard

- When the on-screen keyboard is open, press ↰.

To use the on-screen keyboard in landscape orientation

- When you enter text, turn the phone sideways.

For the keyboard to support this feature, landscape mode must be supported by the application you are using, and your screen orientation settings must be set to automatic.

To enter text using the on-screen keyboard

1 To enter a character visible on the keyboard, tap the character.
2 To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é", touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é".

To delete characters

- Tap to place the cursor after the character you want to delete, then tap ⌫.

To select text

1 Enter some text, then double-tap the text. The word you tap gets highlighted by tabs on both sides.
2 Drag the tabs left or right to select more text.

To edit text in landscape orientation

1 Enter some text, then double-tap the entered text.
2 Select the text you want to work with, then tap **Edit...** and select an option.

To edit text in portrait orientation

1 Enter some text, then double-tap the entered text to make the application bar appear.
2 Select the text you want to edit, then use the application bar to make your desired changes.

Application bar
1	Close the application bar
2	Select all text
3	Cut text
4	Copy text
5	Paste text

📋 only appears when you have text stored on the clipboard.

To switch keyboards

1 When you enter text, drag the status bar downwards to open the Notification panel.
2 Tap **Select input method**, and select an option.

Android keyboard

You can use the Android keyboard provided by Google™ to enter text.

Using the Android keyboard

1 Change the character case and turn on the caps lock. For some languages, this key is used to access extra characters in the language.

2 Display numbers and symbols.

3 Use voice input. You need an Internet connection to use this function.

4 Enter a space.

5 Tap and hold to display frequently used symbols.

6 Multi-function key. For example, this key functions as a smiley key when you enter message text.

7 Delete a character before the cursor.

! All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To shift between upper-case and lower-case letters

- Before you enter a letter, tap 🔼 to switch to upper-case 🔼, or vice versa.

To turn on the caps lock

- Before you type a word, touch and hold 🔼 or 🔼 until 🔼 appears.

Entering text using voice input

When you enter text, you can use the voice input function instead of typing the words. Just speak the words that you want to enter. Voice input is an experimental technology from Google™, and is available for a number of languages and regions.

! You must have a data connection on a mobile or Wi-Fi® network to use this service. Additional charges may apply.

To enter text using voice input

1 When you enter text, make sure that the voice input function is enabled and that you have a working data connection.
2 Tap 🔲. When 🔴 appears, speak to enter text, or select a dictation language. When you're finished, tap **Done**.
3 The suggested text appears. Tap the suggested text to make the search result list appear, then select the words you want.

Android keyboard settings

You can select settings for the Android keyboard, such as writing language and automatic correction.

25

1 When you enter text using the on-screen keyboard, tap and hold 🎤 until ▦ appears.
2 Tap **Android keyboard settings**.

Mark the **Show settings key** checkbox in **Android keyboard settings** to make ▦ permanently available on the on-screen keyboard.

To change the Android keyboard writing language

1 When you enter text using the on-screen keyboard, tap and hold 🎤 until ▦ appears.
2 Tap **Input languages**, then unmark the **Use system language** checkbox.
3 Mark the relevant checkboxes. then press ↩ to confirm.

To switch between languages, tap and hold the space bar and select an input method.

Xperia™ keyboard

You can also select the Xperia™ keyboard as your text input method. The Xperia™ keyboard gives you two different options, the on-screen keyboard and the Phonepad. The Phonepad is similar to a 12-key telephone keypad. The on-screen keyboard is similar to the Android keyboard, but also has other features such as Gesture input.

On-screen keyboard

Tap the keys of the on-screen QWERTY keyboard to enter text conveniently. Some applications open the on-screen keyboard automatically. You can also open this keyboard by touching a text field.

Using the on-screen keyboard
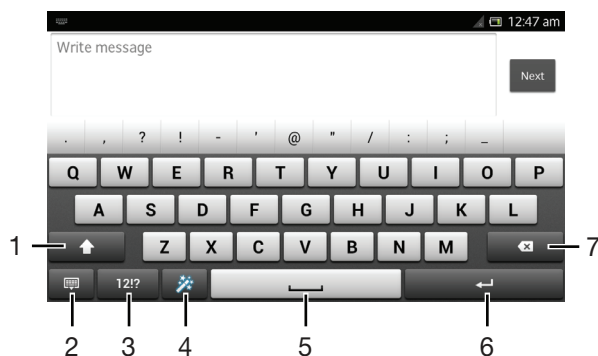

1 Change the character case and turn on the caps lock. For some languages, this key is used to access extra characters in the language.

2 Close the on-screen keyboard view. Note that this icon does not appear in portrait mode.

3 Display numbers and symbols.

4 Personalise your keyboard. This key disappears after the keyboard is personalised.

5 Enter a space.

6 Enter a carriage return or confirm text input.

7 Delete a character before the cursor.

⚠ All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To enter text using the on-screen keyboard

1 To enter a character visible on the keyboard, tap the character.
2 To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é", touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é".

To personalise the on-screen keyboard

1 Open the on-screen keyboard, then tap .
2 Follow the instructions to personalise your on-screen keyboard, for example, mark the **Smiley key** checkbox.

If you don't mark the **Smiley key** checkbox when you personalise the on-screen keyboard, the smiley icon will not appear.

To enter common punctuation marks

1 When you finish entering a word, tap the space bar.
2 Select a punctuation mark from the candidate bar. The selected mark is inserted before the space.

To quickly enter a full stop, tap the space bar twice when you finish entering a word.

To enter a carriage return

- When you enter text, tap to enter a carriage return.

## Using the Gesture input function to write words

You can input text by sliding your finger from letter to letter on the on-screen keyboard. You can lift your finger between words so that the phone recognises them.

Gesture input is only available when you use the on-screen keyboard.

To enter text using the Gesture input function

1 When you enter text using the on-screen keyboard, slide your finger from letter to letter to trace the word you want to write. Lift up your finger when you've finished entering a word.
2 The phone suggests a word based on the letters you have traced. If necessary, select the correct word in the candidate bar. To view more options, scroll right or left in the word candidate bar. If you cannot find the desired word, tap once to delete the entire word. Then try again to trace the word using the Gesture input function, or tap each letter to enter the word.
3 If the **Space between gestures** setting is activated, trace the next word that you want to enter. If not, tap the space bar and then trace the next word you want to enter.

To enter joined compound words when the **Space between gestures** setting is activated, you may need to slide to enter the first part of the word, then tap each letter to enter the rest of the word.

To change the Gesture input settings

1 When you enter text using the on-screen keyboard, tap .
2 Tap , then tap **Keyboard settings**.
3 Tap **Text input settings**.
4 Mark or unmark the **Gesture input** checkbox.
5 If you want to automatically add a space between gestures without having to tap the space bar each time, mark the **Space between gestures** checkbox.

Phonepad

The Phonepad is similar to a standard 12-key telephone keypad. It gives you predictive text and multi-tap input options. You can activate the Phonepad text input

27

method via the keyboard settings. The Phonepad is only available in portrait orientation.

Using the Phonepad
1	Choose a text input option
2	Change the character case and turn on the caps lock
3	Display numbers
4	Display symbols and smileys
5	Enter a space
6	Enter a carriage return or confirm text input
7	Delete a character before the cursor

! All illustrations are for illustration purposes only and may not accurately depict the actual phone.

To open the Phonepad for the first time
1 Tap a text entry field, then tap 12!?.
2 Tap ✂, then tap **Keyboard settings**.
3 Tap **Keyboard appearance** > **Keyboard layout**.
4 Select the Phonepad.

💡 The Phonepad can only be used in portrait mode.

To switch between the on-screen keyboard and the Phonepad
1 When you enter text using the on-screen keyboard or Phonepad, tap 12!? or 123 .
2 Tap ✂, then tap **Keyboard settings** > **Keyboard appearance** > **Keyboard layout**, then select an option.

! Remember the Phonepad is only available in portrait orientation.

To enter text using the Phonepad
- When 📝 appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap the word that appears or tap ▶ to view more word suggestions and select a word from the list.
- When 📝 appears in the Phonepad, tap the on-screen key for the character you want to enter. Keep pressing this key until the desired character is selected. Then do the same for the next character you want to enter, and so on.

28

To enter numbers using the Phonepad

- When the Phonepad is open, tap [123]. A Phonepad with numbers appears.

To insert symbols and smileys using the Phonepad

1 When the Phonepad is open, tap [&☺]. A grid with symbols and smileys appears.
2 Scroll up or down to view more options. Tap a symbol or smiley to select it.

Keyboard and Phonepad settings

You can select settings for the on-screen keyboard and the Phonepad, such as writing language and automatic correction.

To access the on-screen keyboard and Phonepad settings

1 When you enter text using the on-screen keyboard or Phonepad, tap [12!?] or [123].
2 Tap [⚒], then tap **Keyboard settings**.

To add a writing language for text input

1 When you enter text using the on-screen keyboard or Phonepad, tap [12!?] or [123].
2 Tap [⚒], then tap **Keyboard settings**.
3 Tap **Languages** > **Writing languages** and mark the relevant checkboxes. Tap **OK** to confirm.

💡 To switch between languages, tap the input language key, for example, [EN].

Text input settings

When entering text using the on-screen keyboard or the Phonepad, you can access a text input settings menu that helps you set options for text prediction. For example, you can decide how you want the phone to present word alternatives and correct words as you type, or enable the text input application to remember new words you write.

To change the text input settings

1 When you enter text using the on-screen keyboard or the Phonepad, tap [12!?] or [123].
2 Tap [⚒], then tap **Keyboard settings** > **Text input settings** and select the relevant settings.

To enable voice input

1 When you enter text using the on-screen keyboard or the Phonepad, tap [12!?] or [123].
2 Tap [⚒], then tap **Keyboard settings** .
3 Mark the **Google voice typing key** checkbox.
4 Press [↰] to save your settings. A microphone icon [🎤] appears on your on-screen keyboard or Phonepad.

To enter text using voice input

1 When you enter text, make sure that the voice input function is enabled and that you have a working data connection.
2 When [🎤] appears on your on-screen keyboard or Phonepad, tap it. When the input language key, for example, [EN], appears, touch and hold it.
3 When [🎤] appears, speak to enter text or select a dictation language. When you're finished, tap **Done**.
4 The suggested text appears. Tap the suggested text to make the search result list appear, then select the words you want.

Customising your phone

Adapt the phone to your needs by adjusting, for example, your personal ringtone, phone language and your Privacy settings.

Adjusting the volume

You can adjust the ringtone volume for phone calls and notifications as well as for music and video playback.

To adjust the ring volume with the volume key

• Press the volume key up or down.

To adjust the media playing volume with the volume key

• When playing music or watching video, press the volume key up or down.

Adjusting the sound settings

You can adjust the sound settings in your phone. For example, you can set your phone to silent mode so that it doesn't ring when you're in a meeting.

To set the phone to silent mode

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Sound**.
3 Select **Silent mode**, then select **Mute**.

💡 You can also tap ▧ from the **Phone options** menu to set the phone to silent mode. To access the **Phone options** menu, press and hold down the power key ⓞ.

To set the phone to vibrate mode

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Sound**.
3 Select **Silent mode**, then select **Vibrate**.

💡 You can also tap ▨ from the **Phone options** menu to set the phone to vibrate mode. To access the **Phone options** menu, press and hold down the power key ⓞ.

To set the phone to vibrate and ring mode

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Sound**.
3 Select **Silent mode**, then select **Off**.
4 Mark the **Vibrate on ring** checkbox.

To enhance the speaker loudness

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Sound**.
3 Mark the **xLOUD™** checkbox.

Time and date

You can change the time and date in your phone.

To set the date manually

1 From the Home screen, tap ▦ .
2 Find and tap **Settings** > **Date & time**.
3 Unmark the **Automatic date & time** checkbox, if it is marked.
4 Tap **Set date**.
5 Adjust the date by scrolling up and down.
6 Tap **Set**.

To set the time manually

1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **Date & time**.
3 Unmark the **Automatic date & time** checkbox if it is marked.
4 Tap **Set time**.
5 Scroll up or down to adjust the hour and minute.
6 If applicable, scroll up to change **am** to **pm**, or vice versa.
7 Tap **Set**.

To set the time zone

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Date & time**.
3 Unmark the **Automatic time zone** checkbox, if it is marked.
4 Tap **Select time zone**.
5 Select an option.

To set the date format

1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **Date & time** > **Select date format**.
3 Select an option.

Ringtone settings

To set a phone ringtone

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Sound** > **Phone ringtone**.
3 Select a ringtone.
4 Tap **Done**.

To enable touch tones

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Sound**.
3 Mark the **Dial pad touch tones** and **Touch sounds** checkboxes.

To select a notification ringtone

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Sound** > **Default notification**.
3 Select a ringtone.
4 Tap **Done**.

Screen settings

To adjust the screen brightness

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Display** > **Brightness**.
3 Drag the slider to adjust the brightness.
4 Tap **OK**.

💡 The brightness level affects your battery performance. For tips on how to improve battery performance, see *Improving battery performance* on page 14.

To set the screen to vibrate

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Sound**.
3 Mark the **Vibrate on touch** checkbox. The screen now vibrates when you tap soft keys and certain applications.

To adjust the idle time before the screen turns off

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Display** > **Sleep**.
3 Select an option.

💡 To turn off the screen quickly, briefly press the power key ⓪.

To keep the screen active while the phone is charging

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Developer options**.
3 Mark the **Stay awake** checkbox.

Phone language

You can select a language to use in your phone.

To change the phone language

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Language & input** > **Language**.
3 Select an option.
4 Tap **Done**.

❗ If you select the wrong language and cannot read the menu texts, find and tap 🛠. Then select the text beside ⌨, and select the first entry in the following menu. You can then select the language you want.

Airplane mode

In Airplane mode, your phone's network and radio transceivers are turned off to prevent disturbance to sensitive equipment. However, you can still play games, listen to music, watch videos and other content, as long as all this content is saved on your memory card or internal storage. You can also be notified by alarms, if alarms are activated.

💡 Turning on Airplane mode reduces battery consumption.

To turn on Airplane mode

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **More…**.
3 Mark the **Airplane mode** checkbox.

💡 You can also select **Airplane mode** from the **Phone options** menu. To access the **Phone options** menu, press and hold down the power key ⓪.

Memory

You can save content to a memory card, to your phone's internal storage and to the phone memory. Music, video clips and photos are saved to the internal storage or the memory card while applications, contacts and messages are saved to the phone memory.

❗ You can move some applications from the phone memory to the internal storage.

To move an application to the phone's internal storage

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Apps**.
3 Select the application that you want to move to the internal storage.
4 Tap **Move to internal storage** .

💡 It is not possible to move some applications from the phone memory to the internal storage.

Memory card

Your phone is preloaded with a microSD™ memory card, which is used for media content. This type of card can also be used as a portable memory card with other compatible devices.

💡 Higher capacity memory cards are available for purchase as optional accessories.

Safely removing the memory card

You can safely remove the memory card from your phone any time when the phone is turned off. If you want to remove the memory card when your phone is on, you must first unmount the memory card before you physically remove it from the phone. This can prevent damaging the memory card or losing data stored on the memory card.

To unmount the memory card

1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **Storage** > **Unmount SD card**.

Formatting the memory card

You can format the memory card in your phone, for example, to free up memory. This means that you erase all data on the card.

❗ All content on the memory card gets erased when you format it. Make sure you make backups of everything you want to save before formatting the memory card. To back up your content, you can copy it to your computer. For more information, refer to the chapter *Connecting your phone to a computer* on page 112.

To format the memory card

1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **Storage** > **Unmount SD card**.
3 After you have unmounted the memory card, tap **Erase SD card**.

Using a headset with your phone

❗ Use the accessories provided with your phone, or other compatible accessories, for optimal performance.

To use a headset

1 Connect the headset to your phone.
2 To answer a call, press the call handling key.
3 To end the call, press the call handling key.

❗ If a headset is not included with the phone, you may purchase one separately.

💡 If you are listening to music, the music stops when you answer a call and resumes after you end the call.

Controlling data usage

Keep track of and control the amount of data transferred to and from your phone during a given period. For example, you can set data usage warnings and limits for your phone to avoid additional charges. You can also limit the amount of data used by individual applications.

❗ Adjusting data usage settings can help you keep greater control over data usage but cannot guarantee the prevention of additional charges.

To access data usage settings

1 From your Home screen, tap ⊞.
2 Find and tap **Settings** > **Data usage**.

To turn data traffic on or off

1 From your Home screen, tap ⊞.
2 Find and tap **Settings** > **Data usage**.
3 To turn data traffic on or off, tap the on-off switch beside **Mobile data** accordingly.

💡 You can also turn data traffic on or off by marking or unmarking the **Data enabled** checkbox under **Settings** > **More…** > **Mobile networks**.

To set a data usage warning

1 Make sure that you have turned on data traffic.
2 From your Home screen, tap ⊞.
3 Find and tap **Settings** > **Data usage**.
4 To set the warning level, drag the lines to the desired values. You receive a warning notification when the amount of data traffic approaches the level you set.

To set a data usage limit

1 Make sure that you have turned on data traffic.
2 From your Home screen, tap ⊞.
3 Find and tap **Settings** > **Data usage**.
4 Mark the **Set mobile data limit** checkbox if it is not marked, then tap **OK**.
5 To set the data usage limit, drag the lines to the desired values.

❗ Once your data usage reaches the set limit, data traffic on your phone will be turned off automatically.

To control the data usage of individual applications

1 From your Home screen, tap ⊞.
2 Find and tap **Settings** > **Data usage**.
3 Find and tap the desired application.
4 Make the necessary adjustments to change the data usage limit, restrict background data, or restrict all data traffic for the application.
5 To access more specific settings for the application, tap **View app settings** and make the desired changes.

❗ Specific settings for an application may not always be accessible.

💡 The performance of individual applications may be affected if you change the related data usage settings.

Calling

Emergency calls

Your phone supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without the SIM card inserted if you are within range of a network.

To make an emergency call

1 From your Home screen, tap ▦.
2 Find and Tap **Phone**.
3 Enter the emergency number and tap **Call**. To delete a number, tap ⌫.

💡 You can make emergency calls when no SIM card is inserted or when outgoing calls are barred.

To make an emergency call while the SIM card is locked

1 Tap **Emergency call**.
2 Enter the emergency number and tap **Call**. To delete a number, tap ⌫.

Call handling

You can make a call by manually dialling a phone number, by tapping a number saved in your phone's contact list, or by tapping the phone number in your call log view. You can also use the smart dial feature to quickly find numbers from your contact list and call logs.

To make a call by dialling

1 From your Home screen, tap ▦.
2 Find and tap **Phone**.
3 Enter the number of the recipient and tap **Call**. To delete a number, tap ⌫.

To make a call using smart dial

1 From your Home screen, tap ▦.
2 Find and tap **Phone**.
3 Use the dialpad to enter letters or numbers that correspond to the contact you want to call. As you enter each letter or number, a list of possible matches appears.
4 Tap the contact you want to call.

To end a call

• Tap ▰.

To make an international call

1 From your Home screen, tap ▦.
2 Find and tap **Phone**.
3 Touch and hold 0 until a "+" sign appears.
4 Enter the country code, area code (without the first 0) and phone number, then tap **Call**.

To answer a call

- Drag 📞 to the right across the screen.

> ! If you are using regular headphones without a microphone, you have to remove the headphones from the headset connector to be able to answer the call.

To decline a call
- Drag ⛔ to the left across the screen.

To reject a second call
- When you hear repeated beeps during a call, tap **Busy**.

To change the ear speaker volume during a call
- Press the volume key up or down.

To turn on the loudspeaker during a call
- Tap 🔊.

To mute the microphone during a call
- Tap 🔇.

To activate the screen during a call
- Press ⌂.

To enter numbers during a call
1 During a call, tap ▦. A keypad appears.
2 Enter numbers.

To mute the ringtone for an incoming call
- When you receive the call, press the volume key.

Recent calls

In the call log, you can view recently missed 📞, received ↙ and dialled ↗ calls.

To view your missed calls
1 When you have missed a call, ↑ appears in the status bar. Drag the status bar downwards.
2 Tap **Missed call**.

To call a number from your call log
1 From your Home screen, tap ▦.
2 Find and tap **Phone**.The call log view appears on the upper part of the screen.
3 To call a number directly, tap the number. To edit a number before calling, touch and hold the number, then tap **Edit number before call**.

