San Diego, CA
To support the purchase of four computers for the staff and a Palm Treo phone for the Executive Director to manage the office more efficiently and improve the quality of services to the community.

San Diego Women Film Foundation
San Diego, CA
To support enhancements to the filmmaking workshops for underserved girls, enabling hands-on experience with new editing equipment and new sound and lighting technology.

San Francisco Foundation Community Initiative Funds (as fiscal agent for Mission Dignity)
San Francisco, CA
To support an upgrade to the computers and software for the Youth-led Peer Education & College Resource Center which provides tutoring and access to educational and career building resources for the underserved.

San Francisco Housing Development Corporation
San Francisco, CA
To support an interactive website to expand housing/financial counseling to the underserved through streaming video workshops, credit counseling, and budget analysis. Bi-lingual capabilities will further enhance the communication.

Senior Access
San Rafael, CA
To support an infrastructure upgrade including new computers and a new server to enable hosting the CadCare and FundEz databases and allow shared access to databases for more efficient program and organization management.

Shakespeare Festival LA, Inc.
Los Angeles, CA
To support the purchase of an Apple Mobile Learning Lab to provide underserved youth access to computers and the internet for academic growth, including preparation for college and assistance in applying to college.

Shasta County Arts Council
Redding, CA
To support an infrastructure upgrade of the telephone system and computers to better communicate with artists and members of the community about concerts, workshops and exhibitions and enable better management of the organization.

Sierra Nonprofit Support Center
Sonora, CA
To support enhancing the website to include volunteer matching, which connects volunteers to organizations of interest to them; a calendar of volunteer opportunities; volunteer management tools, including how to manage nonprofits and increase recruitment.

Smartriverside
Riverside, CA
To support the creation of a 'technology incubator' or lab for entrepreneurs in emerging life science ventures and software companies to launch business ideas with assistance from business mentors and business community support.

Steelworkers Old Timers Foundation
Huntington Park, CA
To support a technology infrastructure upgrade to include internet access and file sharing capabilities for the staff, as well as revamp the website to increase fundraising and outreach opportunities to seniors and the underserved.

Sweetwater Education Foundation
Chula Vista, CA
To support a collaboration with Hilltop High School to encourage students to get excited about engineering and technology through their participation in a robotics competition.

Telacu Education Foundation
Los Angeles, CA
To support enhancements to a website currently being developed for TELACU, to address the educational component that includes a scholarship program, tutoring program, resource center, technology center, computer literacy class, and health careers program.

The Aerospace Museum of California Foundation, Inc.
Sacramento, CA
To support the purchase of audio-visual equipment for the main classroom at the museum. Underserved students will receive instruction aimed at inspiring an interest in math, science and aerospace technology.

The Friendship Club
Nevada City, CA
To support the purchase of additional computers and educational software to expand after-school tutoring and summer enrichment programs for underserved girls.

THINK Together
Santa Ana, CA
To support the implementation of an Enterprise Architecture Mapping tool to improve the IT applications structure and avoid duplication and enable seamless business operations, to better serve low-income youth in after-school programs.

Tomas Rivera Policy Institute
Los Angeles, CA
To support the creation of a website that will serve as a resource for the Kids to College program, a supplemental curriculum taught by 6th grade teachers to underserved students, encouraging them to plan ahead and seek higher education.

Toolworks
San Francisco, CA
To support a technology upgrade with the purchase of a new server, computers, and software to manage the programs that assist the disabled with job skills and employment training.

Tri-County Economic Development Corporation
Chico, CA
To support technology training to two staff members on a new financial software system purchased by the organization to better manage the tracking and reporting of funds.

University Heights Community Development Corporation
San Diego, CA
To support the creation of a website and a technical infrastructure upgrade with Microsoft Office and software that will enable an e-newsletter. Training for the staff is included in the proposal.

Western Electrical Contractors Education Foundation
Sacramento, CA
To support the creation of two remote learning centers to provide electrician training in Spanish. Training is necessary to improve the passing rate on the state certification test by Spanish speaking citizens.

Westside Childrens Center Inc
Culver City, CA
To support an infrastructure upgrade, including the Cosmos Universal Relationship Management system, new computers, and software to enhance the center's ability to track clients and services and allow more accurate measurements and reporting.

Womens Intercultural Network Inc
San Francisco, CA
To support the expansion of the website with an upgrade to the email system to serve more clients and provide an electronic meeting place for underserved women.

Womenspace Unlimited South Lake Tahoe Womens Center
South Lake Tahoe, CA
To support an expansion of staff access to the MIP accounting program, with the purchase of an additional licence. Currently, only one staff member may use the program at one time, resulting in less work accomplished and inefficiencies in the process.

Workforce Investment Board of the City of Los Angeles
Los Angelos, CA
To support the Technology Ladders project that provides 50 at-risk youth with training in web and graphic design in preparation for career opportunities.

World Institute on Disability
Oakland, CA
To support the re-design of the website to increase accessibility for the hearing and vision impaired clients, as well as translating key webpages to Spanish for additional accessibility.

YMCA of San Diego County
San Diego, CA
To support Mobile Tech Academy, a computer lab on wheels, which will enable underserved children in the before and after-school programs to have access to computers and the internet for educational purposes.

