

# Wireless Rules

When you're running a business, multi-tasking isn't so much an art as it is a necessity. That's why more small business owners are embracing wireless technologies as a way to cut costs and improve efficiency. In fact, nearly all small businesses rely on some form of wireless technology today.

**Two-thirds** of small businesses claim they couldn't survive – or it would be a major challenge to survive – without them

**More than two-thirds** of small businesses are using tablets

**4 in 10** Small businesses where every employee uses mobile technologies to work away from the office

**70% increase** in small businesses using smartphones operating at 4G speeds over the past year

**31%** Small businesses using mobile apps

**Nearly half** (47%) of small businesses that use mobile apps claim they couldn't survive – or it would be a major challenge to survive – without them.