> ! You can also call a number by tapping ▶ > **Call back**.

To add a number from the call log to your contacts
1 From your Home screen, tap ▦.
2 Find and tap **Phone**.The call log view appears on the upper part of the screen.
3 Touch and hold the number, then tap **Add to Contacts**.
4 Tap the desired contact, or tap **Create new contact**.
5 Edit the contact details and tap **Done**.

Voicemail

If your subscription includes an answering service, callers can leave a voicemail message when you cannot answer a call. Usually, the voicemail number is saved on the SIM card. If not, contact AT&T to get your voicemail number. You can then enter the number manually.

To enter your voicemail number

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Call settings** > **Voicemail settings** > **Voicemail number**.
3 Enter your voicemail number.
4 Tap **OK**.

To call your voicemail service

1 From your Home screen, tap ▦.
2 Find and tap **Phone**.
3 Touch and hold **1**.

Multiple calls

If you have activated call waiting, you can handle multiple calls at the same time. When it is activated, you will be notified by a beep if you receive another call.

To activate or deactivate call waiting

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Call settings** > **Additional settings**.
3 To activate or deactivate call waiting, tap **Call waiting**.

To answer a second call and put the ongoing call on hold

• When you hear repeated beeps during a call, tap **Answer**.

To make a second call

1 During an ongoing call, tap ▦.
2 Enter the number of the recipient and tap 📞.
3 If the recipient answers, the first call is put on hold.

✦ The same procedure applies to subsequent calls.

To switch between multiple calls

• To switch to another call and put the current call on hold, tap the desired number or contact.

To end the ongoing call and return to the next call on hold

• Tap 📵.

Conference calls

With a conference or multiparty call, you can have a joint conversation with two or more persons.

To make a conference call

1 During an ongoing call, tap ▦.
2 Dial the number of your second participant and tap 📞.
3 If the second participant answers, the first call is put on hold.
4 Tap ⚹.

✦ To add more participants, repeat steps 1 to 4.

37

To have a private conversation with a conference call participant

1   During an ongoing conference call, tap the button showing the number of participants. For example, tap **3 participants** if there are three participants on the call.
2   Tap the name of the participant you want to talk to privately.
3   To end the private conversation and return to the conference call, tap 👥.

To release a participant from a conference call

1   During an ongoing conference call, tap the button showing the number of participants. For example, tap **3 participants** if there are three participants.
2   Tap 📵 next to the participant you want to release.

To end a conference call

• During the call, tap 📵.

Call settings

Barring calls

You can bar all or certain categories of incoming and outgoing calls. When you use call barring for the first time, you need to enter your PUK (Personal Unblocking Key) and then a new password to activate the call barring function.

To bar incoming or outgoing calls

1   From your Home screen, tap ▦.
2   Find and tap **Settings** > **Call settings** > **Call barring**.
3   Select an option.
4   Enter the password and tap **Enable**.

Rejecting a call with a message

You can reject a call with a predefined message. When you reject a call with such a message, the message is automatically sent to the caller and saved on your phone.

Six messages are predefined in the phone. You can select from these predefined messages, which can also be edited if necessary.

To reject a call with a predefined message

• Drag **Reject with message** upward, then select a message.

To reject a second call with a predefined message

• When you hear repeated beeps during a call, drag **Reject with message** upward, then select a message.

To edit the message used to reject a call

1   From your Home screen, tap ▦.
2   Find and tap **Settings** > **Call settings** > **Reject call with message**.
3   Tap the message you want to edit, then make the necessary changes.
4   When you're done, tap **OK**.

Forwarding calls

You can forward calls, for example, to another phone number, or to an answering service.

To forward calls

1   From your Home screen, tap ▦.
2   Find and tap **Settings** > **Call settings** > **Call forwarding**.
3   Select an option.
4   Enter the number you want to forward the calls to, then tap **Enable**.

To turn off call forwarding

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Call settings** > **Call forwarding**.
3 Select an option, then tap **Disable**.

Showing or hiding your phone number

You can select to show or hide your phone number on call recipients' devices when you call them.

To show or hide your phone number

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Call settings** > **Additional settings** > **Caller ID**.

Fixed Dialling Numbers

If you have received a PIN2 code from AT&T, you can use a list of Fixed Dialling Numbers (FDN) to restrict outgoing calls.

To enable or disable fixed dialling

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Call settings** > **Fixed dialling numbers**.
3 Tap **Activate fixed dialling** or **Deactivate fixed dialling**.
4 Enter your PIN2 and tap **OK**.

To access the list of accepted call recipients

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Call settings** > **Fixed dialling numbers** > **Fixed dialling numbers**.

Contacts

Use the Contacts application to store and manage all your numbers, email addresses, and other contact data in one place. Just tap on a contact to see all communications with that contact in one easy overview.

You can add new contacts in your phone and synchronise them with contacts saved in your Google™ account, AT&T Address book, Microsoft® Exchange ActiveSync® account, or other accounts that support synchronisation. The Contacts application automatically creates new entries and also helps you match data such as email addresses with existing entries. You can also manage this process manually.

Transferring contacts to your new phone

There are several ways to transfer contacts to your new phone. Select a transfer method that best suits your situation.

Transferring contacts using a PC

You can use a PC to transfer contacts from several phone brands, including iPhone, Samsung, HTC and Nokia.

You need:

- An Internet-connected PC running Windows®
- A USB cable for your old phone
- A USB cable for your new Android™ phone
- Your old phone
- Your new Android™ phone

! If you don't have access to all of the items listed above, go to *www.sonymobile.com* to find out about other ways to transfer your contacts.

Using the PC Companion program to transfer contacts

If you are transferring contacts using a PC, use the PC Companion progam. It's free, and the installation files are already saved on your new phone. PC Companion also offers a range of other features, including help to update your phone software.

To install PC Companion

1 **New phone**: Turn on your new Android™ phone and connect it to a PC using a USB cable.
2 **New phone**: Tap **Install** to install PC Companion on the PC.
3 **Computer**: If a popup window appears, select *Run Startme.exe*. In the new popup window that appears, click *Install* to start the installation and then follow the instructions to complete the installation.

To transfer contacts to your new phone using PC Companion

1 Make sure that PC Companion is installed on your PC.
2 Open the PC Companion program on the PC, then click *Contacts Setup* and follow the instructions to transfer your contacts.

40

Transferring contacts using an Apple® Mac® computer

For detailed instructions on how to use an Apple Mac computer to transfer contacts from your old phone, go to *www.sonymobile.com*.

Transferring contacts using synchronisation accounts

Your phone works with popular online synchronisation accounts such as Google Sync™, Microsoft® Exchange ActiveSync®or Facebook™. If you have synced the contacts in your old phone or your computer with an online account, you can transfer your contacts to your new phone using that account. For more detailed information about synchronisation, see *Synchronising data on your phone* on page 65.

To synchronise your phone contacts with a synchronisation account

1   From your Home screen, tap ▦, then tap 👤.
2   Press ☰, then tap **Settings** > **Accounts & sync**.
3   To set up a synchronisation account, tap **Add account** and follow the on-screen instructions. If you have already set up a synchronisation account and you want to sync with that account, tap the account, press ☰, and tap **Sync now**.

Transferring contacts from a SIM card

To import contacts from a SIM card

1   From your Home screen, tap ▦ , then tap 👤 .
2   Press ☰ , then tap **Import contacts** > **SIM card**.
3   If you have set up a synchronisation account, you can choose to add the SIM card contacts under that account. Or you can choose to only use these contacts in the phone. Select your desired option.
4   To import an individual contact, find and tap the contact. To import all contacts, tap **Import all**.

Transferring contacts from a memory card

To import contacts from a memory card

1   From your Home screen, tap ▦, then tap 👤.
2   Press ☰, then tap **Import contacts** > **SD card**.
3   If you have set up a synchronisation account, you can add the imported memory card contacts under that account. Or you can choose to only use the imported contacts in the phone. Select your desired option.
4   If you have more than one vCard file on the SD card, a list appears showing different batches of phone contacts, with the corresponding dates for when they were created. Select the batch you want to import.

Receiving contacts from other devices

To receive contact data sent using Bluetooth™ technology

1   Make sure you have the Bluetooth™ function turned on and your phone set to visible. If not, then you cannot receive data from other devices.
2   When you are asked to confirm whether you want to receive the file, tap **Accept**.
3   Drag down the Notification panel and tap the file you received to import the contact data.

To receive contacts sent using a messaging service

1 When you receive a new text message, multimedia message, or email message, open the message.
2 The received contact data appears as a vCard attachment. Tap, or touch and hold the vCard file to open a menu so you can save the contact data.

Contacts screen overview
1	Shortcut tabs
2	Find services and amenities in your local area
3	Select or create emergency contact numbers
4	Access a list of account services and numbers
5	Tap a contact to view its details
6	Alphabetical index for browsing contacts
7	Tap a contact thumbnail to access the quick contact menu
8	Create a contact
9	Search for contacts
10	Filter your contacts

Managing your contacts

You can create, edit and synchronise your contacts in a few simple steps. You can select contacts saved in different accounts and manage how you display them in the phone.

If you synchronise your contacts with more than one account, you can join contacts in your phone to avoid duplicates.

! Some synchronisation services, for example, some social networking services, do not allow you to edit contact details.

To view your contacts

- From your Home screen, tap ▦, then tap 👤. Your contacts are listed here.

To select which contacts to display in the Contacts application

1 From your Home screen, tap ▦, then tap 👤.
2 Tap 👤.
3 In the list that appears, mark and unmark the desired options. If you have synchronised your contacts with a synchronisation account, that account appears in the list. To further expand the list of options, tap the account.
4 When you are finished, tap **OK**.

To add a contact

1 From your Home screen, tap ▦, then tap 👤.
2 Tap 👤.
3 If you have synchronised your contacts with one or more accounts, select the account to which you want to add this contact, or tap **Phone contact** if you only want to use this contact in your phone.
4 Enter or select the desired information for the contact.
5 When you are finished, tap **Done**.

💡 If you add a plus sign and the country code before a contact phone number, you can use the number when you make calls from other countries.

To edit a contact

1 From the Home screen, tap ▦, then tap 👤.
2 Touch and hold the contact you want to edit, then tap **Edit contact**.
3 Edit the desired information. When you are finished, tap **Done**.

To associate a picture with a contact

1 From your Home screen, tap ▦, then tap 👤.
2 Touch and hold the contact you want to edit, then tap **Edit contact**.
3 Tap 👤 and select the desired method for adding the contact picture.
4 When you have added the picture, tap **Done**.

💡 You can also add a picture to a contact directly from the **Gallery** application.

To view your communication with a contact

1 From the Home screen, tap ▦, then tap 👤.
2 Tap the contact you want to view.
3 To view your communication with the contact for different media, tap or flick through the filter items at the bottom of the screen.

To delete contacts

1 From your Home screen, tap ▦, then tap 👤.
2 Press ▤, then tap **Delete contacts**.
3 Mark the contacts you want to delete, or tap **Mark all** if you want to delete all contacts.
4 Tap **Delete** > **OK**.

To edit contact information about yourself

1 From your Home screen, tap ▦, then tap 👤.
2 Touch and hold **My info** at the top of the contact list, then tap **Edit contact**.
3 Enter the new information or make the changes you want.
4 When you are done, tap **Done**.

Avoiding duplicate entries in the Contacts application

If you synchronise your contacts with a new account or import contact information in other ways, you could end up with duplicate entries in the Contacts application. If this happens, you can join such duplicates to create a single entry. And if you join entries by mistake, you can separate them again later.

To link contacts

1 From your Home screen, tap ▦, then tap 👤.
2 Touch and hold the contact you want to link with another contact, then tap **Link contact**.
3 From the list that appears, tap the contact whose information you want to join with the first contact, then tap **OK** to confirm. The information from the first contact is merged with the second contact, and the first contact is no longer displayed in the Contacts list.

43

To separate linked contacts

1 From your Home screen, tap ▦, then tap 👤.
2 Touch and hold the linked contact you want to edit, then tap **Edit contact**.
3 Tap **Unlink contact**.
4 Tap **OK**.

Favourites

You can mark contacts as favourites so that you can get quick access to them from the Contacts application.

To mark or unmark a contact as a favourite

1 From the Home screen, tap ▦, then tap 👤.
2 Tap the contact you want to add to or remove from your favourites.
3 Tap ⭐.

To view your favourite contacts

1 From your Home screen, tap ▦, then tap 👤.
2 Tap ⭐.

Groups

You can assign contacts to groups to get quicker access to them from within the Contacts application.

To assign a contact to a group

1 From the Home screen, tap ▦, then tap 👤.
2 Touch and hold the contact that you want to assign to a group, then tap **Edit contact**.
3 Tap the bar directly under **Assign to group**.
4 Mark the checkboxes for the groups to which you want to add the contact, then tap **Done**.

Communicating with your contacts

To search for a contact

1 From your Home screen, tap ▦, then tap 👤.
2 Tap 🔍 and enter the first few letters of the contact name in the **Search** field.
   All contacts beginning with those letters appear.

The quick contact menu

Tap a contact's thumbnail to view quick communication options for a particular contact. Options include calling the contact, sending a text or multimedia message, and starting a chat using the Google Talk™ application.

❗ For an application to appear as an option in the quick contact menu, you may need to set up the application in your phone and be logged in to the application. For example, you need to start the Gmail™ application and enter your login details before you can use Gmail™ from the quick contact menu.

Sharing your contacts

To send your business card

1 From your Home screen, tap ▦, then tap 👤.
2 Tap **My info**.
3 Press ☰, then tap **Send contact** > **OK**.
4 Select an available transfer method and follow the on-screen instructions.

44

To send a contact

1 From your Home screen, tap ▦, then tap 👤.
2 Tap the contact whose details you want to send.
3 Press ☰, then tap **Send contact** > **OK**.
4 Select an available transfer method and follow the on-screen instructions.

To send several contacts at once

1 From your Home screen, tap ▦, then tap 👤.
2 Press ☰, then tap **Send contacts**.
3 Mark the contacts you want to send, or select all if you want to send all contacts.
4 Tap **Send**, then tap **OK** to confirm.
5 Select an available transfer method and follow the on-screen instructions.

Backing up contacts

You can use a memory card, a SIM card or an online synchronisation tool such as Microsoft® Exchange ActiveSync® to back up contacts.

To export all contacts to a memory card

1 From your Home screen, tap ▦, then tap 👤.
2 Press ☰, then tap **Back up contacts** > **SD card**.
3 Tap **OK**.

To export contacts to a SIM card

1 From your Home screen, tap ▦, then tap 👤.
2 Press ☰, then tap **Back up contacts** > **SIM card**.
3 Mark the contacts you want to export, or tap **Mark all** if you want to export all your contacts.
4 Tap **Back up**.
5 Select **Add contacts** if you want to add the contacts to existing contacts on your SIM card, or select **Replace all contacts** if you want to replace the existing contacts on your SIM card.

❗ When you export contacts to a SIM card, not all information may get exported. This is due to memory limitations on SIM cards.

Messaging

Using text and multimedia messaging

You can send and receive text messages from your phone using SMS (Short Message Service). If your subscription includes MMS (Multimedia Messaging Service), you can also send and receive messages that contain media files, for example, pictures and videos. The number of characters you can send in a single text message varies depending on the operator and the language you use. If you exceed the character limit, then all your single messages are linked together and sent as one message. You are charged for each single text message you send. When you view your messages, they appear as conversations, which means that all messages to and from a particular person are grouped together.

To create and send a message

1 From your Home screen, tap ▦, then find and tap ◲.
2 Tap ✐.
3 To add a recipient, tap ◲, then find and mark the checkbox next to the recipient name. To add more than one recipient, mark the checkboxes for the desired recipients.
4 When you are finished adding recipients, tap **Done**.
5 Tap **Write message** and enter your message text.
6 If you want to add a media file, tap ✎ and select an option.
7 To send the message, tap **Send**.

☀ If you exit a message before sending, it gets saved as a draft. The conversation gets tagged with the word **Draft**.

To read a received message

1 From your Home screen, tap ▦, then find and tap ◲.
2 Tap the desired conversation.
3 If the message is not yet downloaded, tap and hold the message, then tap **Download message**.

☀ You can also open messages from the status bar when ◲ appears there. Just drag down the bar and tap the message.

To reply to a message

1 From your Home screen, tap ▦, then find and tap ◲.
2 Tap the conversation containing the message.
3 Enter your reply and tap **Send**.

To forward a message

1 From your Home screen, tap ▦, then find and tap ◲.
2 Tap the conversation containing the message you want to forward.
3 Touch and hold the message you want to forward, then tap **Forward message**.
4 Tap ◲, then select a recipient from the Contacts list. If the recipient is not listed as a contact, enter the contact's number manually and tap ▦.
5 When you are finished adding recipients, tap **Done**.
6 Edit the message, if necessary, and tap **Send**.

☀ In step 4, you can also tap **To** and enter the recipient's phone number manually.

To delete a message

1 From your Home screen, tap ▦, then find and tap ◲.
2 Tap the conversation containing the message you want to delete.
3 Touch and hold the message you want to delete, then tap **Delete message** > **Yes**.

To delete conversations

1 From your Home screen, tap ▦ , then find and tap 🔲 .
2 Tap ≡ , then tap **Delete several**.
3 Mark the checkboxes for the conversations you want to delete, then tap **Delete**.

To save a sender's number

1 From your Home screen, tap ▦, then find and tap 🔲.
2 Tap 👤 > **Save**.
3 Select an existing contact, or tap **Create new contact** and select **Phone contact**.
4 Edit the contact information and tap **Done**.

To call a message sender

1 From your Home screen, tap ▦, then find and tap 🔲.
2 Tap a conversation.
3 Tap the recipient name or number at the top of the screen.
4 If the recipient is saved in your contacts, tap the phone number that you want to call. If you have not saved the recipient in your contacts, tap 📞.

To save a file contained in a message you receive

1 From your Home screen, tap ▦, then find and tap 🔲.
2 Tap the conversation you want to open.
3 If the message has not been downloaded yet, tap and hold the message, then tap **Download message**.
4 Touch and hold the file you want to save, then select the desired option.

To star a message

1 From your Home screen, tap ▦, then find and tap 🔲.
2 Tap the conversation you want to open.
3 In the message you want to star, tap ☆.
4 To unstar a message, tap ⭐.

To view starred messages

1 From your Home screen, tap ▦, then find and tap 🔲.
2 Press ≡, then tap **Starred messages**.
3 All starred messages appear in a list.

To search for messages

1 From your Home screen, tap ▦, then find and tap 🔲.
2 Press 🔍.
3 Tap **Search Messaging**.
4 Enter your search keywords, then tap **Go**.

Text and multimedia message options

To change your message notification settings

1 From your Home screen, tap ▦, then find and tap 🔲.
2 Press ≡, then tap **Settings**.
3 To set a notification sound, tap **Notification tone** and select an option.
4 For other notification settings, check or uncheck the relevant checkboxes.

To view messages saved on the SIM card

1 From your Home screen, tap ▦, then find and tap 🔲.
2 Press ≡, then tap **Settings** > **SIM messages**.

Email

Use the Email application in your phone to send and receive emails through your regular email account or through your corporate account. Or you can do both. Your phone can handle several email accounts at the same time. You can set up these accounts to run through one combined inbox, or through separate inboxes. Note that emails you receive to your Gmail™ account can be accessed in the phone from both the Email and the Gmail™ applications.

Your corporate Microsoft® Outlook® email messages have to be stored on a Microsoft® Exchange server for the functionality described above to work. See *Synchronising your corporate email, calendar and contacts* on page 66 for more information.

To set up an email account in your phone

1   From your Home screen, tap ▦.
2   Find and tap **Email**.
3   Enter your email address and password, then tap **Next**.
4   If the settings for the email account cannot be downloaded automatically, complete the setup manually. If necessary, contact your email service provider for detailed settings. For corporate email setup on your phone, select **Exchange Active Sync** as the account type.
5   When you are prompted, enter a name for your email account, so that it is easily identifiable. The same name shows in the emails you send from this account. When you are finished, tap **Next**.

You can set up more than one email account. See *To add an extra email account in your phone* on page 51.