Youth Policy Institute, Inc.
Los Angeles, CA
To support the purchase of 20 computer systems (computer, monitor, software and internet access) for graduates of the Valley Family Technology Project's computer literacy course for underserved students and their families.

Zeum
San Francisco, CA
To support the development of a digital storage system that will allow youth to access and share the work created at Zeum, including videos, broadcasts and music.

CONNECTICUT

Augusta Curtis Cultural Center Inc.
Meriden, CT
To support an upgrade to the technology infrastructure in the historic building that houses the ACCC and is rented to the community. Wireless internet, laptops, a smartboard, and audio equipment will be added to enhance the capabilities of all users.

CAUSA, Inc. (Connecticut Association for United Spanish Action, Inc.)
Hartford, CT
To support a collaborative effort to upgrade and expand the number of computer labs in underserved communities to increase technology access, provide training and improve technology workforce development.

Centro de la Communidad, Inc.
New London, CT
To support a system that will track and report client and program information for more efficiency and effectiveness. Also, upgrades to computer work stations will enable clients to have reliable access to services for educational and economic success.

Clifford W Beers Guidance Clinic Incorporated
New Haven, CT
To support an upgrade to the technology infrastructure to enhance communication between the main clinic and three satellite offices. This will also enable timely input of services and billing, as well as provide a central location for clinic policies.

Goodwin College Inc.
East Hartford, CT
To support an upgrade and expansion of the computer labs used by the students to fulfill the computer literacy/applications requirement, as well as complete general course work for degree requirements.

Howard Whittemore Memorial Library
Naugatuck, CT
To support an upgrade of the computer hardware and software utilized by patrons of the library. This will support enhanced internet access for educational purposes.

Literacy Volunteers of Central Connecticut, Inc.
New Britain, CT
To support enhancement of web-based technology to improve online access to language literacy programs for the underserved.

New Opportunities, Inc.
Waterbury, CT
To support the creation of a computer lab for clients to learn Microsoft Office products and have access to the internet. The agency serves low-income individuals that are working toward employment and self-sufficiency.

Northwest Connecticut Association for the Arts, Inc. dba Warner Theatre
Torrington, CT
To support the purchase of computers for the staff to manage the increasing number of programs performed, as well as the rising number of patrons that support the theatre.

Quinebaug Valley Community College
Danielson, CT
To support the restructuring of the computer network to allow secure access by staff, students, and faculty. Currently, the platform only allows access from college- owned machines. Project will provide students with enhanced educational opportunities.

Quinnipiac Business and Education Foundation Inc
Wallingford, CT
To support a collaboration with the Joyce C. Budrow Senior Center to provide a computer literacy program for seniors. This knowledge is becoming a requirement in performing daily activities, to include research on medical, financial, and travel issues.

Read to Grow Inc.
Branford, CT
To support an upgrade of the hardware and software at the center for more efficient and accurate inventory management.

Sterling House Community Center
Stratford, CT
To support a technology infrastructure upgrade to improve operations in the center, as well as expand marketing and funding sources for the programs that support the underserved.

The Bridge to Independence and Career Opportunities Company
Danbury, CT
To support the purchase of computer hardware for the expansion of the computer lab used to provide technology training to the underserved. Training promotes self-sufficiency and economic independence.

The Ivoryton Playhouse Foundation, Inc.
Ivoryton, CT
To support the upgrade of computer hardware and software to enable online ticket purchases to attract a larger audience. The proposal also includes purchase of CAD software to allow the theatre to generate designs and blueprints in-house.

Town of Glastonbury (as fiscal agent for Housing Authority of Glastonbury)
Glastonbury, CT
To support the purchase of four computers, virus software, and four chairs for the computer lab in the Welles Village Computer Center. This will give more underserved children access to a computer and the internet to complete homework assignments.

Town of Wolcott
Wolcott, CT
To support a technology infrastructure upgrade, including two networked computers and internet access to improve communication with community organizations.

Union Social Services Corporation Inc
Stamford, CT
To support youth literacy in the Summer Academy Literacy Program for underprivileged students. They will have access to Merit software to learn basic core competencies and improve literacy. Additionally, the senior program will receive a computer.

V.N.A. Health at Home, Inc.
Watertown, CT
To support efficient, expedited medical care for seriously ill patients in home care. The addition of The Physician Portal will allow physicians access to the Misys Homecare system 24 hours a day for review and approval of orders for patient care.

Waterbury Opportunities Industrialization Inc.
Waterbury, CT
To support a collaborative effort to upgrade and expand the computer lab that is utilized by the underserved. Free basic computer skills training and internet access are provided to assist in employment training, job searches, and self-sufficiency.

Westport Historical Society (as fiscal agent for Rowayton Historical Society)
Rowayton, CT
To support a technology infrastructure upgrade including a computer and software to support Past Perfect, a museum-specific database that will enable more efficient management of the collection and members, as well as track dues, donations and volunteers.

FLORIDA

Belafonte Tacolcy Center, Inc.
Miami, FL
To support an upgrade to the computer lab with educational software, faster internet access, and audio-visual hardware. This will enhance programs for underserved minority students who participate in after-school tutoring and SATpreparation classes.

Brevard Achievement Center Inc.
Rockledge, FL
To support an upgrade of all hardware and software for the technology lab that is used to train the disabled clients for employment opportunities and to promote social independence.

