

The Leading Internet Connection At Home and On-the-Go

The AT&T family of companies is the nation's No. 1 DSL provider offering customers a leading combination of broadband access, services and content that provides a unique high speed experience. Broadband "to go" services are available to both consumers and businesses — as AT&T companies meet consumers' increasing demand for connectivity while on the road.

Nation's No. 1 DSL Provider 6.5 Million DSL Lines

Through its subsidiaries and affiliates, the new AT&T family of companies is the nation's No. 1 DSL provider with 6.5 million lines in service. DSL from AT&T companies is an award-winning, industry-leading high-speed Internet service, delivering unmatched levels of personalization, customization and interactivity that allow users to get the information they want, when they want it. Customer services and content provide a unique high-speed Internet experience with features such as 11 e-mail accounts, unlimited online photo storage and comprehensive safety and security features. Broadband from AT&T companies is available today throughout most of the traditional 13-state SBC service area. AT&T Worldnet® DSL is available in other states (WITH BROADBAND PROVIDED THROUGH AN AGREEMENT WITH COVAD).

Home Networking Leader Wireless Gateway Advantage

The AT&T family of companies sell thousands of wireless gateways on a daily basis. With a wireless gateway, customers can share one DSL connection with multiple DSL-capable computers or other devices. All users can be online doing different things at the same time and at the same fast speed. To enhance the DSL experience, the gateway offers multiple ways to network your home

or small office using Ethernet, Wireless, and USB connections and comes complete with a business-grade firewall which virtually keeps your network safe from harmful attacks. The Wireless Gateway is available today throughout the traditional 13-state SBC service area.

High-Speed On the Go! Wireless Locations Top 18,000

The Wi-Fi network of the combined SBC AT&T family of companies is one of the nation's largest service is available throughout more than 18,000 hot spots in the United States and 41 additional countries. This network offers broadband service for millions of on-the-go consumers and business people, enabling them to use laptop computers and personal digital assistants to wirelessly connect to the Internet and corporate networks at speeds 50 to 100 times as fast as a dial-up connection. Company hot spots are located in prominent locations, such as hotels, airports, restaurants, state parks, coffee shops and welcome centers.