Using email

To create and send an email message

1   From your Home screen, tap ▦, then find and tap **Email**.
2   If you are using several email accounts, tap ▼ at the top of the screen and select the account you want to send the message from, then tap ✎.
3   Tap **To** and start typing the recipient's address. Matches are displayed in a dynamic list. Tap the relevant match or continue typing the complete email address. To add more recipients, enter a comma (,) or a semicolon (;) and start typing another name. To delete a recipient, tap ⌫.
4   To select an email address saved in your contacts, tap ⊡, then find and mark the checkbox next to a recipient field. To add more than one recipient, mark the checkboxes for the desired recipients. When you are finished, tap **Done**.
5   Tap **Subject** and enter the email subject.
6   To attach a file, tap ⊘. Select the type of file, then tap the file you want to attach from the list that appears.
7   In the message area, enter your message text.
8   To set a priority level, press ☰, then tap **Set priority** and select an option.
9   To add Cc/Bcc fields, press ☰, then tap **Show Cc/Bcc**.
10 To send the email, tap ✉.

To receive email messages

1   From your Home screen, tap ▦.
2   Find and tap **Email**.
3   If you are using several email accounts, tap ▼ at the top of the screen and select the account that you want to check. If you want to check all your email accounts at once, tap **Combined view**.
4   To download new messages, press ☰, then tap **Refresh**.

If you have set up a corporate email account, you can set the check frequency to **Automatic (Push)**.

To read your email messages

1 From your Home screen, tap ▦.
2 Find and tap **Email**.
3 If you are using several email accounts, tap ▼ at the top of the screen and select the account you want to check. If you want to check all your email accounts at once, tap **Combined view**.
4 In the email inbox, scroll up or down and tap the email you want to read.

To use the email preview pane

1 From your Home screen, tap ▦, then find and tap **Email**.
2 If you are using several email accounts, tap ▼ and select the account you want to check. If you want to check all your email accounts at once, tap **Combined view**.
3 Hold your phone horizontally. The email preview pane appears.
4 Scroll up or down in the email inbox and tap the email you want to read. The email opens in the preview pane. To view more information about the email, tap the downward arrow next to the sender's name. In the body text field, pinch two fingers together, or spread them apart, to zoom out or in.
5 To view the email in fullscreen format, tap the split bar (located between the email list and email body) accordingly. In fullscreen format, use the leftward and rightward arrows to read your previous or next message.
6 To return to the inbox view, tap the split bar accordingly.

❗ Before using the preview pane, activate it in the preview pane settings.

💡 To hide the preview pane, hold your phone vertically, or change the preview pane settings.

To change email preview pane settings

1 From your Home screen, tap ▦, then find and tap **Email**.
2 Press ☰, then tap **Settings**.
3 Tap **General** > **Preview pane**, then select an option.

To view an email message attachment

1 From your Home screen, tap ▦.
2 Find and tap **Email**.
3 Find and tap the email message containing the attachment you want to view. Emails with attachments are identified by 📎.
4 Find the attachment in the email body, then tap **View** or **Save** next to it.

To save a sender's email address to your contacts

1 From your Home screen, tap ▦.
2 Find and tap **Email**.
3 Find and tap a message in your email inbox.
4 Tap the name of the sender.
5 Tap **OK**.
6 Select an existing contact, or tap **Create new contact** and select **Phone contact** or **SIM contact**.
7 Edit the contact information, then tap **Done**.

To reply to an email message

1 From your Home screen, tap ▦.
2 Find and tap **Email**.
3 In your email inbox, find and tap the message you want to reply to, then tap ↩.
4 Tap **Reply** or **Reply all**.
5 Enter your reply, then tap **Send**.

To forward an email message

1 From your Home screen, tap ⊞.
2 Find and tap **Email**.
3 In your email inbox, find and tap the message you want to forward, then tap ↩.
4 Tap **Forward**.
5 Tap **To** and enter the recipient's email address manually, or tap ⊞ to select a recipient from your contacts.
6 Enter your message text, then tap **Send**.

To delete an email message

1 From your Home screen, tap ⊞.
2 Find and tap **Email**.
3 In your email inbox, find and tap the message you want to delete, then tap 🗑.
4 Tap **Yes**.

To sort your emails

1 From your Home screen, tap ⊞.
2 Find and tap **Email**.
3 If you are using several email accounts, tap ▼ at the top of the screen and select the account that you want to check. If you want to check all your email accounts at once, tap **Combined view**.
4 Press ≡, then tap **Sort**.
5 Select a sorting option.

To search for emails

1 From your Home screen, tap ⊞. Then find and tap **Email**.
2 If you are using several email accounts and want to check just one account, tap the account name, then press 🔍.
3 Enter your search text, then tap **Go** on your keyboard.
4 The search result appears in a list sorted by date. Tap the email you want to open.

☀ To change search options, tap ▼ and select a different option.

To manage your email in batches

1 From your Home screen, tap ⊞, then find and tap **Email**.
2 If you are using several email accounts, tap ▼ at the top of the screen and select the account that you want to check. If you want to check all your email accounts at once, tap **Combined view**.
3 Mark the checkboxes for the emails that you want to select.
4 When you are finished, tap one of the buttons at the bottom of the screen to, for example, mark the selected emails as read or unread, or delete the selected emails.

To view all folders for one email account

1 From your Home screen, tap ⊞. Then find and tap **Email**.
2 Tap ▼ at the top of the screen and select the account you want to check, then tap ▼ again and select **Show all folders** to view all the folders in this account.

To change the inbox check frequency

1 From your Home screen, tap ⊞.
2 Find and tap **Email**.
3 Press ≡, then tap **Settings**.
4 Select the account for which you want to change the inbox check frequency.
5 Tap **Inbox check frequency** and select an option.

To set an Out of Office auto-reply in an Exchange Active Sync account

1 From your Home screen, tap ▦, then find and tap **Email**.
2 Press ☰, then tap **Settings**.
3 Select the EAS (Exchange Active Sync) account for which you want to set an Out of Office auto-reply.
4 Tap **Out of office**.
5 Tap ◯ beside **Out of office** so that ◯ changes to ⏐.
6 If needed, mark the **Set time range** checkbox and set the time range for the auto reply.
7 Enter your Out of Office message in the body text field.
8 Tap **OK** to confirm.

Using email accounts

To add an extra email account in your phone

1 From your Home screen, tap ▦.
2 Find and tap **Email**.
3 Tap ▼ at the top of the screen, then tap **Add account**.
4 Enter the email address and password, then tap **Next**. If the settings for the email account cannot be downloaded automatically, complete the setup manually.
5 When prompted, enter a name for your email account so that it is easily identifiable. The same name shows in the emails you send from this account.
6 When you are finished, tap **Next**.

To set an email account as your default account

1 From your Home screen, tap ▦.
2 Find and tap **Email**.
3 Press ☰, then tap **Settings**.
4 Select the account you want to use as the default account for composing and sending emails.
5 Mark the **Default account** checkbox. The inbox of the default account appears every time you open the email application.

☀ If you only have one email account, this account is automatically the default account.

To remove an email account from your phone

1 From your Home screen, tap ▦.
2 Find and tap **Email**.
3 Press ☰, then tap **Settings**.
4 Select the account you want to remove.
5 Tap **Delete account** > **OK**.

Gmail™ and other Google™ services

If you have a Google™ account, you can use the Gmail™ application in your phone to read, write and organise email messages. After you set up your Google™ account to work in the phone, you can also chat to friends using the Google Talk™ application, synchronise your phone calendar application with your Google Calendar™, and download applications and games from Google Play™.

❗ The services and features described in this chapter may not be supported in all countries or regions, or by all networks and/or service providers in all areas.

To set up a Google™ account in your phone

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Accounts & sync** > **Add account** > **Google**.
3 Follow the registration wizard to create a Google™ account, or sign in if you already have an account. Your phone is now ready to use with Gmail™ , Google Talk™ and Google Calendar™.

🔅 You can also sign in or create a Google™ account from the setup guide the first time you start your phone. Or you can go online and create an account at *www.google.com/accounts*.

To open the Gmail™ application

1 From the Home screen, tap ▦.
2 Find and tap **Gmail** .

Google Talk™

You can use Google Talk™ instant messaging in your phone to chat with friends who also use this application.

To start Google Talk™

1   From your Home screen, tap ▦.
2   Find and tap **Talk**.

To reply to an instant message with Talk

1   When someone contacts you on **Talk**, 🖼 appears in the status bar.
2   Drag the status bar downwards, then tap the message and begin to chat.

Explore by Touch

Use the Explore by Touch function to navigate the phone without having to look at the screen. When the Explore by Touch function is turned on, an automated voice tells you what your finger is touching on the screen. This function is primarily designed to help blind or visually impaired users to use the phone.

Before using Explore by Touch

Before you can turn on the Explore by Touch function, you must first turn on the TalkBack service.

To turn on the TalkBack service

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Accessibility** > **TalkBack**.
3 Drag the slider to the right.

To turn on the Explore by Touch function

1 Make sure that the TalkBack service is turned on.
2 From your Home screen, tap ▦.
3 Find and tap **Settings** > **Accessibility** > **Explore by Touch**.
4 Drag the slider to the right.

❗ If the TalkBack service is not turned on, the Explore by touch function is not available.

To navigate your phone using the Explore by Touch function

1 Explore your screen using one finger. Tap once to hear what your finger is touching on the screen.
2 Tap twice to open an application, menu, or other option.
3 To change screens and scroll within lists, drag or flick two fingers in the direction you want to scroll on the screen.

💡 This function changes the way your screen responds to touch. Before using it, tap **Tutorial** to get more information.

Timescape™

Timescape™ collects all your communications into one integrated view. Events such as Facebook™ or Twitter™ updates appear as tiles in a chronological flow on the screen. Browse the files to get a snack-size preview of events before choosing to open them and view the full content. Timescape™ also features an infinite button ⬢ that gives you access to a range of content about the item you are currently viewing.

❗ The services and features described in this chapter may not be supported in all countries or regions, or by all networks and/or service providers in all areas.

To start Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**◢.
3 If you are starting Timescape™ for the first time, tap the tile in the welcome screen to set up Timescape.
4 Tap the **Services** screen to log in to social networking services such as Facebook™ or Twitter™, or to search for Timescape-related extensions in Google Play™.
5 If you do not want to log in to any social networking accounts or search Google Play™, tap **Done**.

Timescape™ main view
1	Shows your most recent update to a social networking service
2	Timescape™ tiles displayed in chronological order
3	Timescape™ event filter

Using Timescape™

To scroll through tiles in Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Flick up or down to scroll through the tiles.

55

To preview a tile in Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Scroll to the tile you want to preview, and then tap it.

Timescape™ event filter overview

◢	All events
🐦	Updates from your Twitter™ contacts
f	Updates from your Facebook™ contacts

💡 More events appear in the Timescape™ event filter if you have installed other Timescape services.

To filter the events displayed in Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Tap or flick through the filter icons.

To refresh the main view in Timescape™

• When the Timescape™ event filter is set to show all events, press ☰, then tap **Refresh**.

💡 When you refresh the main view, your phone may connect to the Internet to update information from web service accounts that you have linked to Timescape™.

To log in to Facebook™ or Twitter™ from Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Press ☰, then tap **Settings** > **Set up services**.
4 Tap the service you want to log in to.
5 Enter your login details.

💡 When you have logged in to a web service, you can update your status or view updates from the web service in Timescape™.

To update your Facebook™ or Twitter™ status in Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Tap ☰ > **Update status**.
4 Tap the service for which you want to update your status. If you are not signed in to the service, you need to sign in before proceeding. When you have selected the desired service, tap **Continue**.
5 Tap the text field and enter your new status, then tap **Post**.

To log out of Facebook™ or Twitter™ from Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Press ☰, then tap **Settings** > **Set up services**.
4 Tap the service you want to log out of.

❗ Your account information gets deleted when you log out.

Downloading new services for Timescape™

You can perform an extension search in Google Play™ and download new services for Timescape™. Such services include applications and plug-ins that add extra

features to Timescape. For example, you can download applications that update Timescape with your activities on various social networking sites.

To download and install new services for Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Press ≡, then tap **Settings** > **Set up services** > **Extension search**.
4 If you don't have a Google account set up on your phone, follow the on-screen instructions to add one. Otherwise, you are directed straight to Google Play™.
5 In Google Play™, select a service to download from the list that appears, then follow the instructions to download and install it.

💡 You can delete installed Timescape services the same way you delete any other installed application.

To view an event in Timescape™

1 From the Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Scroll to and tap the tile for the desired event so it appears in preview mode. Then tap the tile again.

The infinite button in Timescape™

When you tap a tile, the infinite button ∞ appears in the upper right corner. If the tile is connected to a contact, you can access related content by tapping the infinite button.

To view all communication with a contact in Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Tap a tile for an event related to a contact.
4 Tap ∞. All communication with the contact appears.
5 Tap or flick the filter items at the bottom of the screen to view communication with the contact through other media.

Timescape™ settings

To access Timescape™ settings

1 From the Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Press ≡, then tap **Settings**.

To schedule web service content updates in Timescape™

1 From your Home screen, tap ▦.
2 Find and tap **Timescape™**.
3 Press ≡, then tap **Settings** > **Update mode**.
4 Tap the desired option. If you select **Manual**, no automatic updates get scheduled.

Timescape™ Feed widget

The Timescape™ Feed widget shows all your most recent Timescape™ events in one view. You can flick up or down within the widget to view the full content of every event. You can also tap an event to view its content in fullscreen format or react to it using comments, likes and retweets.

Timescape™ Feed widget view
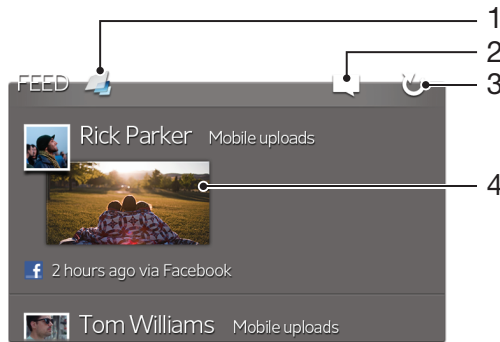

1	Shortcut to the Timescape™ main view
2	Shortcut to update status
3	Refresh the widget view
4	Most recent online event

To add the Timescape™ Feed widget to your Home screen

1 From your Home screen, press ▤.
2 Tap ⊕.
3 Find and tap **Timescape™ Feed**.

To remove the Timescape™ Feed widget from your Home screen

1 From your Home screen, touch and hold the Timescape™ Feed widget.
2 Drag the widget to 🗑.

Timescape™ Friends widget

The Timescape™ Friends widget notifies you of the latest social networking activities related to you and your friends. You can view all activities and communicate with your friends using comments, likes and retweets.

Timescape™ Friends widget view

1	Shortcut to the Timescape™ main view
2	Tap to refresh the view
3	Activity indicator – indicates updates to feeds
4	Tap to show friends with most recent social networking activity
5	Open this tab to show the friends you are following and add other friends

To add the Timescape™ Friends widget to your Home screen

1 From your Home screen, press ☰.
2 Tap ⊕.
3 Find and tap **Timescape™ Friends**.

To remove the Timescape™ Friends widget from your Home screen

1 From your Home screen, touch and hold the Timescape™ Friends widget.
2 Drag the widget to 🗑.

Timescape™ Share widget

Share your status through one of the services that you have logged into from your phone. For example, you can post updates on Facebook™ or Twitter™.

Timescape™ Share widget view
1	Icon showing the service currently used to send posts
2	Shortcut to the Timescape™ main view
3	Enter new posts here

To add the Timescape™ Share widget to your Home screen

1 From your Home screen, press ☰.
2 Tap ⊕.
3 Find and tap **Timescape™ Share**.

To remove the Timescape™ Share widget from your Home screen

1 From your Home screen, touch and hold the Timescape™ Share widget.
2 Drag the widget to 🗑.

Getting started with Google Play™

Open Google Play™ and enter a world of applications and games. You can browse these applications and games through different categories. You can also rate an application or game and send feedback on it.

To use Google Play™, you need to have a Google™ account. See *To set up a Google™ account in your phone* on page 52.

! Google Play™ may not be available in all countries or regions

To open Google Play™

1   From the Home screen, tap ▦.
2   Find and tap **Play Store**.

Downloading from Google Play™

You can download all kinds of applications from Google Play™, including free applications.

Before you download applications

Before you start downloading from Google Play™, make sure that you have a working Internet connection.

Also, remember that you might incur data traffic charges when you download content to your phone. Contact your operator for more information.

To download a free application

1   In Google Play™, find an item you wish to download by browsing categories, or by using the search function.
2   Tap the item to view its details, and follow the instructions to complete the installation.

To download a paid application

1   In Google Play™, find an item you wish to download by browsing categories, or by using the search function.
2   Tap the item to view its details, and follow the instructions in your phone to complete your purchase.

To open a downloaded application

1   In Google Play™, press ☰, then tap **My Apps**.
2   Tap the downloaded application.

☀ You can also access downloaded applications from the Application screen.

Clearing your application data

You may sometimes need to clear data for an application. This might happen if, for example, the application memory becomes full, or you want to clear high scores for a game. You might also want to erase incoming email, text and multimedia messages in some applications.

To clear all cache for an application

1   From your Home screen, tap ▦.
2   Find and tap **Settings**.
3   Tap **Apps**.
4   Tap the application for which you want to clear all cache.
5   Tap **Clear cache**.

! It is not possible to clear the cache for some applications.

To delete an installed application

1 From your Home screen, tap ▦.
2 Find and tap **Settings**.
3 Tap **Apps**.
4 Select the application that you want to delete.
5 Tap **Uninstall**.

! It is not possible to delete some preinstalled applications.

Permissions

Some applications need to access parts of your phone to be able to work properly. For example, a navigation application needs permissions to send and receive data traffic, and access your location. Some applications might misuse their permissions by stealing or deleting data, or reporting your location. Make sure you only install and give permissions to applications you trust.

To view permissions of an application

1 From your Home screen, tap ▦.
2 Find and tap **Settings**.
3 Tap **Apps**.
4 Tap the desired application.
5 Scroll down to view the relevant details under **Permissions**.

Installing applications not from Google Play™

Installing applications of unknown or unreliable origin can damage your phone. By default, your phone is set to block such installations. However, you can change this setting and allow installations from unknown sources.

! Sony does not warrant or guarantee the performance of any third-party applications or content transferred via download or other interface to your phone. Similarly, Sony is not responsible for any damage or reduced performance of your phone attributable to the transfer of third-party content. Only use content from reliable sources. Contact the content provider if you have any questions or concerns.

To allow the installation of applications not from Google Play™

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Security**.
3 Mark the **Unknown sources** checkbox.
4 Tap **OK**.

Getting organised

Calendar

Your phone has a calendar for managing your time schedule. If you have a Google™ account, you can also synchronise your phone calendar with your web calendar. See *Synchronising data on your phone* on page 65.

To set the calendar view
1 From your Home screen, tap ▦, then find and tap **Calendar**.
2 Press ☰ and select an option.

To view multiple calendars
1 From your Home screen, tap ▦, then find and tap **Calendar**.
2 Press ☰, then tap **My calendars**.
3 Select the calendars you want to view.

To create a calendar event
1 From your Home screen, tap ▦, then tap **Calendar**.
2 Tap ➕.
3 Enter the name, time, location and description for the event.
4 If desired, select another option under **Repetition**.
5 Select a reminder for the event. To add a new reminder for the event, tap ➕.
6 Tap **Save**.

💡 When the appointment time approaches, your phone plays a short sound to remind you. Also, 🗓 appears in the status bar.

To view a calendar event
1 From your Home screen, tap ▦, then tap **Calendar**.
2 Tap the event you want to view.

To change the calendar settings
1 From your Home screen, tap ▦, then tap **Calendar**.
2 Press ☰, then tap **Settings**.
3 Tap the setting you want to change, then edit as desired.

Alarm clock

Use your phone as an alarm clock and select any sound in your phone as your alarm signal. The alarm does not sound if your phone is turned off. But it does sound when your phone is set to silent mode.

To open the alarm clock
1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.

To set a new alarm
1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Tap **Add alarm**.
4 Adjust the time by scrolling up and down.
5 If desired, edit other alarm settings.
6 Tap **Done**.

To edit an existing alarm

1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Tap the alarm you want to edit.
4 Scroll up or down to adjust the time.
5 If desired, edit other alarm settings.
6 Tap **Done**.