Broward Regional Health Planning Council Inc.
Ft. Lauderdale, FL
To support an upgrade of the network to enhance management of Healthy Families Broward. Staff visit the homes of underserved families to promote child health and positivie parenting. Remote access to the network is needed for management of the program.

Child Care Association of Brevard Co. Inc.
Cocoa, FL
To support the creation of a computer lab and provide training of basic computer skills and widely used software to staff of the Agency, as well as to the parents in the program and underserved adults in the community.

Children's Home Society of Florida
Orlando, FL
To support technical training for the staff to increase their efficiency in managing large caseloads, and allow more time for their clients. The Microsoft Office Specialist program is offered online and a certificate is awarded upon successful completion.

Communities In Schools of Okeechobee Inc.
Okeechobee, FL
To support the purchase of new computer hardware and software to enhance the tracking and management of services provided to 3000 underserved students.

Esteem Music Inc.
Lakeland, FL
To support staff training and the creation of a website providing the community with information about music programs/services for the underserved, and create an avenue to solicit volunteers and donations.

Expanding and Preserving our Cultural Heritage, Inc. d/b/a Spady Cultural Heritage, Inc.
Delray Beach, FL
To support a technology upgrade of software and hardware at the Spady Museum to better manage it's collection, membership, and donar records. The museum is preserving and educating the community about the African-American cultural history.

Family Resource Center of South Florida Inc.
Homestead, FL
To support the purchase of eight computers, internet access, and educational software for the nursery school and the emergency shelter. This will provide developmental assistance for the pre-school kids and homework access for the students in the shelter.

Family Support Services of North Florida Inc.
Jacksonville, FL
To support a collaboration with the Florida Community College to assist 17-year-old youth emancipating from foster care receive computer training necessary to complete high school and obtain employment. Foster families also receive hardware and training.

Fort Pierce-St. Lucie County Chamber of Commerce Foundation Inc.
Port St. Lucie, FL
To support a collaborative effort to create three computer labs in underserved communities and to provide internet and software training to enhance educational and economic opportunities. Funds will cover the cost of internet installation.

His House Inc.
Miami Gardens, FL
To support a collaborative effort to enhance the technology infrastructure for students at His House Academy, a school for abused and abandoned children. Funds will provide students with laptops, internet access ,and educational software.

Indian River Community College Foundation, Inc.
Fort Pierce, FL
To support the creation of digital audio and video recordings of lectures and instructional activities by the faculty. Each full-time instructor will receive a web-cam, digital voice recorder, and flash drive to enable them to post all lectures online.

Little Haiti Housing Association, Inc.
Miami, FL
To support staff training of Microsoft Office products, including Access database software. The staff will in turn train the minority families who participate in Home Owner's Club, bringing them a greater understanding of technology.

MaliVai Washington Kids Foundation, Inc.
Jacksonville, FL
To support a technology upgrade for the staff and the after-school student program. Funds will provide a local area network, high-speed internet, software and staff training for more efficient management and increased donor tracking and support

Manatee County Safety Council
Bradenton, FL
To support the creation of a new website with interactive technology that will enhance driver safety and OSHA training classes, as well as incorporate Spanish and Haitian languages into the curriculum.

Mary Brogan Museum of Art and Science Inc.
Tallahassee, FL
To support a technology upgrade, including a new server, laptops and staff training to support SugarCRM software, which will manage client data and enhance administrative tools for business operations.

Meridian Behavioral Healthcare, Inc.
Gainesville, FL
To support technology integration for the mentally disabled by providing two computers with internet access.

Monroe Association For Retarded Citizens, Inc.
Key West, FL
To support an enhanced computer infrastructure and provide training to the staff on basic computer skills, internet searching, and business-related software, including Windows XP, and database management.

Seminole County Victims Rights Coalition, Inc. d/b/a Safehouse of Seminole
Sanford, FL
To support better technology integration into the new facility that serves victims of domestic violence. Funds will support Windows 2003 Business Server, Microsoft Exchange and Microsoft Office for improvement of staff support services.

Shepherds Center of Orange Park Inc.
Orange Park, FL
To support the Communication without Walls program that benefits underserved seniors. Technical hardware including LCD projectors, a digital video camera, photo printer, laptop, and software are needed to provide remote education programs.

Tampa Hillsborough County Drug Abuse Comprehensive Coordinating Office, Inc. (DACCO)
Tampa, FL
To support technology integration into DACCO's three residential facilities by providing computers to the 20 clinicians that staff these facilities. This will allow access to clients files and allow better communication and work efficiency for the staff.

Turkel Resource Foundation Inc.
Miami, FL
To support a collaborative effort to provide a technology infrastructure that will include a computer, printer, desktop software and internet to each family in Town Park Village, a residence for low-income families promoting self sufficiency..

Valencia Community College Foundation Inc.
Orlando, FL
To support the implementation of new technology for the deaf and hearing impaired students that will allow access to college-wide lectures (on several campuses) in back-to-back classes in a central speech-to-text lab.

West Florida Child Care & Education Services, Inc. d/b/a Childrens Services Center
Pensacola, FL
To support improved technology training for child care providers by offering a flexible, web-based curriculum for individuals pursuing Florida's Child Care Provider Credential and those training for the Child Care Food Program.