❗ The alarm time format displayed is the same as the format you select for your general time settings, for example, 12-hour or 24-hour.

To deactivate an alarm

1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Tap ◉ next to the alarm you want to deactivate.

To activate an existing alarm

1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Tap ◉ next to the alarm you want to activate.

To delete an alarm

1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Touch and hold the alarm you want to delete.
4 Tap **Delete alarm**, then tap **Yes**.

To set the ringtone for an alarm

1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Tap the alarm you want to edit.
4 Tap **Advanced alarm settings** and unmark the **Style settings** checkbox.
5 Tap **Alarm sound** and select an option.
6 Tap **Done**, then tap **Done**.

To set a recurring alarm

1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Tap the alarm you want to edit.
4 Tap **Repeat**.
5 Mark the checkboxes for the desired days, then tap **OK**.
6 Tap **Done**.

To set the title for an alarm

1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Tap the alarm you want to edit.
4 Tap **Advanced alarm settings**, then tap the **Alarm text** field and enter a name for the alarm.
5 Tap **Done**.

To activate the vibrate function for an alarm

1 From your Home screen, tap ▦.
2 Find and tap **Alarm & clock**.
3 Tap the alarm you want to edit.
4 Tap **Advanced alarm settings**, then mark the **Vibrate** checkbox.
5 Tap **Done**.

To set alarms to sound when the phone is in silent mode

1   From your Home screen, tap ▦ .
2   Find and tap **Alarm & clock**, then tap to select an alarm.
3   Tap **Advanced alarm settings**, then mark the **Alarm in silent mode** checkbox.
4   Tap **Done**.

To snooze an alarm when it sounds

•   Tap **Snooze - min**.

To turn off an alarm when it sounds

•   Slide ⏰ to the right.

Synchronising data on your phone

You can sync contacts, email, calendar events, and other information with your phone from multiple email accounts, synchronisation services and other kinds of accounts, depending on the applications installed on your phone. Synchronising your phone with other information sources is an easy and practical way to stay up to date.

You can:

- access your Gmail™ , Google Calendar™, Google™ contacts, Google™ Chrome™ bookmarks and other Google services you use.
- access your corporate email, contacts and calendar applications.
- access your Facebook™ contacts, calendar, albums and other services you use.

Synchronising with Google™

Synchronise your phone with different Google™ services to keep your information up to date, regardless of which device you're using your Google™ account from. For example, you can synchronise your contacts, Gmail™, calendar and web browser data.

To set up a Google™ account in your phone for automatic synchronisation

1 From your Home screen, tap ⊞.
2 Tap **Settings** > **Accounts & sync**.
3 Make sure that synchronisation is turned on so that applications can synchronise data automatically.
4 Tap **Add account** > **Google**.
5 Follow the registration wizard to create a Google™ account, or sign in if you already have an account.
6 Tap **Next**.
7 Tap your newly created Google™ account, then tap the items you want to synchronise.

To synchronise manually with your Google™ account

1 From the Home screen, tap ⊞.
2 Tap **Settings** > **Accounts & sync**.
3 Tap the Google™ account you want to synchronise.
4 Press ≡, then tap **Sync now**.

To synchronise an application with a Google™ account

1 From your Home screen, tap ⊞.
2 Tap **Settings** > **Accounts & sync**.
3 Tap the Google™ account that you want to synchronise with. A list appears of applications that can be synchronised with the Google account.
4 Tap the application that you want to synchronise with the selected Google account.

To synchronise the web browser data with Google™ Chrome™

1 From your Home screen, tap ⊞.
2 Tap **Settings** > **Accounts & sync**.
3 Tap the Google™ account that you want to synchronise with, then tap **Sync Browser**.

To remove a Google™ account from your phone

1 From your Home screen, tap ⊞.
2 Tap **Settings** > **Accounts & sync**.
3 Tap the Google™ account you want to remove from the accounts list.
4 Press ≡, then tap **Remove account**.
5 Tap **Remove account** again to confirm.

Synchronising your corporate email, calendar and contacts

Access your corporate email messages, calendar appointments and contacts directly from your phone. View and manage them just as easily as you would from a computer. After setup, you can find your information in the **Email**, **Calendar** and **Contacts** applications.

> **!** For you to access the functionality described above, your corporate information must be stored on a Microsoft® Exchange server.

To set up corporate email, calendar and contacts in your phone

1 From your Home screen, tap ▦.
2 Tap **Settings** > **Accounts & sync**.
3 Make sure that synchronisation is turned on so that your data synchronises automatically according to the sync interval you set.
4 Tap **Add account** > **Corporate**.
5 Enter your corporate email address and password.
6 Tap **Next**. Your phone begins to retrieve your account information. If a failure occurs, contact your corporate network administrator for more information such as the domain name and Exchange server address.
7 Tap **OK** to allow your corporate server to control your phone.
8 Select what data you want to sync with the phone, such as contacts and calendar entries.
9 If desired, activate the device administrator to allow your corporate server to control certain security features in your phone. For example, allow your corporate server to set password rules and set storage encryption.
10 When the setup is done, you can enter a name for the corporate account so that it can be easily identified.

To edit the setup of corporate email, calendar and contacts

1 From your Home screen, tap ▦.
2 Tap **Settings** > **Accounts & sync** and select your corporate account.
3 Tap **Account settings**, then tap the corporate account that you want to edit.
4 Change the desired settings.

To set a synchronisation interval for a corporate account

1 From your Home screen, tap ▦.
2 Tap **Settings** > **Accounts & sync** and select your corporate account.
3 Tap **Account settings**, then tap the corporate account for which you want to set a synchronisation level.
4 Tap **Inbox check frequency** and select an interval option.

To remove a corporate account from your phone

1 From your Home screen, tap ▦.
2 Tap **Settings** > **Accounts & sync**, then tap your corporate account.
3 Press ≡, then tap **Remove account**.
4 Tap **Remove account** again to confirm.

Synchronising with Facebook™

There are two ways to use Facebook™ on your phone. You can use the standard Facebook application to access your online Facebook account, or you can synchronise your Facebook account with your phone and get direct access to Facebook content from a range of other applications. For example, you can make Facebook posts from Timescape™ and access your Facebook contacts, photos and calendar entries from related applications in the phone, such as the Calendar application. To synchronise your phone with Facebook, you must first set up a Facebook integration account -- a solution developed by Sony to enable easy integration.

To set up a Facebook™ integration account on your phone

1 From your Home screen, tap ▦.
2 Tap **Settings** > **Accounts & sync**.
3 Make sure that synchronisation is turned on so that applications can synchronise data automatically.
4 Tap **Add account** > **Sony™ Facebook integration**.
5 Follow the on-screen instructions to create a Facebook™ integration account, or sign in if you already have an account.

💡 You can also set up a Facebook™ integration account on your phone by marking the **Facebook integration** checkbox under **Settings** > **Xperia™** > **Sony™ Facebook integration**.

To synchronise manually with your Facebook™ integration account

1 From your Home screen, tap ▦.
2 Tap **Settings** > **Accounts & sync**.
3 Tap the **Sony™ Facebook integration** account.
4 Press ☰, then tap **Sync now**.

To remove a Facebook™ integration account from your phone

❗ When you remove a Facebook™ integration account from your phone, the associated online Facebook account is not deleted and you can still access it from a computer.

1 From your Home screen, tap ▦.
2 Tap **Settings** > **Accounts & sync**.
3 Tap the **Sony™ Facebook integration** account.
4 Press ☰, then tap **Remove account**.
5 Tap **Remove account** again to confirm.

Connecting to wireless networks

You can access the Internet wirelessly from your phone using Wi-Fi® technology. This way you can browse the web and access cheaper call and data rates. You can also share media files over the same Wi-Fi® network with other DLNA Certified™ devices, for example, TVs, computers and tablets.

If your company or organisation has a virtual private network (VPN), you can connect to this network with your phone. You can use a VPN to access intranets and other internal services at your company.

Wi-Fi®

Using Wi-Fi® technology you can access the Internet wirelessly with your phone. To access the Internet using a Wi-Fi® connection, you first need to search for and connect to an available Wi-Fi® network. The signal strength of the Wi-Fi® network may differ depending on your phone's location. Moving closer to the Wi-Fi® access point may increase the signal strength.

Before using Wi-Fi®

Your device has Wi-Fi® turned on by default. To browse the Internet using a Wi-Fi® connection, you need to search for and connect to an available Wi-Fi® network and then open the Internet browser. The signal strength of the Wi-Fi® network may differ depending on your phone's location. Move closer to the Wi-Fi® access point to increase the signal strength.

To turn on Wi-Fi®
1 From your Home screen, tap ▦.
2 Find and tap **Settings**.
3 Tap ⊙ beside **Wi-Fi** so that ⊙ changes to ◖. The phone scans for available Wi-Fi® networks.

! It may take a few seconds before Wi-Fi® is enabled.

To turn on AT&T Wi-Fi® auto connect
1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Wi-Fi**.
3 Tap ☰, then tap **Advanced**.
4 Mark the **AT&T Wi-Fi auto connect** checkbox.

! Your device is pre-configured to connect to an AT&T Wi-Fi® hotspot when you are within range.

To connect to a Wi-Fi® network
1 From the Home screen, tap ▦ .
2 Find and tap **Settings**.
3 Make sure that the Wi-Fi® function is on. Tap **Wi-Fi**.
4 Available Wi-Fi® networks are displayed. The available networks may be open or secured. Open networks are indicated by 📶 and secured networks are indicated by 📶 next to the Wi-Fi® network name.
5 Tap a Wi-Fi® network to connect to it. If you are trying to connect to a secure Wi-Fi® network, you are asked to enter a password. 📶 is displayed in the status bar once you are connected.

! Your phone remembers Wi-Fi® networks you connect to. The next time you come within reach of a previously connected Wi-Fi® network, your phone automatically connects to it.

💡 In some locations, open Wi-Fi® networks require you to log in to a web page before you can get access to the network. Contact the relevant Wi-Fi® network administrator for more information.

To connect to another Wi-Fi® network

1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **Wi-Fi**. Detected Wi-Fi® networks are displayed.
3 Tap another Wi-Fi® network to connect to it.

To scan for Wi-Fi® networks manually

1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **Wi-Fi**.
3 Tap **Scan**. The phone scans for Wi-Fi® networks and displays available networks in a list.
4 Tap a Wi-Fi® network in the list to connect to it.

Advanced Wi-Fi® settings

Before you add a Wi-Fi® network manually, you need to turn on the Wi-Fi® setting in your phone.

Wi-Fi® network status

When you are connected to a Wi-Fi® network or when there are Wi-Fi® networks available in your vicinity, it is possible to see the status of these Wi-Fi® networks. You can also enable the phone to notify you whenever an open Wi-Fi® network is detected.

To enable Wi-Fi® network notifications

1 Turn on Wi-Fi®, if it is not already on.
2 From your Home screen, tap ▦ .
3 Find and tap **Settings** > **Wi-Fi**.
4 Press ☰.
5 Tap **Advanced**.
6 Mark the **Network notification** checkbox.

To add a Wi-Fi® network manually

1 From the Home screen, tap ▦ .
2 Find and tap **Settings** > **Wi-Fi**.
3 Tap **Add network**.
4 Enter the **Network SSID** for the network.
5 Tap the **Security** field to select a security type.
6 If required, enter a password.
7 Tap **Save**.

❗ Contact your Wi-Fi® network administrator to get the Network SSID name and password.

To view detailed information about a connected Wi-Fi® network

1 From the Home screen, tap ▦ .
2 Find and tap **Settings** > **Wi-Fi**.
3 Tap the Wi-Fi® network that you are currently connected to. Detailed network information is displayed.

Wi-Fi® sleep policy

By adding a Wi-Fi® sleep policy, you can specify when to switch from Wi-Fi to mobile data.

❗ If you are not connected to a Wi-Fi® network, the phone uses mobile data connection to access the Internet (if you have set up and enabled a mobile data connection in your phone).

1 From the Home screen, tap ⌗ .
2 Find and tap **Settings** > **Wi-Fi**.
3 Press ≣.
4 Tap **Advanced**.
5 Tap **Keep Wi-Fi on during sleep**.
6 Select an option.

Sharing your phone's mobile data connection

You can share your phone's mobile data connection with a single computer using a USB cable. This process is called USB tethering. You can also share your phone's data connection by turning your phone into a portable Wi-Fi® hotspot. At a given time, a maximum of eight hot spot clients can connect to the portable Wi-Fi hotspot.

You must have a tethering data plan to be able to use this feature. Contact AT&T for more information.

When your phone is sharing its data connection, the following icons may appear in the status bar or in the Notification panel:

ψ	USB tethering is active
🛜	Portable Wi-Fi® hotspot is active
◉	Both USB tethering and portable hotspot are active

To share your phone's data connection using a USB cable
1 Deactivate all USB cable connections to your phone.
2 Using the USB cable that came with your phone, connect your phone to a computer.
3 From your Home screen, tap ⌗ .
4 Find and tap **Settings** > **More…** > **Tethering & portable hotspot**.
5 Mark the **USB tethering** checkbox. The phone starts sharing its mobile network data connection with the computer over the USB connection. An ongoing notification appears in the status bar and the Notification panel.
6 Unmark the **USB tethering** checkbox, or disconnect the USB cable to stop sharing your data connection.

You cannot share your phone's data connection and SD card over a USB cable at the same time. For more information, see *Connecting your phone to a computer* on page 112.

You may need to prepare your computer to establish a network connection via USB cable. Go to android.com/tether to get the most current information.

To share your phone's data connection as a portable Wi-Fi® hotspot
1 From the Home screen, tap ⌗ .
2 Find and tap **Settings** > **More…** > **Tethering & portable hotspot**.
3 Tap **Portable Wi-Fi hotspot settings** > **Configure Wi-Fi hotspot**.
4 Enter the **Network SSID** for the network. Tap the **Security** field to select a security type.
5 If required, enter a password.
6 Tap **Save**.
7 Mark the **Portable Wi-Fi hotspot** checkbox. The phone starts broadcasting its Wi-Fi® network name (SSID).
8 Unmark the **Portable Wi-Fi hotspot** checkbox when you want to stop sharing your data connection via Wi-Fi®.

To rename or secure your portable hotspot

1 From the Home screen, tap ▦ .
2 Find and tap **Settings** > **More…** > **Tethering & portable hotspot**.
3 Make sure the **Portable Wi-Fi hotspot** checkbox is marked.
4 Tap **Portable Wi-Fi hotspot settings** > **Configure Wi-Fi hotspot**.
5 Enter the **Network SSID** for the network.
6 Tap the **Security** field and select a security type.
7 If required, enter a password.
8 Tap **Save**.

Virtual private networks (VPNs)

Use your phone to connect to virtual private networks (VPNs), which allow you to access resources inside a secured local network from outside the actual network. For example, VPN connections are commonly used by corporations and educational institutions for users who need to access intranets and other internal services when they are outside of the internal network, for example, when they are travelling.

VPN connections can be set up in many ways, depending on the network. Some networks may require you to transfer and install a security certificate in your phone. See *Connecting your phone to a computer* on page 112 for more information on how to transfer content to your phone. For detailed information on how to set up a connection to your virtual private network, please contact the network administrator of your company or organisation.

To add a virtual private network

1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **More…** > **VPN**.
3 Tap **Add VPN network**.
4 Select the type of VPN to add.
5 Enter your VPN settings.
6 Tap **Save**.

To connect to a virtual private network

1 From your Home screen, tap ▦ .
2 Find and tap **Settings** > **More…** > **VPN**.
3 In the list of available networks, tap the VPN that you want to connect to.
4 Enter the required information.
5 Tap **Connect**.

To disconnect from a virtual private network

1 Drag the status bar downwards.
2 Tap the notification for the VPN connection to turn it off.

Web browser

Use your web browser to view and navigate web pages, add pages as bookmarks, and save pages for offline viewing. You can open up to 16 windows at the same time and switch among them easily. You can also request the desktop version of a web page if you don't want to view the mobile version.

To open the web browser
1   From your Home screen, tap ▦.
2   Find and tap 🌐.

Browsing the web

Search and address bar

Use the search and address bar to browse the web.

1   View the download progress of the current web page

2   Enter a search word to search for a web page, or enter a web page address to load a web page

3   Cancel the download of the current web page

💡 Sometimes the search and address bar is not displayed after a web page finishes downloading. It appears again if you flick downwards on the screen.

To go to a web page
1   Tap the search and address text field to activate the keypad.
2   Enter a web address.
3   Tap Go.

To search a web page
1   Tap the search and address text field to activate the keypad.
2   Enter a search word.
3   Tap Go.

To exit the web browser
•   While browsing, press ⌂.

💡 When you open the browser again, even after restarting the phone, the browser appears exactly as it did before you exited. For example, the same number of windows will be open.

Navigating web pages

To select a link
•   To select a link in a web page, tap the link. The selected link gets highlighted, and the web page starts to load after you release your finger.

💡 If you select a link by mistake before releasing your finger, you can drag your finger away from the link to deselect it.

To go to the previous page while browsing
•   Press ↩.

To zoom in or out on a web page

Use one of the following methods to zoom in or out on a web page:

- Double-tap to zoom in on the web page, or double-tap again to zoom out.
- Touch an area of the page with two fingers at once and spread them apart to zoom in, or pinch them together to zoom out.

To reload the current web page

- Press ≡, then tap **Refresh**.

To save a web page for offline viewing

1 After the web page has loaded, press ≡.
2 Tap **Save for offline reading**. You are then directed to the **Saved pages** tab, where you can view all saved web pages.

To view a previously saved web page

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ▤ next to the search and address bar.
3 Tap ★, then tap the **Saved pages** tab.
4 Find and select a web page that you want to view.

To load the live version of an offline web page

1 When an offline web page is open, press ≡.
2 Tap **Go live**.

To request the desktop version of a web page

1 While browsing the web page, press ≡.
2 Tap **Request desktop site**.

> **!** Once you choose to view the desktop version of a web page in a window, any other web pages that you view later in the same window will also show their desktop versions. Tap **Request desktop site** again to change the setting back.

To share a link to the current web page

1 While browsing, press ≡.
2 Tap **Share page**.
3 Select an available transfer method, then follow the on-screen instructions.

To close a browser window

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ▤ next to the search and address bar. A list of all open windows appears.
3 Tap ✕ in the window you want to close, or flick the window left or right off the screen to close it.

Managing bookmarks

Bookmarks let you access your favourite and frequently visited web pages quickly. You can add bookmarks directly from your phone browser. You can also synchronise your phone browser with Google Chrome™ bookmarks that you have synchronised to your Google account using a computer. See *To synchronise the web browser data with Google™ Chrome™* on page 65. Some bookmarks may be pre-installed on your phone.

To bookmark a web page

1 While you are viewing the web page, press ☰.
2 Tap **Save to bookmarks**.
3 If desired, edit the bookmark.
4 When you're done, tap **OK**.

To open a bookmark

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ☰ next to the search and address bar, then tap ★. The names of any accounts that you have synchronised with Google Chrome™ are displayed. Bookmarks that you have saved directly on the phone are listed under the **Local** account.
3 To show an account's bookmarks, tap the account. All bookmarks in the account are displayed.
4 To open a bookmark, tap it.

To edit a bookmark

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ☰ next to the search and address bar, then tap ★.
3 Touch and hold a bookmark.
4 In the menu that appears, tap **Edit bookmark**.
5 Edit the bookmark as desired.
6 When you're done, tap **OK**.

To add a bookmarked web page to your Home screen

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ☰ next to the search and address bar, then tap ★.
3 Tap and hold a bookmark that you want to add to your Home screen.
4 In the menu that appears, tap **Add shortcut to home**.

To delete a bookmark

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ☰ next to the search and address bar, then tap ★.
3 Touch and hold a bookmark.
4 In the menu that appears, tap **Delete bookmark** to delete the selected bookmark.

To bookmark a previously visited web page

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ☰ next to the search and address bar, then tap ★.
3 Tap the **History** tab, then tap one of the down arrows to view a list of previously visited web pages.
4 Tap ★ beside the web page that you want to add as a bookmark.
5 If desired, edit more detailed information such as the name and location of the bookmark.
6 When you're done, tap **OK**.

Managing text and images

To find text within a web page

1 When you are viewing a web page, press ≡.
2 Tap **Find on page**.
3 Enter your search text. Characters that match your search get highlighted on the web page.
4 Tap the up or down arrows to go to the previous or next highlighted item.
5 Tap ✓ to close the search bar.

To copy text from a web page

1 Touch and hold part of the text you want to copy until it becomes highlighted. Tabs appear at each end of the selection. Drag the tabs accordingly to select all the text that you want to copy.
2 Tap ⧉.
3 To paste text into an email, text message or multimedia message, touch and hold the text field in the relevant application and tap **Paste** in the menu that appears.

! If the text that you want to copy is part of a link to another web page, a menu appears in which you need to tap **Select text** before you can continue.

To save an image from a web page

1 On the active web page, touch and hold the desired image until a menu appears.
2 Tap **Save image**.

Multiple windows

Your browser can run up to 16 different windows at the same time. You can, for example, log in to your webmail in one window and read the daily news in another. You can easily switch from one window to another. If you want to browse the web with more privacy, you can use the incognito tab to open a window that saves no personal information or cookies while you're connected through it.

To open a new browser window

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ▤ next to the search and address bar, then tap ╋.

To open an incognito window

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ▤ next to the search and address bar.
3 Press ≡, then tap **New incognito tab**.

To open a link in a new browser window

1 Touch and hold a link until a menu appears.
2 Tap **Open in new tab**.

To switch between browser windows

1 When the browser is open, flick downwards on the screen to make the search and address bar appear.
2 Tap ▤ next to the search and address bar.
3 Scroll up and down to browse a list of all open windows.
4 Tap the window that you want to switch to.

Downloading from the web

You can download applications and content when you browse the web using the web browser in your phone. Usually you have to touch a download link for the desired file and the download then starts automatically.

To view your downloaded files

1   From your Home screen, tap ▦.
2   Find and tap ▣.

To cancel an ongoing download

1   When your phone starts downloading a file, drag down the status bar and tap the file you are downloading.
2   Mark the checkbox beside the downloading file that you want to cancel.
3   Tap ▤.

Browser settings

You can change the browser settings and customise your browser view. For example, you can change the size of the text displayed to suit your needs, or you can clear cache, cookies, browser history, and other data linked to the websites you visit.

To change your browser settings

1   When the browser is open, press ☰.
2   Tap **Settings**.

To change the text size on web pages

1   When the browser is open, press ☰.
2   Tap **Settings** > **Accessibility**.
3   Adjust the text size settings as desired.

To clear the cache memory from your phone

1   When the browser is open, press ☰.
2   Tap **Settings** > **Privacy & security**.
3   Tap **Clear cache**, then tap **OK** to confirm.

To clear your browser cookies

1   When the browser is open, press ☰.
2   Tap **Settings** > **Privacy & security**.
3   Tap **Clear all cookie data**, then tap **OK** to confirm.

To clear your browser history

1   When the browser is open, press ☰.
2   Tap **Settings** > **Privacy & security**.
3   Tap **Clear history**, then tap **OK** to confirm.

Auto-fitting web pages

Your browser has an auto-fit option which makes it easier to read large web pages with lots of text and images, such as news pages. When this option is enabled, your browser automatically refits images and columns of text on the screen when you double-tap the screen directly after zooming with your fingers. If auto-fit is disabled, you may need to scroll sideways to read a full sentence.

To auto-fit web pages

1   When the browser is open, press ☰.
2   Tap **Settings** > **Advanced** > **Auto-fit pages**.

Auto-filling text

Auto-filling allows you to automatically enter data such as names and addresses on various web forms, so you don't have to enter the same information repeatedly on different web pages.

To create text for auto-filling

1   When the browser is open, press ☰.
2   Tap **Settings** > **General**.
3   Mark the **Form auto-fill** checkbox, if it is not already marked.
4   Tap **Auto-fill text**, then enter text that you want to use for auto-filling on web forms, for example, your name and address.
5   When you're done, tap **Save**.

Plug-in settings

You can adjust how a plug-in functions on a web page. For example, you can enable plug-ins to get optimal visual effect when you view a web page. Alternatively, to increase browsing speed, you can configure your browser to only run plug-ins on demand, or you can disable plug-ins completely.

To enable plug-ins on demand

1   When the browser is open, press ☰.
2   Tap **Settings** > **Advanced** > **Enable plug-ins**.
3   Tap **On demand**.

‐ϙ‐   You may need to restart your browser for the setting to take effect.

Listening to music with Walkman™ player

Get the most out of your Walkman™ player. Listen to and organise music, audio books and podcasts that you have transferred to your memory card from a computer, or purchased and downloaded from online stores.

To make content easily available to the Walkman™ player, you can use the Media Go™ application. Media Go™ helps transfer music content between a computer and a phone. For more information, see *Connecting your phone to a computer* on page 112.

Protecting your hearing

Listening to the Walkman™ player or other media players at excessive volume or for a prolonged period of time can damage your hearing, even when the volume is at a moderate level. To alert you to such risks, a volume level warning appears when the volume is too high, and after the Walkman™ player is used for over 20 hours.

To turn off the volume level warning

- When ⚠ appears, tap **OK** to dismiss the warning.

☀ Every time you restart your phone, the media volume is automatically set to moderate level.

Copying media files to your memory card

Copy all your favourite media content from computer to phone and start using your phone's entertainment features to the full. It's easy to transfer music, photos, videos and other files. Just connect your phone to a computer with a USB cable and use either the computer's file manager application or the Media Go™ application to transfer your files.

See *Connecting your phone to a computer* on page 112 for more general information about connecting your phone to a computer and transfering files.

Using the Walkman™ player

To play audio content

1 From your Home screen, tap ▦, then find and tap ⓦ.
2 Tap **MY MUSIC** to open the music library.
3 Select a music category and browse to the track that you want to open.
4 Tap a track to play it.

Walkman™ player overview
1	Browse the music on your memory card
2	Search all tracks saved on your phone's internal storage
3	Tap the infinite button to find related information online and plug-ins on Google Play™
4	Album art (if available)
5	Go to the next track in the current play queue, or fast forward
6	Total time length of the track
7	Elapsed time of current track
8	Progress indicator – drag the indicator or tap along the line to fast forward or rewind
9	Play/Pause button
10	Go to the previous track in the current play queue, or rewind

To change tracks
- When a track is playing, tap or .
- When a track is playing, swipe the album art left or right.

To pause a track
- In the Walkman™ player, tap .

To fast forward and rewind music
- In the Walkman™ player, touch and hold or .

-ᛟ- You can also drag the progress indicator marker right or left.

To adjust the audio volume
- When the Walkman™ player is playing a track, press the volume key.

To improve the sound quality using the equalizer
1. When the Walkman™ player is open, press .
2. Tap **Sound enhancements**.
3. If you want to adjust the sound manually, drag the frequency band buttons up or down. If you prefer to adjust the sound automatically, tap and select a style.

79

To turn on the Surround sound

1　When the Walkman™ player is open, press ☰.
2　Tap **Sound enhancements** > ▼ > **More** > **Headphone surround**.
3　Select a setting.
4　Tap **OK**.

To view the current play queue

* While a track is playing in the Walkman™ player, tap the album art and then tap 🔘.

To minimise the Walkman™ player

* When the Walkman™ player is playing, press ↰ to go to the previous screen, or press 🏠 to go to the Home screen. The Walkman™ player stays playing in the background.

To return to the Walkman™ player when it is playing in the background

1　While a track is playing in the background, drag the status bar downwards to open the Notification panel.
2　Tap the track title to open the Walkman™ player.

💡　Alternatively, you can press and hold 🏠 and then tap 🟣 to return to the Walkman™ player.

To delete a track

1　Open the Walkman™ player library and browse to the track you want to delete.
2　Touch and hold the track title, then tap **Delete**.

💡　You can also delete albums this way.

To share a track

1　When browsing your tracks in the Walkman™ player library, touch and hold a track title.
2　Tap **Send**.
3　Select an available transfer method, and follow the on-screen instructions.

💡　You can also share albums and playlists this way.

❗　You might not be able to play copyright-protected items. Please verify that you have necessary rights in material that you intend to share.

To recommend a track on Facebook™

1　While the track is playing in the Walkman™ player, tap the album art.
2　Tap 🔄 to show that you "Like" the track on **Facebook™**. If desired, add a comment in the comments field.
3　Tap **Share** to send the track to **Facebook™**. If the track is received successfully, you will get a confirmation message from **Facebook™**.

Visualizer

The Visualizer adds visual effects to your music tracks as you play them. The effects for each track are based on the characteristics of the music. They change, for example, in response to changes in the music's loudness, rhythm and frequency level. You can also change the background theme.

To use the Visualizer

1　In the Walkman™ player, press ☰.
2　Tap **Visualiser** to enable the Visualizer.

💡　Tap ▼ to switch to full screen view.

To change the background theme

1 In the Walkman™ player, press ☰.
2 Tap **Visualiser**.
3 Press ☰ > **Theme** and select a theme.

Discovering related audio content

In the Walkman™ player, you can discover audio content that is related to the artist you are listening to by tapping the infinite button ∞.

You can also search for audio content related to a particular artist while you are browsing the Walkman™ player. The Walkman™ player searches for and lists the following types of results:

- Music videos on YouTube™
- Artist info on Wikipedia™
- Lyrics on Google
- Karaoke videos on YouTube™
- Extension searches on the web
- Content from the PlayNow™ service

To search for related content using the infinite button

- When a track is playing in the Walkman™ player, tap ∞.

Overview of My music
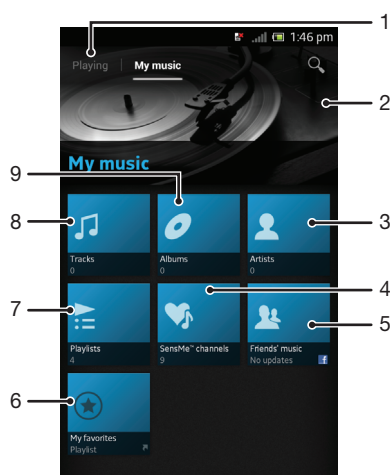

1	Go back to the current track
2	Picture of the currently playing artist (if available)
3	Browse your music by artist
4	Categorise your music using SensMe™ channels
5	Collect links to music and related content that you and friends have shared using online services
6	Browse your favourite playlists
7	Browse all playlists
8	Browse audio by track
9	Browse by album

Using My music to organise your tracks

Tap the My Music tab in the Walkman™ player to get an overview of all the tracks you've saved to your phone's memory card. In My Music you can manage your albums and playlists, create shortcuts, and arrange music by mood and tempo.

81

To add a music track as a shortcut

1 In the Walkman™ player, tap **MY MUSIC**.
2 Tap ⬚, ⬚, ⬚ or ⬚, then browse to the track that you want to save as a shortcut.
3 Touch and hold the track title.
4 Tap **Add as shortcut**. The shortcut now appears in the My music main view.

To rearrange shortcuts

1 In the Walkman™ player, tap **MY MUSIC**.
2 Touch and hold a shortcut until it magnifies and the phone vibrates, then drag the item to a new location.

To delete a shortcut

1 In the Walkman™ player, tap **MY MUSIC**.
2 Touch and hold a shortcut until it magnifies and the phone vibrates, then drag the item to 🗑.

! You can't delete the following tabs: **Tracks**, **Albums**, **Artists**, **Playlists**, **Friends' music** and **SensMe™ channels**.

To update your music with the latest information

1 In the Walkman™ player, tap **MY MUSIC**, then press ☰.
2 Tap **Download music info** > **Start**. Your phone searches online and downloads the latest available album art and track information for your music.

◦   The SensMe™ channels application gets activated when you download music information.

Categorising your music using SensMe™ channels

The SensMe™ channels application helps you arrange your music by mood and tempo. SensMe™ groups all your tracks into several categories, or channels, so you can select music that matches your mood or suits the time of day.

To enable the SensMe™ channels application

1 In the Walkman™ player, tap **MY MUSIC**.
2 Press ☰, then tap **Download music info**.

! This application requires a mobile or Wi-Fi® network connection.

Using the Friends' music application to share music

The Friends' music application collects links to music and music-related content that you and your friends have shared using online services such as Facebook™, YouTube™, Spotify™, last.fm™, izlesene™ and Pandora™. You may need to sign in to the relevant online service before you can use it.

! Some online services may not be available in all countries or regions.

To manage music from your friends

1 In the Walkman™ player, tap **MY MUSIC** > **Friends' music** > **Recent**.
2 Tap an item to open it, then work on it as desired.
3 Tap 👍 to show that you "Like" the track on **Facebook™**. If desired, add a comment in the comments field.

To view your shared music

1 In the Walkman™ player, tap **MY MUSIC** > **Friends' music** > **My shares**.
2 Scroll to an item you want to open, then tap it. All comments about the item, if any, are displayed.

Playing music in random order

You can play tracks in playlists in random order. A playlist can be, for example, a playlist you have created yourself or an album.

To play tracks in random order

1 In the Walkman™ player, tap **MY MUSIC**.
2 Tap ⬡ and navigate to an album, or tap ☰ and browse to a playlist.
3 Open the album or playlist by tapping its name.
4 Tap ⤨ to turn on **Shuffle mode**.

To turn off shuffle mode

1 When tracks are playing in random order, press ☰.
2 Tap **Shuffle mode** > **Shuffle off**.

Playlists

The Walkman™ player automatically creates Smart playlists on the playlist tab ☰ in the Walkman™ player library. You can also create your own playlists from the music that is saved on your phone's memory card.

In addition, you can install the Media Go™ application on a computer and use it to copy playlists from the computer to your phone's memory card. For more information, see *Connecting your phone to a computer* on page 112.

To create your own playlists

1 In the Walkman™ player, tap **MY MUSIC**.
2 To add an artist, album or a track to a playlist, touch and hold the name of the artist or the title of the album or track.
3 In the menu that opens, tap **Add to playlist** > **Create new playlist**.
4 Enter a name for the playlist and tap **OK**.

To add tracks to a playlist

1 When browsing the Walkman™ player library, touch and hold the name of the artist or the title of the album or track you want to add.
2 Tap **Add to playlist**.
3 Tap the name of the playlist to which you want to add the artist, album or track. The artist, album or track is added to the playlist.

To play your own playlists

1 In the Walkman™ player, tap **MY MUSIC**.
2 Tap ☰.
3 Under **Playlists**, tap a playlist.
4 Tap a track to play it.

To remove a track from a playlist

1 In a playlist, touch and hold the title of the track you want to delete.
2 Tap **Delete from playlist**.

To delete a playlist

1 In the Walkman™ player, tap **MY MUSIC**, then select **Playlists**.
2 Touch and hold the playlist you want to delete.
3 Tap **Delete**.
4 Tap **Delete** again to confirm.

❗ You cannot delete default playlists.

Walkman™ player widget

The Walkman™ player widget is a miniature application that gives you direct access to the Walkman™ player from your Home screen. You need to add this widget to your Home screen before you can use it.

To add the Walkman™ player widget to your Home screen

1 From your Home screen, press ☰.
2 Tap ⊕.
3 Find and tap **WALKMAN**.

84

Using the FM radio

The FM radio in your phone works like any FM radio. For example, you can browse and listen to FM radio stations and save them as favourites. You must connect a wired headset or headphones to the phone before you can use the radio. This is because the headset or headphones act as an antenna. After one of these devices is connected, you can then switch the radio sound to the phone speaker, if desired.

When you open the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

To start the FM radio
1 Connect a headset or a set of headphones to your phone.
2 From your Home screen, tap ▦ .
3 Find and tap **FM radio** ▦ . The available channels appear as you scroll through the frequency band.

When you start the FM radio, available channels appear automatically. If a channel has RDS information, it appears a few seconds after you start listening to the channel.

FM radio overview
1	Tuned frequency
2	A saved favourite channel
3	Tuning dial
4	Move down the frequency band to search for a channel
5	Move down the frequency band to the next favourite channel
6	Move up the frequency band to the next favourite channel
7	Save or remove a channel as a favourite
8	Move up the frequency band to search for a channel
9	Radio on/off button

To move between radio channels
• Flick your finger left or right along the frequency band.
• Drag the tuning dial right or left.

Using your favourite radio channels

You can save the radio channels you most frequently listen to as favourites. By using favourites you can quickly return to a radio channel.

To save a channel as a favourite

1 When the radio is open, navigate to the channel that you want to save as a favourite.
2 Tap ⭐, then select ╬.
3 Enter a name for the channel, then press **Save**.

To remove a channel as a favourite

1 When the radio is open, tap ⭐.
2 Tap ✎ next to the channel that you want to remove.
3 Tap **Delete**.

To move between favourite channels

• When the radio is open, tap ◄ or ►.

❗ To move between favourites, you must first save at least two channels as favourites.

Making a new search for radio channels

If you have moved to a new location or the reception has improved in your current location, you can start a new scan for radio channels.

❗ Any favourites you have saved are not affected by a new scan.

To start a new search for radio channels

1 When the radio is open, press ☰.
2 Tap **Search for channels**. The radio scans the whole frequency band, and all available channels are displayed.

Switching the radio sound between devices

You can listen to the radio through a wired headset or through wired headphones. Once either device is connected, you can switch the sound to the phone speaker, if desired.

To switch the radio sound to the phone speaker

1 When the radio is open, press ☰.
2 Tap **Play in speaker**.

💡 To switch the sound back to the wired headset or headphones, press ☰ and tap **Play in headphones**.

Switching between mono and stereo sound mode

You can listen to your FM radio in either mono or stereo mode. In some situations, switching to mono mode can reduce noise and improve sound quality.

To switch between mono and stereo sound mode

1 When the radio is open, press ☰.
2 Tap **Enable stereo sound**.
3 To listen to the radio in mono sound mode again, press ☰ and tap **Force mono sound**.

Sharing the details of music you like on Facebook™

When you listen to music using the FM Radio, you can share details of tracks you like on **Facebook**. You need to be a **Facebook** user and must be logged in to **Facebook**.

To share details of music you like on Facebook™

1   When the FM radio is playing a music track that you want to share, find and tap .
2   Add a comment in the comment field, if desired.
3   Tap **Share** to send details of the track to **Facebook**.
4   Tap **Cancel** to return to the **FM radio** application.
5   Once you have posted a track to your **Facebook** account, a confirmation message appears on the FM radio screen.

! will not appear on the FM radio screen if you are not logged in to **Facebook**.

87

Taking photos and recording videos

Your phone camera is equipped with the highly sensitive Exmor R™ sensor, which helps you capture sharp photos and videos even in low lighting conditions. With your phone camera, you can take regular 2D photos or you can shoot 3D photos in 3D Sweep Panorama mode. Send your photos and videos to friends as multimedia messages, or upload them to a web service. Your phone also has a front camera, which is useful for self-portraits.

Camera controls overview
1	Camera key – Activate the camera/Take photos/Record videos
2	Switch between still and video camera
3	Display all settings
4	Take photos or record video clips
5	Go back a step or exit the camera
6	View photos and videos
7	Camera setting icons
8	Front camera
9	Zoom in or out
10	Main camera screen

To open the camera

- When the screen is active, press and hold down the camera key.

To close the camera

- Press ⤺ from the main camera screen.

Using the still camera

There are three ways to take photos with the still camera. You can press the camera key, tap the on-screen camera button, or touch a spot on the screen.

To take a photo using the camera key

1 Activate the camera.
2 If the still camera is not selected, drag ● to 📷.
3 Press the camera key halfway down to activate auto-focus.
4 When the focus frame or frames are green, press the camera key fully down.

88

To take a photo by touching the screen

1 Activate the camera.
2 If the still camera is not selected, drag ● to ⬚.
3 To display all settings, press ☰.
4 Tap **Capturing method** and select **Touch capture** if it is not already selected.
5 Point the camera towards the subject.
6 To activate auto focus, touch and hold a spot on the screen. When the focus frame turns green, lift your finger to take the photo.

! Be careful not to touch ⬚, ⬚ or other icons when touching the screen to take a photo.

To take a photo by tapping the on-screen button

1 Activate the camera.
2 If the still camera is not selected, drag ● to ⬚.
3 To display all settings, press ☰.
4 Tap **Capturing method** and select **On-screen button** if it is not already selected.
5 Point the camera towards the subject.
6 Tap the on-screen button ⬚. The photo is taken as soon as you release your finger.