Women in Distress of Broward County Inc. (WID)
Ft. Lauderdale, FL
To support the creation of an enhanced website that will support WID's outreach to promote social change. It will include a calendar of events, information on prevention and help, and a blog for victims to communicate and seek help.

GEORGIA

Activ Inc.
McDonough, GA
To support updated technology for development of a website and a donor database, and provide internet connectivity and training for staff in order to increase efficiency and improve service delivery for the education of children, parents, and adults.

AID Gwinnett Inc.
Duluth, GA
To support the addition of hardware for five exam rooms and clinic staff, allowing doctors, nurses, and related clinic staff efficient access to confidential patient records. This is part of a project to upgrade the current patient tracking system.

Aid to Children of Imprisoned Mothers, Inc.
Atlanta, GA
To support the addition of upgraded technology to empower children of imprisoned mothers with skills needed to improve academic performance for successful futures, as well as increase staff efficiency for better service delivery.

Atlanta, GA
To support updated technology, installation, and staff training in order to increase efficiency and marketability to better serve the underserved communities and its client businesses, creating opportunities and jobs for minorities.

Southwest Georgia United Empowerment Zone Inc.
Vienna, GA
To support upgraded technology and staff training to increase office efficiency, data sharing/management, improve communications with donors, volunteers, and clients, and provide training for the community to help grow and revitalize high-poverty areas.

Taylor Regional Hospital
Hawkinsville, GA
To support upgraded technology to improve secure communications and information sharing with the sister hospital and enable in-house creation and management of a website that will better inform and update patients and the public.

Tubman African American Museum, Inc.
Macon, GA
To support upgraded technology for enhancing educational programming, targeting at-risk youth and the underserved community, to help them develop an understanding of different races and heritage to increase harmony and tolerance of different cultures.

Women in Need of Gods Shelter Inc
Dublin, GA
To support the addition of upgraded technology to improve internal and external communications, case management, and agency image in order to increase funding support to better serve women and children who are victims of family violence.

ILLINOIS

Administer Justice
East Dundee, IL
To support implementation of a internet-based case management and tracking system to serve low-income clients. External volunteer attorneys and the organization's staff will have access to the case data and can track and report on the status.

Allendale Association Inc.
Lake Villa, IL
To support the purchase of a 'backbone switch' that will enable the network servers to process data at a higher speed, with more stability and eliminate the duplication of patient data input.

American National Red Cross (as fiscal agent for American Red Cross Central Illinois Chapter)
Peoria, IL
To support an enhancement to the chapter website with the creation of five password protected user areas that support donor contributions, disaster alerts, training certification, online education and volunteer coordination.

Association for Retarded Citizens of Rock Island County
Rock Island, IL
To support comprehensive computer training for the entire staff, to include the purchase of three computers and wireless internet service to facilitate the training. Basic and higher level training will be provided internally and externally.

Autism Society of America (as fiscal agent for Autism Society of Illinois)
Lombard, IL
To support the development of an Access database to track membership data and develop fundraising and programming more efficiently and effectively. It is the goal to improve communication with stakeholders and raise awareness in the community.

Beverly Area Planning Association
Chicago, IL
To support the re-design of the historic community website and monthly newspaper to enhance communication about resources available to residents and businesses regarding housing issues, safety concerns and special events.

Big Brothers Big Sisters of McHenry County Inc
McHenry, IL
To support a technology upgrade to replace outdated computers and add software to manage administrative duties more efficiently and enhance data protection and fundraising capabilities.

Big Brothers Big Sisters of Will and Grundy Counties
Crest Hill, IL
To support a technology infrastructure upgrade to replace aging computers and to enable access to software used by the national organization for donor support and to manage the critical process of matching volunteers with their little brothers/sisters.

Black Hawk College Foundation
Moline, IL
To support implementation of an electronic early alert system to identify students not meeting performance expectations. Alerts will be sent by email to staff to intervene. Low college completion rates among minorities and the underserved are the focus.

Board of Trustees of Southern Illinois University
Carbondale, IL
To support a collaborative effort for regional economic and community development initiatives that include a high-bandwidth broadband infrastructure. Goals include building better employment opportunities and retaining the youth in an aging community.

Chicago Chesed Fund Inc
Lincolnwood, IL
To support the purchase of two desk top computers and one laptop to improve management of the food donated, and to better support underserved clients in crisis situations.

Chicago State University Foundation
Chicago, IL
To support implementation of digital media on-demand for students and faculty. Various media platforms will enable higher quality online courses and real-time access for classroom lessons and distance learning.

Childrens Advocacy Center
Hoffman Estates, IL
To support an infrastructure upgrade, including the purchase of a new server to manage a secure network that supports data relating to child abuse victims and their families. Additional software and training for website improvements are also sought.

Coalition of African Asian European and Latino Immigrants of Illinois
Chicago, IL
To support a collaboration to create a more dynamic website that will allow more communication and resource-sharing between the 22 member organizations that serve low-income immigrant coalitions. The online donation process will also be streamlined.

Computer Banc
Springfield, IL
To support the placement of donated and refurbished computers in the homes of underserved families and to target academic areas with software that is in a fun game format.

Discovery Center Museum
Rockford, IL
To support the museum's outreach program to bring educational science programs to the underserved. Purchase of a computer, wireless service, and software are essential for implementation of this project.

DuPage Homeownership Center Inc
Wheaton, IL
To support the creation of a new website that will enable online registration for home buyer education classes, provide access to online forms, and promote the visibility and communication options for potential underserved clients.