To take a self-portrait using the front camera

1 Activate the camera.
2 If the still camera is not selected, drag ● to ⬚.
3 Tap the icon on the top left of the screen, then select **Front camera**.
4 To display all settings, press ☰.
5 To take the photo, press the camera key. The photo is taken as soon as you release your finger.

To use the zoom function

• When the camera is open, press the volume key up or down to zoom in or out.

To use the still camera flash

1 When the camera is open, press ☰.
2 Tap **Flash**, and select your desired flash setting.
3 Take the photo.

To view your photos and videos

1 Open the camera, then tap a thumbnail at the bottom of the screen to open a photo or video.
2 Flick left or right to view your photos and videos. Videos are identified by ⊳.

-ᕮ- In step 1, you can also flick the thumbnails from right to left and then select the one you want to view.

To delete a photo

1 Open the photo you want to delete.
2 Tap 🗑.

Face detection

You can use face detection to bring an off-centre face into focus. The camera automatically detects up to five faces, indicated by white frames. A yellow frame shows which face has been selected for focus. Focus is set to the face closest to the camera. You can also tap one of the frames to select which face should be in focus.

89

To turn on face detection

1 Activate the camera.
2 If the still camera is not selected, drag ● to 🔲.
3 Tap the icon on the top left, then select **Normal**.
4 To display all settings, press ☰.
5 Tap **Focus mode** > **Face detection**.

To take a photo using face detection

1 When the camera is open and **Face detection** turned on, point the camera at your subject. Up to five faces can be detected, and each detected face is framed.
2 Press the camera key halfway down. A green frame shows which face is in focus.
3 To take the photo, press the camera key fully down.

Smile detection

Smile detection allows you to capture a face just as it smiles. The camera detects up to five faces and selects one face for smile detection and auto focus. A green frame shows which face is selected. When the selected face smiles, the camera automatically takes a photo.

To turn on smile detection

1 Activate the camera.
2 If the still camera is not selected, drag ● to 🔲.
3 To display all settings, press ☰.
4 Tap **Smile detection** and select a smile level.

To take a photo using smile detection

1 When the camera is open and **Smile detection** is turned on, point the camera at your subject. Each detected face is framed in the viewfinder (not more than five faces).
2 The camera selects which face to focus on.
3 The face selected appears inside a green frame and the photo is taken automatically.
4 If no smile is detected, press the camera key to take the photo manually.

Adding the geographical position to your photos

Turn on geotagging to add the approximate geographical location (a geotag) to photos when you take them. The geographical location is determined either by wireless networks (mobile or Wi-Fi® networks) or GPS technology.

When 🍃 appears on the camera screen, geotagging is turned on but the geographical position has not been found. When 🔍 appears, geotagging is turned on and the geographical location is available, so your photo can get geotagged. When neither of these two symbols appears, geotagging is turned off.

To turn on geotagging

1 Activate the camera.
2 If the still camera is not selected, drag ● to 🔲.
3 Press ☰, then tap **Geotagging** > **On**.
4 Tap **OK** to agree to enable GPS and/or wireless networks.
5 Check the options you want to select under **Location services**.
6 After you confirm your settings, press ↩ to return to the camera screen.
7 If 🔍 appears on the camera screen, your location is available and your photo can get geotagged. If not, check your GPS and/or wireless network connection.

Using still camera settings

To adjust the still camera settings

1 Activate the camera.
2 If the still camera is not selected, drag ● to ▣.
3 Tap one of the settings icons on the left of the screen.
4 To display all settings, press ☰.
5 Select the setting you want to adjust, then edit as desired.

To customise the still camera settings panel

1 When the camera is open, press ☰ to display all settings.
2 Touch and hold the setting you want to move and drag it to the desired position.

-👁- If you drag the setting outside of the settings panel, the change is cancelled.

Still camera settings overview

Scene recognition
The camera determines which scene is most suitable. A scene icon and text appears when a scene is selected.

Normal

Front camera
Select the front camera if you want to take self-portrait photos.

3D Sweep Panorama
3D Sweep Panorama™ let you to take wide-angle, panoramic photos of any scene in 3D. Just press the camera key and move the camera steadily from one side to the other.

Sweep Panorama
Use this setting to take wide-angle, panoramic photos. Just press the camera key and move the camera steadily from one side to the other.

Focus mode

The focus function controls which part of a photo should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so the area within the white focus frame stays sharp.

Single auto focus
The camera automatically focuses on the selected subject. Continuous autofocus is on. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release you finger.

Multi auto focus
The focus is automatically set on several areas of the image. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release you finger. Continuous autofocus is off.

Face detection
The camera automatically detects up to five human faces, indicated by frames on the camera screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release you finger. Face detection cannot be used for all scene types. Continuous autofocus is on.

Infinity
Use when taking photos from a distance. Focus is set on subjects far away. Subjects close to the camera may be blurred. Continuous autofocus is off.

Touch focus
Touch a specific area on the camera screen to set the area of focus. Continuous autofocus is off. Touch and hold the camera screen, the white focus frame turns green when the focus is set. The photo is taken when you release you finger.

❗ This setting is only available in **Normal** capturing mode.

91

Exposure value

Determine the amount of light in the photo you want to take. A higher value indicates an increased amount of light.

! This setting is only available in **Normal** capturing mode.

Metering

This function automatically determines a well-balanced exposure by measuring the amount of light striking the image you want to capture.

Centre
Adjust the exposure to the centre of the image.

Average
Calculate the exposure based on the amount of light striking the whole image.

Spot
Adjust the exposure in a very small part of image you want to capture.

! This setting is only available in **Normal** capturing mode.

White balance

The white balance setting adjusts the colour balance according to the lighting conditions.

Auto
Adjust the colour balance automatically to the lighting conditions.

Incandescent
Adjusts the colour balance for warm lighting conditions, such as under light bulbs.

Fluorescent
Adjust the colour balance for fluorescent lighting.

Daylight
Adjust the colour balance for sunny outdoor conditions.

Cloudy
Adjust the colour balance for a cloudy sky.

! This setting is only available in **Normal** capturing mode.

Image stabiliser

When taking a photo, it can be difficult to hold the phone steady. The stabiliser helps you by compensating for small movements of the hand.

On
The image stabiliser is turned on. Captured images take longer to save when this function is on.

Off
Take a photo with the stabiliser turned off.

! This setting is only available in **Normal** capturing mode and **Front camera** capturing mode.

Scenes

Use the Scenes feature to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible photo.

Off
The Scenes feature is off and photos can be taken manually.

Portrait
Use for portrait photos. Settings are optimised to give slightly softer skin tones.

Landscape
Use for landscape photos. The camera focuses on distant objects. When **Landscape** is selected, focus mode is changed to **Infinity**.

Night scene
Use when taking photos at night or in poorly lit environments (without the flash). Due to long exposure time, the camera must be held still or placed on a stable surface. When **Night scene** is selected, focus mode is changed to **Infinity**.

Night portrait
Use for portrait photos at night or in poorly lit environments (with or without the flash). Due to long exposure time, the camera must be held still or placed on a stable surface.

Beach and snow
Use in bright environments to avoid underexposed photos.

Sports
Use for photos of fast-moving objects. Short exposure time minimises motion blurring.

Party
Use for indoor photos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Due to long exposure time, the camera must be held still or placed on a stable surface.

Document
Use for photos of text or drawings. Gives the photo increased, sharper contrast.

! This setting is only available in **Normal** capturing mode.

ISO

You can reduce image blurring caused by dark conditions or moving subjects by increasing the ISO sensitivity.

Auto
Sets the ISO sensitivity automatically.

100
Sets the ISO sensitivity to 100.

200
Sets the ISO sensitivity to 200.

400
Sets the ISO sensitivity to 400.

800
Sets the ISO sensitivity to 800.

! This setting is only available in **Normal** capturing mode.

Flash

Use the flash to take photos when lighting conditions are poor or when there is a backlight

Auto
The camera automatically determines if the lighting conditions require the use of a flash.

Fill flash
Use this setting when the background is brighter than the subject. This removes unwanted dark shadows.

Off
The flash is turned off. Sometimes photo quality can be better without the flash, even if lighting conditions are poor. Taking a good photo without using the flash requires a steady hand. Use the self-timer to avoid blurred photos.

Red-eye reduction
Reduces the red colour of eyes when taking a photo.

Resolution

Choose between several picture sizes and aspect ratios before taking a photo. A photo with a higher resolution requires more memory.

12 MP 4:3
12 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays or print in high resolution.

9 MP 16:9
9 megapixel picture size with 16:9 aspect ratio. A high resolution widescreen format. Has a higher resolution than full HD. Suitable for photos you want to view on widescreen displays.

2MP 4:3
2 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays.

2MP 16:9
2 megapixel picture size with 16:9 aspect ratio. Suitable for photos you want to view on widescreen displays.

Self-timer

With the self-timer you can take a photo without holding the phone. Use this function to take self-portraits, or group photos where everyone can be in the photo. You can also use the self-timer to avoid shaking the camera when taking photos

On (10 s.)
Set a 10-second delay from when you tap the camera screen until the photo is taken.

On (2 s.)
Set a 2-second delay from when you tap the camera screen until the photo is taken.

Off
The photo is taken as soon as you tap the camera screen.

Smile detection

Use the smile detection function to determine what kind of smile the camera reacts to before taking a photo.

Big smile
Only take a photo when a big smile is detected.

Average smile
Take a photo when an average smile is detected.

Small smile
Take a photo when only a slight smile is detected.

Off
Smile detection function is off.

Geotagging

Tag photos with details of where you took them

On
When geotagging is turned on, the approximate geographical location is added to photos when you take them. To use geotagging, you must enable location features from the **Settings** menu.
See *Using location services to find your position* on page 115.

For geotags to be added to a photo, the location must be determined before you take the photo. Your location is determined when ⚲ appears on the camera screen. When the phone is searching for your position, ⚲ appears.

Off
When geotagging is turned off, you cannot view the location where you took a photo

Shutter sound

Choose to have or not to have the sound when capturing a photo.

Capturing method

Select the method you use to take photos.

On-screen button
Take a photo by tapping the on-screen button on the camera screen. The photo is taken as soon as you release your finger.

Touch capture
Identify a particular focus area by touching the camera screen with your finger. The photo is taken as soon as you release your finger. This applies only when focus mode is set to touch focus.

Camera key only
Take a photo only using the hardware camera key. The photo is taken as soon as you release your finger.

Quick launch

Quick launch settings let you activate the camera from sleep mode by pressing and holding down the camera key.

Launch and capture
By pressing and holding down the camera key, the first photo is captured immediately after the camera is launched from sleep mode.

Launch only
By pressing and holding down the camera key, the camera is launched from sleep mode.

Off
While the phone is in sleep mode, the camera cannot be launched, even when you press and hold down the camera key.

Tips on using the camera

Rule of thirds
Don't place your subject in the middle of the frame. By placing it a third of the way in, you achieve a better result.

Hold it steady
Avoid blurry photos by holding the camera steady. Try to steady your hand by leaning it against a solid object.

Get closer
By getting as close as possible to your subject, you can fill the camera screen view with your subject.

Consider variety
Think about different angles, and move towards the subject. Take some vertical photos. Try different positions.

Use a plain background
A plain background helps highlight your subject.

Keep your lens clean
Mobile phones are used in all kinds of weather and places, and carried in pockets and bags. This results in the camera lens becoming dirty and covered with fingerprints. Use a soft cloth to clean the lens.

Using the video camera

To record a video using the camera key

1   Activate the camera.
2   If the video camera is not selected, drag ● to ▦.
3   To start recording a video, press the camera key.
4   To stop recording, press the camera key again.

Shoot your videos in landscape orientation to get the best results.

To record a video by tapping the screen

1 Activate the camera.
2 If the video camera is not selected, drag ⬤ to ▦.
3 To display all settings, press ☰.
4 Tap **Capturing method** > **Touch capture** if it is not already selected.
5 Tap the camera screen to start recording.
6 Tap the camera screen to stop recording.

⚝ Shoot your videos in landscape orientation to get the best results.

To record a video by tapping the on-screen button

1 Activate the camera.
2 If the video camera is not selected, drag ⬤ to ▦.
3 To display all settings, press ☰.
4 Tap **Capturing method**, then select **On-screen button** if it is not already
   selected.
5 Point the camera towards the subject.
6 Tap ⦿ to start recording.
7 Tap ⦿ to stop recording.

⚝ Shoot your videos in landscape orientation to get the best results.

To play recorded videos

1 Activate the camera.
2 If the video camera is not selected, drag ⬤ to ▦.
3 Tap the thumbnails on the bottom of the screen.
4 Flick left or right to browse all photo and video files. Videos are identified by
   ▶.
5 Tap ▶ to play a video.
6 To stop playing the video, tap ⏸ or ↩.

⚝ You can also flick the thumbnails from right to left to find the file that you want to play.

To delete a recorded video

1 Browse to the video that you want to delete.
2 Tap 🗑.

Using video camera settings

To adjust video camera settings

1 Activate the camera.
2 If the video camera is not selected, drag ⬤ to ▦.
3 Tap one of the settings icons on the left of the screen.
4 To display all settings, press ☰.
5 Select the setting you want to adjust, then make your changes.

To customise the video camera settings panel

1 When the video camera is open, press ☰ to display all settings.
2 Touch and hold the setting you want to move and drag it to the desired
   position.

⚝ If you drag the setting outside of the settings panel, the change is cancelled.

Video camera settings overview

Scenes

The Scenes feature helps you to quickly set up the camera for common situations using pre-programmed scenes. The camera determines a number of settings for you to fit the selected scene, ensuring the best possible video.

Off
The Scenes feature is off and you can shoot videos manually.

Portrait
Use for portrait videos. Settings are optimised to give slightly softer skin tones.

Landscape
Use for videos of landscapes. The camera focuses on distant objects. When **Landscape** is selected, focus mode is changed to **Infinity**.

Night
When turned on, light sensitivity is increased. Use in poorly lit environments. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support. Turn off night mode when lighting conditions are good, to improve the video quality.

Beach and snow
Use in bright environments to avoid underexposed videos.

Sports
Use for videos of fast-moving objects. Short exposure time minimises motion blurring.

Party
Use for indoor videos in poorly lit environments. This scene picks up indoor background lighting or candlelight. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support.

Photo light

Use the light to record videos when lighting conditions are poor or when there is a backlight.

On

Off
Sometimes the video quality can be better without a light, even if lighting conditions are poor.

Capturing method

Select the method you use to record a video.

On-screen button
Record a video by using the on-screen button on the camera screen..

Touch capture
Identify a particular focus area by touching the camera screen with your finger.

Camera key only
Record a video by using only the hardware camera key..

Focus mode

The focus setting controls which part of a video should be sharp. When continuous autofocus is on, the camera keeps adjusting focus so that the area within the white focus frame stays sharp.

Single auto focus
The camera automatically focuses on the selected subject. Continuous autofocus is on.

Face detection
The camera automatically detects up to five human faces, indicated by frames on the screen. The camera automatically focuses on the nearest face. You can also select which face to focus on by tapping it on the screen. When you tap the camera screen, a green frame shows which face is selected and in focus. Face detection cannot be used for all scene types. Continuous autofocus is on.

Infinity
Use when recording videos from a distance. Focus is set on subjects far away. Subjects close to the camera may be blurred.

97

Video size

Adjust the video size for different formats.

Full HD
Full HD (Full High Definition) format with 16:9 aspect ratio. 1920×1080 pixels.

HD 720p
HD (High Definition) format with 16:9 aspect ratio. 1280×720 pixels.

VGA
VGA format with 4:3 aspect ratio. 640x480 pixels.

Multimedia message
Record videos suitable for sending in multimedia messages. The recording time of this video format is limited to fit in a multimedia message.

Self-timer

With the self-timer you can record a video without holding the phone. Use it to record group videos where everyone can be in the video. You can also use the self-timer to avoid shaking the camera when recording videos.

On (10 s.)
Set a 10-second delay from when you tap the camera screen until the video begins to record.

On (2 s.)
Set a 2-second delay from when you tap the camera screen until the video begins to record.

Off
The video begins to record as soon as you tap the camera screen.

Exposure value

This setting allows you to determine the amount of light in the image you capture. A higher value indicates an increased amount of light.

White balance

The white balance setting adjusts the colour balance according to the lighting conditions.

Auto
Adjust the colour balance automatically to the lighting conditions.

Incandescent
Adjusts the colour balance for warm lighting conditions, such as under light bulbs.

Fluorescent
Adjust the colour balance for fluorescent lighting.

Daylight
Adjust the colour balance for sunny outdoor conditions.

Cloudy
Adjust the colour balance for a cloudy sky.

Image stabiliser

When recording a video, it can be difficult to hold the phone steady. The stabiliser helps you by compensating for small movements of the hand.

On
You can record a video with the stabiliser turned on.

Off
You can record a video with the stabiliser turned off.

Microphone

Select whether to pick up the surrounding sound when recording videos.

On

	Off

Shutter sound

Choose to turn on or turn off the sound when you record a video.

Viewing photos and videos in Album

Use Album to view photos and play videos that you've taken with your phone camera, or to view similar content that you've downloaded or copied to the memory card. You can add geotags to your photos and videos, and then view them on a world map. In Album, you can also view photos and videos that you've uploaded to an online service, for example, to a Picasa™ web album or to Facebook™.
From Album, you can also share your favorite photos and videos with friends via using Bluetooth™ wireless technology, email, messaging and various online services. And you can perform basic editing tasks on photos and set them as wallpaper or contact pictures. For more information, see *Connecting your phone to a computer* on page 112.

Album tab overview

The following tabs are available in Album:
- **Pictures** – view all photos and videos saved to the memory card.
- **Maps** – view your geotagged photos and video clips on a world map.
- **Online** – view your online albums.

To open Album
1 From your Home screen, tap ⚏.
2 Find and tap **Album**.

💡 If the screen orientation does not change automatically when you turn the phone sideways, mark the **Auto-rotate screen** checkbox under **Settings** > **Display**.

Viewing photos and videos saved in the phone

In the grid view of the **Pictures** tab in Album, you can view the thumbnails of photos and videos. You can also go to the list view of all albums and find content in each folder.

Overview of Pictures tab

1	Grid view of photos and videos.
2	Total number of photos and videos.
3	The date and number of items in the group below.

4	Tap a photo or video to view it.
5	Scroll up or down to view content.
6	Switch to a list view of all folders containing pictures and videos saved on your phone.
7	List view of all folders containing pictures and videos saved on your phone.
8	Tap to return to grid view in the **Pictures** tab.
9	The number of the folders containing pictures and videos.
10	Folder containing all pictures taken with your phone camera.
11	Folder containing all videos taken with your phone camera.
12	All other folders containing pictures and/or videos that you've downloaded or copied to your phone.

To view photos and videos in grid view

1 From your Home screen, tap ▦.
2 Find and tap **Album**. All photos and videos are displayed in a chronologically ordered grid. Videos are indicated by ▶.
3 Tap a photo or video to view it.
4 Flick left to view the next photo or video. Flick right to view the previous photo or video.

-ᗧ- If the screen orientation does not change automatically when you turn the phone sideways, mark the **Auto-rotate screen** checkbox under **Settings** > **Display**.

To view photos and videos in list view

1 From your Home screen, tap ▦.
2 Find and tap **Album** > **Pictures**.
3 Tap ▣. Folders containing photos and videos shot using the phone camera are displayed at the top. All other folders containing pictures and videos saved on your phone are displayed in an alphabetical list.
4 Tap a folder you want to open. The folder's content appears in a chronologically ordered grid. Videos are indicated by ▶.
5 Tap a photo or video to view it.
6 Flick left to view the next photo or video. Flick right to view the previous photo or video.

-ᗧ- If the screen orientation does not change automatically when you turn the phone sideways, mark the **Auto-rotate screen** checkbox under **Settings** > **Display**.

To change the size of the thumbnails in Album

• When viewing thumbnails of photos and videos in Album, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

To work with batches of photos or videos in Album

1 When viewing thumbnails of photos and videos in Album, press ☰ and tap **Select items** to activate selection mode.
2 Tap the items you want to work with. Selected items are indicated by a blue frame.
3 Use the tools in the toolbar at the top of the screen to work with your selected items.

-ᗧ- To activate selection mode, you can also touch and hold an item until its frame turns blue. Then you can tap other items to select them.

Working with photos in Album

You can edit photos in Album. For example, you can crop photos, associate them with contacts, or use them as wallpaper.

101

To zoom a photo

- When you are viewing a photo, double-tap the screen to zoom in. Double-tap again to zoom out.
- When you are viewing a photo, spread two fingers apart to zoom in, or pinch two fingers together to zoom out.

To watch a slideshow of your photos

1 When you are viewing a photo, press ☰ and tap **Slide show** to start playing all the photos in an album.
2 Tap a photo to end the slideshow.

To rotate a photo

1 When you are viewing a photo, press ☰.
2 Select **Rotate left** or **Rotate right**. The photo is saved in the new orientation.

To crop a photo

1 When you are viewing a photo, press ☰, then tap **Crop**.
2 To adjust the crop frame, touch and hold the edge of the crop frame. When the squares at the edges disappear, drag inward or outward to resize the frame.
3 To resize all sides of the crop frame at the same time, touch and hold one of the four corners to make the squares at the edges disappear, then drag the corner accordingly.
4 To move the crop frame to another area of the photo, touch and hold inside the frame, then drag it to the desired position.
5 To save a copy of the photo as you cropped it, tap **Crop**. The original uncropped version remains on your phone's memory card.

To use a photo as a contact picture

1 When you are viewing a photo, press ☰, then tap **Use as** > **Contact picture**.
2 Select the contact you want to associate with the photo.
3 Crop the photo, if required.
4 Tap **Crop**.

To use a photo as wallpaper

1 When you are viewing a photo, press ☰, then tap **Use as** > **Wallpaper**.
2 Crop the photo, if required.
3 Tap **Crop**.

To edit a photo

- When you are viewing a photo, press ☰, then tap **Edit photo**.

To share a photo

1 When you are viewing a photo, tap the screen to display the toolbars, then tap ⌣.
2 In the menu that opens, tap the application that you want to use to share the photo, then follow the steps to send it.

To add a geotag to a photo

1 When you are viewing a photo, tap the screen to display the toolbars, then tap 🖼 to open the map screen.
2 Find and tap the desired location to put the photo on the map.
3 To adjust the location of the photo, tap the location on the map to where you want to move the photo.
4 When you are finished, tap **OK** to save the geotag and return to the photo viewer.

💡 When a photo is geotagged, 🖼 appears along with location information. You can tap this icon to view the photo on a map.

To delete a photo

1 When you are viewing a photo, tap the screen to display the toolbars, then tap 🗑️.
2 Tap **OK**.

Working with videos in Album

Use Album to watch videos that you've taken with the camera, downloaded, or copied to your memory card. You can also share your videos with friends, or upload them to YouTube™.

To play a video

1 Open the **Pictures** tab in Album.
2 Using grid view or list view, locate the video that you want to open.
3 Tap the video to play it.
4 If the playback controls are not displayed, tap the screen to display them. To hide the controls, tap the screen again.

To pause a video

1 When a video is playing, tap the screen to display the controls.
2 Tap ⏸️.

To fast forward and rewind a video

1 When a video is playing, tap the screen to display the controls.
2 Drag the progress bar marker left to rewind, or right to fast forward.

To adjust the volume of a video

• Press the volume key.

To share a video

1 When a video is playing, press ≡, then tap **Share**.
2 In the menu that opens, tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

❗ You might not be able to copy, send or transfer copyright-protected items. Also, some items may not send if the file size is too large.

To delete a video

1 In Album, find the video you want to delete.
2 Touch and hold the video to activate selection mode. The frame of the video thumbnail turns blue when it is selected.
3 Tap 🗑️, then tap **OK**.

Viewing your photos on a map

If you enable location detection when taking photos, you can use the information gathered at a later stage. For example, you can view your photos on a map and show friends and family where you were when you took the photo. Adding location information is also referred to as geotagging. When you enable location detection, you can select to use either GPS satellites or wireless networks, or both, to find your position.

For more information, see *Using location services to find your position* on page 115.

Overview of Maps tab

1	The number of geotagged photos and videos.
2	Double tap to zoom in. Pinch to zoom out. Drag to view different parts of the map.
3	A group of photos and/or videos geotagged with the same location.
4	Thumbnails of the selected group of photos and/or videos. Tap an item to view it in full screen.
5	Search a location on the map.
6	Switch to globe view.

To enable location detection

1   From your Home screen, tap .
2   Find and tap **Settings** > **Location services**.
3   Mark the **GPS satellites** and/or **Google's location service** checkboxes.

To view geotagged photos on a map in Album

1   From your Home screen, tap .
2   Find and tap **Album** > **Maps**.
3   Tap a photo to view it in full screen.
4   If several photos were taken at the same location, only one of them appears on the map. The total number of photos appears in the top right corner, for example, . To view these photos, tap the cover photo and then tap one of the thumbnails at the bottom of the screen.

When viewing a geotagged photo in the photo viewer, you can touch the screen to display the toolbars, then tap to view the photo on the map.

To add a geotag when viewing the map in Album

1   When viewing the map in Album, press , then tap **Add geotag**.
2   Find and tap the photo to which you want to add the geotag.
3   Tap the desired location on the map to set the geotag, then tap **OK**.

To edit the geotag of a photo in Album

1   When viewing a photo on the map in Album, touch and hold the photo until its frame turns blue.
2   Drag the photo to the new location.

You can also tap the desired location on the map instead of dragging.

To change the map view in Album

- When viewing the map in Album, press ☰, then select **Classic view** or **Satellite view**.

Viewing your online albums

In Album, you can view the photos and videos you've uploaded to online services, such as Picasa™ and Facebook™. View comments from your friends and add your own comments as well. You can also recommend or "Like" a photo when you view your albums in Facebook™.

Overview of Online tab

1	Number of available online albums.
2	Active online service.
3	Name of an online album.
4	Number of items in the online album.

To view photos from online services in Album

1. Make sure you are signed in to the relevant online service, for example, Facebook™.
2. From your Home screen, tap ▦.
3. Find and tap **Album** > **Online**. All your available online albums are displayed.
4. Tap any album to view its contents, then tap a photo in the album.
5. In the photo viewer, flick left to view the next photo or video. Flick right to view the previous photo or video.

To view and add comments to online album content

1. When viewing a photo from an online album, tap the screen to display the toolbars, then tap ▤ to view the comments.
2. To view more comments, scroll down the screen.
3. To add your own comments, enter your comments at the bottom of the screen, then tap **Post**.

To recommend a photo or video on Facebook™

- While viewing a photo or video from one of your Facebook™ albums, tap the screen to display the toolbars, then tap 👍 to show that you "Like" the item on Facebook™.

Playing video clips in Movies

Use the Movies application to play movies that you've copied or downloaded to your phone. Movies also helps you get poster art, plot summaries, genre info and director details for each movie. You can share your favourite movies with friends, for example, via Bluetooth™ wireless technology or via online services. You can also play your movies on other devices that are connected to the same network.

! Video clips taken with your phone camera are displayed in Album, not in Movies. For more information, see *Viewing photos and videos in Album* on page 100.

To play video clips in Movies
1 From your Home screen, tap ▦.
2 Find and tap **Movies**. All movies are displayed in a grid.
3 Tap the movie you want to select, then tap ▶ to play it.
4 To display or hide the controls, tap the screen.
5 To pause the movie, tap ▮▮.
6 To rewind the movie, drag the progress bar marker left. To fast forward the movie, drag the progress bar marker right.

To play a movie in full screen
1 When a movie is playing, tap the screen to display the controls.
2 Tap ▨.

-☀- To play the movie in its original size, tap ▨.

To share a movie
1 When a movie is playing, press ☰, then tap **Share**.
2 In the menu that opens, tap the application that you want to use to share the selected video, then follow the relevant steps to send it.

To get movie information manually
1 From your Home screen, tap ▦.
2 Find and tap **Movies**. All movies are displayed in a grid.
3 Press ☰, then make sure that the **Online mode** checkbox is marked and that your phone has a data connection.
4 Touch and hold the movie for which you want to get information, then tap **Search for info** in the list that appears.
5 In the search field, enter keywords for the movie, then tap ▶. All matches are displayed in a list.
6 Tap the result you want, then tap **Done**. The download of the information begins.
7 When the download is finished, tap the movie to view its information. If the information is not correct, tap ▨ and search again.

! Data transmission charges may apply.

To clear the information for a movie
1 From your Home screen, tap ▦.
2 Find and tap **Movies**. All movies are displayed in a grid.
3 Touch and hold the desired movie, then tap **Clear info** from the list that appears.

Sharing content with DLNA Certified™ devices

You can view or play media content saved in your phone on other devices such as, for example, a TV, a PlayStation®3, a computer, or a tablet. Such devices must be DLNA Certified™ by the Digital Living Network Alliance and must be connected to the same Wi-Fi® network as your phone in order for content to be shared. You can also view or play content from other DLNA Certified™ devices on your phone.

After you set up the sharing of content between devices, you can, for example, print files from your phone on a printer, listen to music files stored on your home computer from your phone, or view photos taken with your phone camera on a large-screen TV.

Playing files from DLNA Certified™ devices on your phone

When you play files from another DLNA Certified™ device on your phone, this other device acts as a server. In other words, it shares content over a network. The server device must have its content sharing function enabled and must be connected to the same Wi-Fi network as your phone. All server devices connected to the Wi-Fi network are displayed in the **Server list** on your phone.

To play a shared media file on your phone

1 Make sure the devices that you want to share files with are connected to the same Wi-Fi® network as your phone.
2 From your Home screen, tap ▦, then find and tap **Connected devices**.
3 Select a connected device under **Server list**.
4 Browse the folders of the connected device and select the media file that you want to open. The file starts playing automatically.

Preparing to play phone content on DLNA Certified™ devices

Before you can view or play media files from your phone on other DLNA Certified™ devices, you must set up file sharing on your phone. The devices you share content with are called client devices. For example, a TV, computer or tablet can act as client devices. Your phone works as a media server when it makes content available to client devices. When you set up file sharing on your phone, you must also give access permission to client devices. After you do so, such devices appear as registered devices. Devices that are waiting for access permission are listed as pending devices.

To set up file sharing with other DLNA Certified™ devices

1 Connect your phone to a Wi-Fi® network.
2 From your Home screen, tap ▦, then find and tap **Connected devices**.
3 Press ☰, then tap **Media server**.
4 Tap **Change server name** and edit your phone name, if desired. This name will later appear on other client devices connected to the Wi-Fi network to identify your phone.
5 To turn on the **Share content** function, drag the slider. ▤ appears in the status bar. Your phone can now work as a media server.
6 Connect your computer or other devices to the same Wi-Fi® network as your phone.
7 A notification appears in the status bar of the phone. Open the notification and set the relevant access permissions for other devices.

! The instructions described above may differ depending on the client devices used. Refer to your client device User guide for more information. If the device cannot connect, check that your Wi-Fi network is working.

☀ If you close the **Connected devices** view, the Media server function stays running in the background.

To stop sharing files with other DLNA Certified™ devices

1 From your Home screen, tap ⊞, then find and tap **Connected devices**.
2 Press ≡, then tap **Media server**.
3 Drag the slider to turn off the **Share content** function.

To set access permissions for a pending device

1 From your Home screen, tap ⊞, then find and tap **Connected devices**.
2 Press ≡, then tap **Media server**.
3 Select a device from the **Pending devices** list.
4 Select an access permission level.

To change the name of a registered device

1 From your Home screen, tap ⊞, then find and tap **Connected devices**.
2 Press ≡, then tap **Media server**.
3 Select a device from the **Registered devices** list, then select **Change name**.
4 Enter a new name for the device.

To change the access level of a registered device

1 From your Home screen, tap ⊞, then find and tap **Connected devices**.
2 Press ≡, then tap **Media server**.
3 Select a device from the **Registered devices** list.
4 Tap **Change access level** and select an option.

To get help about sharing content with other DLNA Certified™ devices

1 From your Home screen, tap ⊞, then find and tap **Connected devices**.
2 Tap ⍰.

Playing phone content on other DLNA Certified™ devices

To view photos or videos from your phone on another device

1 Make sure that you have correctly set up file sharing with other DLNA Certified™ devices and that all relevant devices are connected to the same Wi-Fi® network.
2 From your Home screen, tap ⊞.
3 Find and tap **Album**.
4 Touch and hold any photo or video until a toolbar appears.
5 Tap the item or items that you want to view, then tap ⤶ > ⬆.
6 Select a device. The selected files start playing in chronological order on the device that you select.

You can also share a video from the Movies application on your phone by tapping the video and then tapping ⬆.

To play a music track from your phone on another device

1 Make sure that you have correctly set up file sharing with other DLNA Certified™ devices and that all relevant devices are connected to the same Wi-Fi® network.
2 From your Home screen, tap ⊞, then find and tap ⬤.
3 Tap **MY MUSIC** to open the music library.
4 Select a music category and browse to the track that you want to share, then tap the track.
5 Press ≡, then tap **Play on device**.
6 Select a device. The track plays automatically on the device that you select.

Bluetooth™ wireless technology

Use the Bluetooth™ function to send files to other Bluetooth™ compatible devices, or to connect to handsfree accessories. Turn on the Bluetooth™ function in your phone and create wireless connections to other Bluetooth™ compatible devices such as computers, handsfree accessories, and phones. Bluetooth™ connections work better within a 10 meter (33 foot) range, with no solid objects in between. In some cases you have to manually pair your phone with other Bluetooth™ devices. Remember to set your phone to "discoverable" if you want other Bluetooth™ devices to detect it.

! Interoperability and compatibility among Bluetooth™ devices can vary.

To turn on the Bluetooth™ function and make your phone visible

1 From your Home screen, tap ▦.
2 Find and tap **Settings**.
3 Tap the on-off switch beside **Bluetooth** to turn on the Bluetooth™ function.
4 Tap **Bluetooth**. Your phone and a list of available Bluetooth™ devices appear.
5 Tap your phone name to make your phone visible to other Bluetooth™ devices.

To adjust your phone's visibility time to other Bluetooth™ devices

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Bluetooth**.
3 Press ☰ and select **Visibility timeout**.
4 Select an option.

Naming your phone

You can give your phone a name. This name is shown to other devices after you have turned on the Bluetooth™ function and your phone is set to visible.

To give your phone a name

1 Make sure that the Bluetooth™ function is turned on.
2 From your Home screen, tap ▦.
3 Find and tap **Settings** > **Bluetooth**.
4 Press ☰ and select **Rename phone**.
5 Enter a name for your phone.
6 Tap **Rename**.

Pairing with another Bluetooth™ device

When you pair your phone with another device, you can, for example, connect your phone to a Bluetooth™ handsfree or a Bluetooth™ car kit and use these devices to make and receive calls.

Once you have paired your phone with a Bluetooth™ device the phone will remember this pairing. When pairing the phone with a Bluetooth™ device, you may need to enter a passcode. Your phone will automatically try the generic passcode 0000. If this does not work, refer to your Bluetooth™ device documentation for the device passcode. You do not need to re-enter the passcode the next time you connect to a paired Bluetooth™ device.

Some Bluetooth™ devices, for example, most Bluetooth™ headsets, require you to both pair and connect with the other device.

You can pair your phone with several Bluetooth™ devices, but you can only connect to one Bluetooth™ profile at the same time.

To pair your phone with another Bluetooth™ device

1 Make sure that the device you want to pair your phone with has the Bluetooth™ function activated and is visible to other Bluetooth™ devices.
2 From the Home screen, tap ▦.
3 Find and tap **Settings** > **Bluetooth**. All available Bluetooth™ devices appear in a list.
4 Tap the Bluetooth™ device that you want to pair with your phone.
5 Enter a passcode, if required. The phone and the Bluetooth™ device are now paired.

To connect your phone to another Bluetooth™ device

1 If you are connecting to a Bluetooth device that requires you to first pair your phone before connecting, follow the relevant steps to pair your phone with that device.
2 From your Home screen, tap ▦.
3 Find and tap **Settings** > **Bluetooth**.
4 Tap the Bluetooth™ device to which you want to connect your phone.

To unpair a Bluetooth™ device

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Bluetooth**.
3 Under **Paired devices**, tap ▤ beside the name of the device that you want to unpair.
4 Tap **Unpair**.

Sending and receiving items using Bluetooth™ technology

Share items with other Bluetooth™ compatible devices such as phones or computers. You can send and receive several kinds of items using the Bluetooth™ function, such as:

- Photos and videos
- Music and other audio files
- Contacts
- Web pages

To send items using Bluetooth™

1 **Receiving device:** Make sure the Bluetooth™ device that you want to send the item to has Bluetooth™ turned on and is visible to other Bluetooth™ devices.
2 In the sending device, open the application which contains the item you want to send and scroll to the item.
3 Depending on the application and the item you want to send, you may need to, for example, touch and hold the item, open the item or press ☰. Other ways to send an item may exist.
4 Select a share or send menu item.
5 In the menu that appears, select **Bluetooth**.
6 Turn on Bluetooth™, if you are asked to do so.
7 Tap the name of the receiving device.
8 **Receiving device:** If asked, accept the connection.
9 If asked, enter the same passcode on both devices, or confirm the suggested passcode.
10 **Receiving device:** Accept the incoming item.

To receive items using Bluetooth™

1 Make sure that the Bluetooth™ function is on and is visible to other Bluetooth™ devices.
2 The sending device now starts sending data to your phone.
3 If prompted, enter the same passcode on both devices, or confirm the suggested passcode.
4 When you are notified of an incoming file to your phone, drag the status bar downwards and tap the notification to accept the file transfer.
5 Tap **Accept** to start the file transfer.
6 To view the progress of the transfer, drag the status bar downwards.
7 To open a received item, drag the status bar downwards and tap the relevant notification.

To view files you have received using Bluetooth™

1 From your Home screen, tap ⊞.
2 Find and tap **Settings** > **Bluetooth**.
3 Press ≡ and select **Show received files**.

Connecting your phone to a computer

Connect your phone to a computer and start transferring pictures, music and other file types. The easiest ways to connect are using a USB cable or Bluetooth wireless technology.

When you connect your phone to the computer using a USB cable, you are prompted to install the PC Companion application on your computer. PC Companion helps you access additional computer applications to transfer and organise media files, update your phone, synchronise phone content, and more.

! You might not be able to transfer some copyright-protected material between your phone and computer.

Transferring and handling content using a USB cable

Use a USB cable connection between a computer and your phone for easy transfer and management of your files. Once the two devices are connected, you can drag and drop content between them using the computer's file explorer. If you're transferring music, video, pictures or other media files to your phone, it's best to use the Media Go™ application on your computer. Media Go™ converts media files so that you can use them on your phone.

To transfer content between a phone and computer using a USB cable To transfer content between a computer and phone internal storage
1   Using a USB cable, connect your phone to a computer. **Internal storage connected** appears in the status bar.
2   **Computer**: Open Microsoft® Windows® Explorer from the desktop and wait until your phone's memory card appears as an external disk in Microsoft® Windows® Explorer.
3   **Computer**: Drag and drop the desired files between your phone and the computer.

Transferring files using Media transfer mode via Wi-Fi®

You can transfer files between your phone and other MTP compatible devices, such as a computer, using a Wi-Fi® connection. Before connecting, you first need to pair the two devices. If you're transferring music, video, pictures or other media files between your phone and a computer, it's best to use the Media Go™ application on the computer. Media Go™ converts media files so that you can use them on your phone.

☀ In order to use this feature, you need a Wi-Fi® enabled device that supports Media transfer, for example, a computer running Microsoft® Windows Vista® or Windows® 7.

To pair your phone wirelessly with a computer using Media transfer mode
1   Make sure Media transfer mode is enabled on your phone. It is normally enabled by default.
2   Connect your phone to the computer using a USB cable.
3   **Computer**: Once the phone name appears on the screen, click *Network configuration* and follow the instructions to pair the computer.
4   When you are finished pairing, disconnect the USB cable from both devices.

! The above instructions only work if Windows® 7 is installed on your computer and the computer is connected to a Wi-Fi® Access Point via a network cable.

To connect paired devices wirelessly in Media transfer mode

1 Make sure Media transfer mode is enabled on your phone. It is normally enabled by default.
2 From your Home screen, tap ▦.
3 Find and tap **Settings** > **Xperia™** > **Connectivity**.
4 Tap the paired device that you want to connect to under **Trusted devices**.
5 Tap **Connect**.