Elgin Community College Foundation
Elgin, IL
To support the creation of a mobile learning classroom that will provide an interactive learning experience, cultivate team working skills, and enable access to educational resources outside the classroom.

Elim Christian Services
Palos Heights, IL
To support the purchase of a new Microsoft server to enable increased speed, performance, and reliability in managing and organizing the data and services provided for the disabled in the community.

Faith in Action of McHenry County
Crystal Lake, IL
To support the creation of a website that will increase community awareness of their work with the elderly, as well as provide an opportunity to engage volunteers and donors.

Family Service of Champaign County
Champaign, IL
To support a technology infrastructure upgrade, replacing old computers and installing new software to improve management of the programs for the elderly and gather relevant data. Training for the staff would also be necessary.

Fremont Public Library
Mundelein, IL
To support a collaboration to expand and improve the ESL instruction offered at the library, that serves increasing numbers of Spanish speaking patrons. A new laptop and new software will help keep pace with the increasing number of underserved students.

Great Lakes Adaptive Sports Association
Lake Forest, IL
To support the re-design of the website to enable better communication with the parents, staff and community. Website will be accessible to those with physical disabilities, including limited vision. Project will also streamline data for better tracking.

Lake Bluff Firemans Association Inc.
Lake Bluff, IL
To support the purchase of a color printer and scanner that will be used in conjunction with the fire department's Remote Access, a database that accesses site plans, maps and tactical database information.

Lambs Farm Inc
Libertyville, IL
To support an infrastructure upgrade to include high-speed internet access between the main campus and the vocational work center, that employs disabled adults. A payroll software upgrade and staff training will allow time entry from work center.

LaSalle County CASA Organization
Ottawa, IL
To support the training program for volunteers who act as advocates for neglected or abused children. A new computer, projector, and screen are needed to conduct on-going training.

Lawndale Christian Development Corporation
Chicago, IL
To support a new website with faster internet access to allow greater communication in the online forum and enable the organization's staff to better manage the content and track data. Training is a key component in this proposal.

Lewis University
Romeoville, IL
To support the success of adult students by offering expanded access to academic support services and tutorial services. Six computer kiosks at the main campus and regional campuses will link more students to the support they need to succeed.

Madison County Arts Council
Alton, IL
To support the purchase of three desktop computers, one laptop, a printer and a software upgrade of Microsoft Office products to improve the management of the office, as well as provide enhanced online education programs for the community.

Marcy Newberry Association Inc
Chicago, IL
To support a technology infrastructure upgrade of computers, software, and internet access, as well as provide staff training. Funds will support better management of the social services provided to the minority, low-income community.

Marklund Childrens Home
Geneva, IL
To support the creation of two computer labs, adapted for use by children and adults with developmental disabilities. The labs will provide access to educational software, money management software, email, and the internet.

Misericordia Home
Chicago, IL
To support a technology infrastructure upgrade to include a T-1 connection to provide internet and email to the entire staff (1000 employees) and six computer access stations for the disabled residents. A full-time IT trainer is part of this proposal.

North Shore Senior Center
Northfield, IL
To support an upgrade of the computers and software to manage the center's fundraising and accounting systems. The vendor will no longer provide support for the outdated software used, and the computers lack the capability to run the updated versions.

Parents Alliance Employment Project
Lisle, IL
To support an online outreach to the disabled who are in search of employment, by training and certifying the staff to utilize Illinois workNet for employment and transportation needs. Two laptops will be utilized to promote the program in the community.

Poder Learning Center
Chicago, IL
To support basic and advanced computer skills training to Latino immigrants. Funds will support the purchase of additional computers and personnel to provide training to more students, in an effort to meet the needs of the underserved community.

Provena Hospitals
Danville, IL
To support implementation of the Wireless Medical Telemetry Upgrade project by providing funds for training the clinical staff to quickly and accurately access patients' vital signs during transport. This project will improve patient safety.

Puerto Rican Arts Alliance
Chicago, IL
To support the creation of an interactive website promoting the programs/services of the Alliance, including art and music classes and showcasing Puerto Rican artists. Volunteer opportunities and membership registration will also be added features.

Quincy University Corporation
Quincy, IL
To support the implementation of pod casting lectures and presentations of the faculty, and providing students the opportunity to create their own podcasts. Funds will support the purchase of a server, 6 hard drives, and an operating system.

Regional Access and Mobilization Project Inc.
Rockford, IL
To support the creation of a website to market SoundScapes, a retail outlet for assistive listening devices for people with a hearing loss. Online purchasing and customer tracking software, as well as an upgrade of computers and staff training are needed

Rialto Square Theatre Corporation
JOLIET, IL
To support the purchase of new computers to enable the utilization of Archtics, an in-house ticketing system. Archtics will allow online purchasing convenience and customer tracking for improved marketing efforts and increased funding opportunities.

Robert Crown Center for Health Education
Chicago, IL
To support the implementation of the Audience Response System (ARS) in the outreach health education curriculum for minority students. ARS is wireless keypad technology that creates a fun interactive lesson for the students to learn about nutrition.

Salem Baptist Church of Chicago (as fiscal agent for Salem Christian Academy)
Chicago, IL
To support updating the computer lab that serves the outreach after-school program, with 29 new workstations and related hardware, as well as Microsoft Office and academic software to improve reading, math, and Spanish language skills.