! Make sure your phone's Wi-Fi® function is turned on.

To disconnect a wirelessly paired device in Media transfer mode

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Xperia™** > **Connectivity**.
3 Tap the paired device that you want to disconnect from under **Trusted devices**.
4 Tap **Disconnect**.

To remove a pairing with another device

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Xperia™** > **Connectivity**.
3 Tap the paired device that you want to remove.
4 Tap **Forget**.

Media Go™

The Media Go™ computer application helps you transfer and manage media content in your phone and computer.

You need one of these operating systems to use the Media Go™ application:

- Microsoft® Windows® 7
- Microsoft® Windows Vista®
- Microsoft® Windows® XP, Service Pack 3 or higher

To transfer content using the Media Go™ application

1 Connect your phone to a computer using a supported USB cable.
2 **Phone**: In the status bar, **SD card connected** appears.
3 **Computer**: The PC Companion application launches automatically. In PC Companion, click *Media Go* to start the Media Go™ application. In some cases, you may have to wait for Media Go™ to install.
4 Using Media Go™, drag and drop files between your computer and phone.

💡 Media Go™ can also be downloaded from *www.sonymobile.com*.

Connecting your phone to a TV set

Connect your phone to a TV set using a HDMI™ (High Definition Multimedia Interface) cable, and start viewing content saved in your phone on a larger screen. When you connect your phone to the TV set, the Gallery application opens. This application helps you to play media files from your phone on TVs and other devices.

To view phone content on a TV using a HDMI cable connection

! You should not open other applications while you are connecting your phone to the TV set with a HDMI™ cable. Otherwise, the Gallery application cannot start automatically.

1   Connect your phone to the TV set using a HDMI™ cable. If the TV set supports CEC (Customer Electronic Control), it turns on automatically and switches to the HDMI™ channel.
2   If the TV set doesn't turn on automatically, turn on the TV manually and switch to the HDMI™ channel, then re-connect the phone to the TV set. ▦ appears in your phone's status bar after a connection is established.
3   The Gallery application starts automatically. Follow the instructions on your phone screen to view your media files on the TV.

☀ You may need to purchase a TypeD HDMI™ cable separately. For best results, use a Sony IM-820 cable.

To view help about using the TV remote control

1   Drag the status bar downwards to open the Notification panel while the HDMI™ cable is connected to both your phone and the TV set.
2   Tap **HDMI connected** to view instructions on how to use the control buttons on your TV's remote control.

☀ You can also press the yellow button on the TV remote control to open the Notification panel.

! Compatible with BRAVIA Sync enabled devices. Limited functionality supported on most HDMI™ enabled TV's.

To disconnect your phone from the TV set

• Disconnect the HDMI™ cable from your phone or the TV set.

Using location services to find your position

Use your phone to find out where you are. There are two methods: GPS and wireless networks. Enable the wireless networks option if you only need your approximate location, and want it fast. If you want a more exact position, and have a clear view of the sky, enable the GPS option. In situations where the wireless network connection is weak, you should enable both options to ensure that your location is found.

! Sony does not warrant the accuracy of any location services including but not limited to navigational services.

To enable GPS

1 From your Home screen, tap ⬛.
2 Tap **Settings** > **Location services**.
3 Mark the **GPS satellites** checkbox.

Using GPS

Your phone has a global positioning system (GPS) receiver that uses satellite signals to calculate your location.

! When you use features that require the GPS receiver to find your location, make sure you have a clear view of the sky.

Getting the best performance

The first time you use the GPS it can take 5 to 10 minutes for your location to be found. To help the search, make sure you have a clear view of the sky. Stand still and don't cover the GPS antenna (the highlighted area in the image). The GPS signals can pass through clouds and plastic, but not through most solid objects such as buildings and mountains. If your location isn't found after a few minutes, move to another location.
Google Maps™

Track your current location, view real-time traffic situations and receive detailed directions to your destination. Before taking trips, you can download and save maps to your memory card to avoid high roaming costs.

! The Google Maps™ application requires the use of an Internet connection. You may incur data connection charges when you connect to the Internet from your phone. Contact your network

operator for more information. The Google Maps™ application may not be available in every market, country or region.

1   From your Home screen, tap ▦.
2   Find and tap **Maps**.

❗ If you want to use Google Maps™, you have to enable one of the location methods available under **Settings** > **Location services**.

•   When you use Google Maps™, press ≡, then tap **Help**.

Viewing your friends' locations with Google Latitude™

Join Google Latitude™ to view your friends' locations on maps and share your location and other information with them.

Using Google Maps™ to get directions

Use the Google Maps™ application to get directions when you travel by foot, public transportation, or car. You can add a shortcut to a destination on your Home screen to get quick directions from wherever you are.

When you view a map, you make an Internet connection, and data is transferred to your phone. So it's a good idea to download and save maps to your phone before you take a trip. This way, you can avoid high roaming costs.

❗ Sony does not warrant the accuracy of any directional services.

Using the Navigation application

Use the Navigation application in your phone to get turn-by-turn instructions on how to get places. The directions are both spoken and displayed on the screen.

❗ The Navigation application may not be available in every market.

1   From your Home screen, tap ▦.
2   Find and tap **Navigation**.

Locking and protecting your phone

IMEI number

Every phone has a unique IMEI (International Mobile Equipment Identity) number. You should keep a copy of this number. If your phone is stolen, your network provider can use your IMEI number to stop the phone from accessing the network in your country.

To view your IMEI number
- Remove the cover to view your IMEI number.

To view your IMEI number in the phone

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **About phone** > **Status**.
3 Scroll to **IMEI** to view the **IMEI** number.

SIM card protection

The SIM card lock only protects your subscription. Your phone will still work with a new SIM card. If the SIM card lock is on, you have to enter a PIN (Personal Identity Number). If you enter your PIN incorrectly more times than the maximum number of attempts allowed, your SIM card will become blocked. You need to enter your PUK (Personal Unblocking Key) and then a new PIN. Your PIN, PIN2 and PUK are supplied by your network operator.

To enable the SIM card PIN lock

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Security** > **Set up SIM card lock** > **Lock SIM card**.
3 Enter the SIM card PIN and tap **OK**.

To change the SIM card PIN

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Security** > **Set up SIM card lock** > **Change SIM PIN**.
3 Enter the old SIM card PIN and tap **OK**.
4 Enter the new SIM card PIN and tap **OK**.
5 Re-type the new SIM card PIN and tap **OK**.

To change the SIM card PIN2

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Call settings** > **Fixed dialling numbers** > **Change PIN2**.
3 Enter the old SIM card PIN2 and tap **OK**.
4 Enter the new SIM card PIN2 and tap **OK**.
5 Confirm the new PIN2 and tap **OK**.

To unblock a locked SIM card

1 When **Enter PUK and new PIN code** appears, enter the PUK code.
2 Enter a new PIN code and tap **OK**.

-💡- If you enter an incorrect PUK code too many times, the SIM card becomes blocked. If this happens, contact AT&T to get a new SIM card.

Setting a screen lock

To set a screen lock

1 From your Home screen, tap ▦ > **Settings** > **Security** > **Screen lock**.
2 Select an option.

-💡- It is very important that you remember your screen unlock pattern, PIN or password. If you forget this information, it may not be possible to restore important data such as contacts and messages. Refer to Sony Customer support for more information.

To create a screen unlock pattern

1 From the Home screen, tap ▦.
2 Find and tap **Settings** > **Security** > **Screen lock** > **Pattern**.
3 Follow the instructions in your phone. You are asked to select a security question that will be used to unlock the phone if you forget your screen unlock pattern.

To unlock the screen using a screen unlock pattern

1 Activate the screen.
2 Draw your screen unlock pattern.

❗ If the unlock pattern you draw on the screen is rejected five times in a row, you can select to either wait 30 seconds and then try again, or to answer the security question you have selected.

To change the screen unlock pattern

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Security** > **Screen lock**.
3 Draw your screen unlock pattern.
4 Tap **Pattern**.
5 Follow the instructions in your phone.

To disable the screen unlock pattern

1 From your Home screen, tap ▦ > **Settings** > **Security** > **Screen lock**.
2 Draw the screen unlock pattern.
3 Tap **Slide**.

To create a screen unlock PIN

1 From your Home screen, tap ▦ > **Settings** > **Security** > **Screen lock** > **PIN**.
2 Enter a numeric PIN.
3 If necessary, tap ↰ to minimise the keyboard.
4 Tap **Continue**.
5 Re-enter and confirm your PIN.
6 If necessary, tap ↰ to minimise the keyboard.
7 Tap **OK**.

To disable the screen unlock PIN

1 From your Home screen, tap ▦ > **Settings** > **Security** > **Screen lock**.
2 Enter your PIN, then tap **Next**.
3 Tap **Slide**.

To create a screen lock password

1 From your Home screen, tap ▦ > **Settings** > **Security** > **Screen lock** >
  Password.
2 Enter a password.
3 If necessary, tap ↰ to minimise the keyboard.
4 Tap **Continue**.
5 Re-enter and confirm your password.
6 If necessary, tap ↰ to minimise the keyboard.
7 Tap **OK**.

To disable the screen unlock password

1 From your Home screen, tap ▦ > **Settings** > **Security** > **Screen lock**.
2 Enter your password and tap **Next**.
3 Tap **Slide**.

Updating your phone

Update your phone to the most recent software version to get optimal performance and the latest enhancements.

You can use the Update center application on your phone to run a wireless update or you can use the PC Companion application on a computer to run an update using a USB cable connection. If you update wirelessly, then you can use either a mobile network or a Wi-Fi® network connection. Just make sure you back up and save all data stored on your phone before you update.

! When you run an update using the Update center application, a data connection is established and related charges may be incurred. Also, the availability of updates over a mobile network depends on your operator. Contact your network operator for more information.

Updating your phone wirelessly

Use the Update center application to update your phone wirelessly. You can download software updates manually, or you can allow Update service to update your phone automatically whenever downloads become available. When the automatic update feature is activated, a notification appears in the status bar every time an update becomes available.

To download software updates manually from Update center

1   From your Home screen, tap ▦.
2   Find and tap **Update Centre**.
3   Select the desired application or system update and tap **Download**, or tap **Update all** to download all application updates.

! Application updates launch automatically after download. With system updates, wait for your phone to restart, then install the update manually. Also, You may incur data connection charges when downloading updates over 3G/mobile networks.

To activate automatic software updates from Update center

1   From your Home screen, tap ▦ .
2   Find and tap **Update Centre**.
3   Press ☰ , then tap **Automatic settings**.
4   Tap **Allow automatic update:** and select whether to download updates via 3G and Wi-Fi® networks, or via Wi-Fi® networks only. Updates are now downloaded automatically as soon as they become available.

! You may incur data connection charges when downloading updates over 3G/mobile networks.

To install system updates

1   From your Home screen, tap ▦.
2   Find and tap **Update Centre**.
3   Select a system update you want to install, then tap **Install**.

Updating your phone using a USB cable connection

Some updates are not available for wireless download. Notifications appear in the status bar to inform you of such updates. To download and run the updates, you need a USB cable and a computer running the PC Companion application. You can install PC Companion on the computer using installation files saved on your phone, or you can download the application directly from *www.sonymobile.com*.

To download the PC Companion application from your phone

1 Connect your phone to a computer using a USB cable.
2 When prompted, follow the instructions in the phone to launch the installation of PC Companion on the computer.

💡 PC Companion can also be downloaded from *www.sonymobile.com*.

To download software updates using a USB cable connection

1 Install the PC Companion application on the computer you are using, if it is not already installed.
2 Connect your phone to the computer using a USB cable.
3 **Computer**: Launch the PC Companion application. After a few moments, PC Companion detects your phone and searches for new phone software.
4 **Phone**: When notifications appear in the status bar, follow the on-screen instructions to carry out the relevant software updates.

To update your phone using an Apple® Mac® computer

1 Install the Bridge for Mac application on the Apple® Mac® computer you are using, if it is not already installed.
2 Using a USB cable, connect your phone to the Apple® Mac® computer.
3 **Computer**: Launch the Bridge for Mac application. After a few moments, Bridge for Mac detects your phone and searches for new phone software.
4 **Computer**: If a new phone software update is detected, a popup window appears. Follow the on-screen instructions to carry out the relevant software updates.

❗ The Bridge for Mac application is downloadable from *www.sonymobile.com*.

Phone settings overview

Get to know the settings in your phone so that you can personalise them to your own requirements.

Wi-Fi	Turn Wi-Fi® on or off, scan available Wi-Fi® networks, or add the Wi-Fi® network.
Bluetooth	Turn Bluetooth™ on or off, search for available Bluetooth™ devices, and make your phone visible or invisible to other Bluetooth™ devices.
Data usage	Turn the mobile data traffic on or off, and keep track of your data usage details over a specified period of time.
More…	Turn Airplane mode on or off, configure settings for VPN and mobile networks, and enable your phone to share its mobile data connection as a portable Wi-Fi® hotspot, or through USB tethering or Bluetooth™ tethering.
Call settings	Manage and configure settings for fixed dialing numbers, voicemail and Internet calls.
Sound	Configure how your phone rings, vibrates, or alerts you when you receive communications. You can also use these settings to set the volume level for music, video, games or other media with audio, and to make related adjustments.
Display	Enable your phone screen to switch orientation when you rotate your phone. You can also set the brightness, font size, wallpaper and screen timeout.
Storage	Check out the available space on your phone's internal storage and on the SD card. You can also erase the SD card, or unmount it for safe removal.
Battery	View your phone battery and see how different applications consume battery power.
Apps	Manage running applications, downloaded applications and applications on the SD card.
Xperia™	Configure the USB connection mode, network connection type and Internet settings. You can also enable Facebook features inside applications.
Accounts & sync	Enable your phone to synchronise data with the synchronisation accounts that you add.
Location services	Enable or disable Google's location service, GPS satellites, and Location & Google search.
Security	Protect your phone by setting up different locks and passwords. You can also allow the installation of applications not from Google Play™.
Language & input	Select the phone language, adjust text input options, add words to the personal dictionary and configure speech settings.
Backup & reset	Back up your data and reset your phone.
Date & time	Set the time and date, or choose the network-provided values. Select your preferred date and hour format.
Accessibility	Enable your installed accessibility services and adjust related settings.

Developer options	Set options for application development. For example, you can show CPU usage on the phone display. You can also set the phone to enter debug mode when USB connections are active.
About phone	View information about your phone, such as the model number, firmware version, phone number and signal. You can also update your software to the latest version.

Status and notification icons overview

Status icons

The following status icons may appear on your screen:

	Signal strength
	No signal
	Roaming
	EDGE is available
	4G is available
	4G LTE is available
	Battery status
	The battery is charging
	GPS is activated
	Airplane mode is activated
	The Bluetooth™ function is activated
	Connected to another Bluetooth™ device
	The SIM card is not inserted
	The microphone is muted
	The speakerphone is on
	Silent mode
	Vibrate mode
	An alarm is set
	Synchronisation is ongoing
	Problem with sign-in or synchronisation
	A Wi-Fi® connection is enabled and wireless networks are available
	USB tethering is activated
	A portable Wi-Fi hotspot is activated
	NFC is activated
	TTY is on
	Wi-Fi Direct is on

Notification icons

The following notification icons may appear on your screen:

	New email message
	New text message or multimedia message

New voicemail	
An upcoming calendar event

# Troubleshooting

My phone is not working as expected

If you experience problems with your phone, check these tips before you try anything else:

- Charge your phone if the battery level gets low.
- Use the power key to restart your phone.
- Try restarting your phone by removing and reinserting the SIM card.
- Force a restart of the phone. Press and hold both the power ⓞ key and the volume up key for five seconds. After the phone vibrates once, release the keys. The phone restarts automatically.
- Reset your phone.

To force the phone to shut down

1 Press and hold down both the volume up key and the power key ⓞ for 10 seconds.
2 After your phone vibrates three times, release the keys. The phone turns off automatically.

To force the phone to restart
1 Press and hold down both the volume up key and the power key ⓞ for five seconds.
2 After your phone vibrates once, release the keys. The phone restarts automatically.

Resetting the phone

You can reset your phone to its original settings. When you perform a factory data reset, you reset the phone to the state it was in before you turned it on for the first time, and all personal data is erased. You can also reset the phone to the original settings without erasing your personal data. Before you perform a reset, make sure to back up any important data saved on your phone.

To reset the phone without erasing personal data

⚠ To avoid permanent phone damage, do not restart the phone while a reset procedure is underway.

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Backup & reset**.
3 Tap **Settings reset** > **Reset phone**.
4 To confirm, tap **Reset settings**.

⚠ To avoid permanent phone damage, do not restart the phone while a reset procedure is underway.

1 From your Home screen, tap ▦.
2 Find and tap **Settings** > **Backup & reset**.
3 Tap **Factory data reset** > **Reset phone**.
4 To confirm, tap **Erase everything**.

No battery charging icon appears when phone starts charging

It may take a few minutes before the battery icon appears on the screen.

The battery performance is low

Follow our smart tips on how to get more out of your battery. See *Improving battery performance* on page 14.

My wired headset does not work

- Make sure the wired headset that you are using complies to the CTIA standard. Your phone supports the CTIA standard, and may not be fully compatible with other standards such as OMTP.
- If you have a wireless headset that is compatible with your phone, try using that instead.

I cannot transfer content between my phone and the computer, when using a USB cable

The software or the USB drivers have not been properly installed. Go to *www.att.com/tutorials* for more detailed installation instructions and troubleshooting information.

Error messages

No network coverage

- Your phone is in Airplane mode. Make sure Airplane mode is turned off.
- Your phone is not receiving any network signal, or the received signal is too weak. Contact AT&T and make sure that the network has coverage where you are.
- The SIM card is not working properly. Insert your SIM card in another phone. If this works, it is probably your phone that is causing the problem. In this case, contact the nearest Sony service center.

Emergency calls only

You are within range of a network, but you are not allowed to use it. However, in an emergency, some network operators allow you to call the international emergency number 112. See *Emergency calls* on page 35 for more information.

SIM card locked

You have entered your PIN incorrectly 3 times in a row. To unlock the phone, you need the PUK provided by your operator.

SIM card is PUK locked

You have entered your PUK (Personal Unblocking Key) incorrectly 10 times in a row. Please contact AT&T.

Hearing Aid Compatibility

Your phone is designed for Hearing Aid Compatibility (HAC) and can be used with hearing aids.

Hearing Aid Settings

You can choose the setting in the phone to match the setting in your hearing aid before making or receiving calls.

To select a phone setting for HAC

1   From the Home screen, tap ▦.
2   Find and tap **Settings** > **Call settings**.
3   Mark the **Hearing aids** checkbox to turn on hearing aid compatibility.

Hearing Aid Compatibility Information

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

Hearing Aid Compatibility Rating

This model handset was designed to comply with the requirements set forth in Section 20.19 of the Federal Communication Commission's (FCC) rules governing hearing aid compatibility (HAC), for the reduction of RF interference to hearing aids. The Microphone (M) rating is defined and labeled on the handset box. Devices meeting HAC compliance must have a minimum M4/T4 rating or above as defined by the FCC in accordance with the latest ANSI Standard C63.19-2007. The (M) rating refers to lower RF emission levels of the handset. Some hearing aids are also provided an (M) rating, and are more immune than others to interference. To determine the (M) rating of your hearing aid, please contact your hearing health professional. More information about digital wireless devices and hearing aid compatibility can be found at *www.sonyericsson-snc.com*.

Recycling your phone

Got an old phone lying around the house? Why not recycle it? By doing so, you will help us reuse its materials and components, and you'll protect the environment, too! Find out more about the recycling options in your region at *www.sonymobile.com*.

Your phone is designed to make it easy for you to access a wide variety of content. For your protection, we want you to be aware that some applications that you enable may involve the location of your phone being shared. For applications available through AT&T, we offer privacy controls that let you decide how an application may use the location of your phone and other phones on your account. However, the AT&T privacy tools do not apply to applications available outside of AT&T. Please review the terms and conditions and the associated privacy policy for each location-based service to learn how location information will be used and protected. In addition, your AT&T phone may be used to access the Internet and to download, and/or purchase goods, applications, and services from AT&T or elsewhere from third parties. AT&T provides tools for you to control access to the Internet and certain Internet content. These controls may not be available for certain devices which bypass AT&T controls.