Seguin Service, Inc.
Cicero, IL
To support a computer learning lab for disabled teenagers in the foster care program to access the internet and educational software to improve their social, educational, and economic skills. Job training for adults will also be available in the lab.

Southeast Association for Special Parks and Recreation
Downers Grove, IL
To support the implementation of an online registration system with credit card authorization, to facilitate an easier and more efficient way for disabled participants (and their families) to register for recreation programs.

Southwestern Illinois College Foundation (as fiscal agent for Programs and Services for Older People (PSOP)
Belleville, IL
To support the purchase of the computer monitors and personal digital devices (a/k/a Palm Pilots) for the SeniorLink computer skills classes available to seniors to improve their skills for economic and personal reasons.

Spoon River College Foundation
Canton, IL
To support the purchase of a video/audio presentation system in the Student Center, which hosts events such as the GED Graduation, Annual Multicultural Dinner, and Student Debates. A permanent technical infrastructure will enhance the events.

Turning Point, Inc.
Woodstock, IL
To support the expansion of Turning Point's community outreach training for victims of domestic violence. New computers and software will enable greater access to educational materials by clients and staff. An upgrade of the donor software is requested.

Uhlich Childrens Advantage Network
Chicago, IL
To support an upgrade of the Raisers Edge software to provide more comprehensive and secure online donor management, event registration and management, and
 volunteer registration and management.

United Neighborhood Organization
Chicago, IL
To support the implementation of video teleconferencing and remote computer access for the main office and 6 school campuses to enable more cost effective management. The

schools primarily serve the Hispanic minority in low-income communities.

United States Conference of Catholic Bishops (as fiscal agent for Mercy Home for Boys and Girls)
Chicago, IL
To support the creation and implementation of web-based projects and website features that will expand funding opportunities and increase volunteer recruitment. Funds will support a consultant, data communication services, and application development.

Volunteer Center of Northwest Suburban Chicago
Arlington Heights, IL
To support the funding of scholarships to nonprofit organizations that can be used for free IT assistance from the ITstaff at the Volunteer Center.

West Central Municipal Conference
River Grove, IL
To support a collaboration to upgrade the technology infrastructure of the organization to enable staff to have wireless connectivity in the office, remote access from home, an additional DSL line, and upgrades to anti-virus software.

Western DuPage Special Recreation Association Foundation
Carol Stream, IL
To support an upgrade to the website to enhance accessibilty for the disabled community. Funds will be used to hire an IT professional to resolve issues already identified, including code validity and site navagation and content.

Womens Business Development Center (WBDC)
Chicago, IL
To support the implementation of an online registration system for several WBDC events, along with donor contribution capabilities. Management of the system will be user-friendly for the staff and will increase efficiency in managing the business.

INDIANA

Arts Council of Southwestern Indiana, Inc.
Evansville, IN
To support the purchase of a projector, screen, and sound system to create a state-of-the-art exhibit of various artists work, as well as promote the programs of area nonprofit arts organizations.

Assistive Technology Through Action in Indiana, Inc., d/b/a Attain
Indianapolis, IN
To support the addition of an enhanced web based application to inventory and track assistive technology devices that are available for loan through the Lending Library program. Enhancements will include online access to view available inventory.

Bona Vista Programs, Inc.
Kokomo, IN
To support computer skills training for disabled adults, to enable them to become more independent and to further academic and economic goals.

Brothers Keeper, Inc.
Gary, IN
To support computer training for homeless and indigent men to learn or improve skills necessary to secure employment. Funds will also provide an upgrade of technology hardware and software for the staff.

Challenger Learning Center of Northwest Indiana Inc
Hammond, IN
To support the implementation of the ACTIVassessment wireless voting system to measure the interest and effect of the Center's programs on the students. A voting board will allow students to answer questions electronically immediately after the program.

Childrens Theraplay Foundation Inc
Carmel, IN
To support the purchase of two desktop computers and one laptop for the staff to more efficiently manage the foundation and execute a development plan and marketing campaign for fundraising.

Community Organizations Legal Assistance Project Inc.
Indianapolis, IN
To support the creation of a new interactive website that will allow attorneys and nonprofit organizations to interface about legal issues. Attorneys will have their own forum to share boilerplate forms and volunteerism will be highlighted.

Dads Inc of Indiana
Indianapolis, IN
To support the purchase of four computers, a server, and a projector to enhance the outreach program to new and expecting fathers. Supporting the importance of a father's role in his child's life is the goal of the Dads Inc.

Frankfort Clinton County Contractual Public Library
Frankfort, IN
To support the upgrade of computers and software for library patrons to take computer classes, complete online job applications, and perform internet research.

Girls Incorporated of Shelbyville Shelby County
Shelbyville, IN
To support the implementation of a donor database to the current website. BasicFunder Enterprise will record, track and analyze donor information and enable communication with donors through online pledge reminders. The goal is to increase fundraising.

Grant County Economic Growth Council, Inc.
Marion, IN
To support the creation of a dynamic web portal for the Grant County community to facilitate investment in the community and to help with job creation. The portal will have a forum to address issues in the community with local responses provided quickly.

Habitat for Humanity International Inc (as fiscal agent for Huntington County Habitat for Humanity)
Huntington, IN
To support a new website that will enable donors, volunteers, and visitors to communicate with Habitat as well as help manage events and allow mass mail capability. Request includes computers, projectors, and staff training to improve office efficiency.

Habitat for Humanity International, Inc.
Evansville, IN
To support an upgrade to the Financial Edge 7 software to efficiently integrate with data in the Raiser's Edge 7 software for more efficient management of the data. Funds will also support training for the staff.

Historic Newburgh, Inc.
Newburgh, IN
To support the purchase of a laptop, digital projector, and updated software, including Powerpoint, to create programs for school children and adults about historic Newburgh. Promotion of the town will help gain support for preservation of its history.

Hunters Helping Hunters Inc
Auburn, IN
To support enhancements to the website to include designating areas accessible only through a protected password, and adding software that can produce higher quality photos, a color printer and Peachtree software to track donations and expenses.

Indiana Black Expo, Inc.
Indianapolis, IN
To support an infrastructure upgrade, including a new LAN server, updated software, and personnel for troubleshooting. E-fundraising and e-commerce will be added to the website for greater community support.

Indiana University (as fiscal agent for Trustees of Indiana University)
Bloomington, IN
To support the purchase of 30 laptops with a storage cart that can be transported to any classroom on campus to create a technology classroom. Students will have access to an enhanced learning environment to improve their computer and research skills.

Indianapolis Neighborhood Resource Center Inc (INRC)
Indianapolis, IN
To support the creation of a website that will have web pages for each neighborhood organization, a resource library managed by INRC, a discussion board to promote involvement in the community, and on-demand video to be used as a marketing tool for INRC.

Ivy Tech Foundation, Inc. (as fiscal agent for Ivy Tech Community College, Region 5 'ITCC5')
Indianapolis, IN
To support wireless internet access campus-wide for use by students to perform research, complete class assignments, and access email. It's estimated that 20 wireless access points will be installed for maximum internet connectivity for all students.

Legacy Fund Inc (as fiscal agent for Hamilton County Alliance Inc.)
Carmel, IN
To support the creation of a website that will promote entrepreneurship to high school students and establish a county-wide entrepreneurship club, with meetings hosted online. There will also be links to webinars for education opportunities.

Lincoln Hills Development Corporation
Tell City, IN
To support the implementation of an electronic document scanning, storing, and retrieval system for agency records. Secure, accessible records will provide more efficiency in management of programs for underserved pre-school through senior citizens.

Make a Difference Michiana Inc
South Bend, IN
To support the creation of a social networking site for local businesses, universities, and service clubs that will allow them to recruit volunteers or raise money for specific nonprofit groups that meet philanthropic and volunteer interests.

New Harmony Workingmens Institute
New Harmony, IN
To support the creation of a new interactive website that will support the Institute's library, research facility, and museum. The site will have upgraded search capabilities, a blog, a calendar and volunteer recruitment and fundraising information.

NPower Indiana inc.
Indianapolis, IN
To support the creation of a communication paper to send to nonprofit groups advising them of an enhancement to TechAtlas, called Stable and Secure. This feature will help identify vulnerabilities in the technical infrastructures of organizations.

Patchwork Central, Inc.
Evansville, IN
To support the purchase of a new computer, software, and internet access for the Program Director. She is involved in the day-to-day management of the Arts and Smarts Children's after-school and summer program, for at-risk children.

School on Wheels Corp
Indianapolis, IN
To support the purchase of computers, software, and internet access for homeless children tutored in the program. Children will learn computer skills and will have access to appropriate educational software and the internet for school work.

Seed Corp (f/k/a Bloomington Area Microenterprise Initiative Inc.)
Bloomington, IN
To support an outreach to bring small business counseling and small business loans to clients in rural areas. Two laptops and a projector will be used by two business advisors to provide one-on-one counseling to clients in ten counties.

Starfish Inc d/b/a Starfish Initiative
Indianapolis, IN
To support a technology infrastructure upgrade to include a firewall router, Windows XP and Office Pro software, technology training for the staff and an IT consultant to more efficiently manage the organization.

Success and Opportunity at Reading Inc
Bedford, IN
To support the creation of an interactive website promoting SOAR, an adult literacy program. The website will manage donor support, track volunteer time, and offer online lessons to the underserved.

The Purdue Foundation, Inc. (as fiscal agent for Indiana Council for Economic Education)
West Lafayette, IN
To support the establishment of an e-learning center for educators to receive online economics training to improve training for the students on the subject. Wireless broadband, three webcams, e-learning software and technical training are in the proposal

Visiting Nurse Association of Southwestern Indiana Inc
Evansville, IN
To support the increasing need for patient monitoring devices through VNA's telehealth technology. Funds will pay for staff training on utilizing the telehealth monitoring project, thus providing better patient care.

Washington Carnegie Public Library
Washington, IN
To support the purchase of six computers for the library patrons. Many underserved patrons have no access to computers or the internet at home. The library staff can provide basic instruction, but need additional computers to help the increasing need.

Young Mens Christian Association of Greater Indianapolis
Indianapolis, IN
To support the creation of a computer lab equipped with internet access and software that will support the academic development of the students. Funds will provide six computers, software, and internet service.

Young Womens Christian Association of Gary (YWCA)
Gary, IN
To support the TechGyrls project which is designed to broaden young girls knowledge of careers available in the science and mathematical fields. Girls will build an autobiography using MicroWorld software and then build a robot with RoboLab software.

KANSAS

Baker Arts Foundation
Liberal, KS
To support the addition of a new, modernized telephone system that will allow for better communications between staff members and the entire community which will improve management of operations.

Catholic Charities - Diocese of Salina
Salina, KS
To support the installation of a well-integrated, updated hardware system to allow for better communications between staff and departments in order to deliver more efficient services to the increasing immigrant population.

Challenger Learning Center of Kansas Foundation Inc.
Wellington, KS
To support the addition of hardware and software for the Earth and Space Lab, providing middle and high school students with programs that foster an interest in math, science, engineering, and technology in a fun mission-simulator environment.

Congressional Home dba Brewster Place
Topeka, KS
To support an interactive, web-based program for the purpose of increasing, training, and retaining volunteers to better serve its senior citizens at Brewster Place, a retirement community.

East Wichita Shepherds Center
Wichita, KS
To support the addition of updated hardware in order to attract quality volunteer presenters from business and universities to enhance the Adventures in Learning program available to seniors throughout the year.

Friends of the Kaw Incorporated Inc.
Lawrence, KS
To support an interactive, environmental website, targeting the underserved, rural population of the Kaw Valley region, for the purpose of educating them on the critical preservation of water quality in order to maintain a healthy watershed in their area.

Heartspring
Wichita, KS
To support the Heartspring Mobile Access project with the addition of laptop computers, software, and peripherals in order to provide improved offsite support services to special-needs children and their families and school districts.

Riley County Seniors Service Center, Inc.
Manhattan, KS
To support the addition of three laptop computers with wireless peripherals in order to provide enhanced educational programs and services to seniors.

Safehome, Inc.
Overland Park, KS
To support the addition of upgraded hardware and software and provide staff training to improve delivery of services for victims who seek shelter from domestic violence. These clients will also have access to online computer training.

Southwestern College
Winfield, KS
To support the addition of videoconferencing to connect teacher education students and faculty to K-12 Kansas schools, and link diverse learners at multiple sites to guest speakers in remote locations, making college education programs accessible to all.

Sunlight Childrens Advocacy and Rights Foundation
El Dorado, KS
To support the addition of state-of-the-art technology for information-sharing with federal and state agencies and provide increased training for staff, enabling them to appropriately interview children of abuse and make appropriate referrals.

TLC for Children and Families Inc.
Olathe, KS
To support the addition of a new Web host server allowing improved agencywide communications for better delivery of services to children, youth, and families victimized by neglect and abuse.

University of Saint Mary
Leavenworth, KS
To support advanced training for nursing staff and educators so that they are skilled to set up and use the Emergency Care Simulator software system that runs standard training scenarios to better instruct nursing students and nursing professionals.

Western Kansas Child Advocacy Center Inc.
Scott City, KS
To support the Internet connection of all Western Kansas Child Advocacy Centers to enable the sharing of information which is critical to providing better and more effective services to child victims of abuse and their families.

YMCA - Topeka
Topeka, KS
To support YMCA of Topeka's Phase One of a comprehensive computer upgrade installation in order to bring its current operating system to an acceptable functional level for the improvement of its overall operations for better service delivery.

Youth Entrepreneurs of Kansas Inc.
Wichita, KS
To support the Youth of Entrepreneurs of Kansas project with technology upgrades, enabling teachers to improve their lessons and help better equip top-winning students for regional competitions. Also, an interactive website will help increase donorship.

KENTUCKY

Americana Community Center Inc.
Louisville, KY
To support the addition of updated technology, which will include development of an interactive website that will help increase outreach, and provide advanced computer training for staff in order to improve the Center's overall operations.

Big Brothers Big Sisters of Lexington, Inc.
Lexington, KY
To support a technology upgrade program that will incorporate interactive, internet-based applications which will increase staff efficiency and quality of service for the children of Central Kentucky.

Center for Accessible Living, Inc.
Louisville, KY
To support the addition of updated hardware to help the Center provide better resources to the disabled, enabling them to apply for jobs and services online in order to improve their quality of life and increase their independence.

Edith and Henry Heuser Hearing Institute Inc.
Louisville, KY
To support the addition of upgraded technology in order to provide a world of information to families directly affected by hearing loss as well as provide resources for audiologists, physicians, and social workers for early intervention.

Girl Scouts of Kentuckiana, Inc.
Louisville, KY
To support the addition of an intranet site to improve the management of information between all service centers and council headquarters, creating a 'meeting place' for all staff members to better carry out the Girl Scout Program.

Green River Regional Educational Cooperative, Inc. as fiscal agent for Caveland Educational Support Center
Bowling Green, KY
To support the addition of hardware and sophisticated software that will provide for timely access to transcribed Braille materials for use by students who are blind and visually impaired. Funding will also provide for a Braille transcriber.

Junior Achievement aka Junior Achievement of Kentuckiana, Inc.
Louisville, KY
To support the development of e-learning, game-based technologies that will complement the current hands-on electronic simulations, which will allow students to extend and expand their learning about economics concepts while having fun at the same time.

Kentucky Hope Inc.
Phelps, KY
To support a hands-on training computer program benefiting low-income, unemployed, high school dropouts, and less fortunate individuals in order to prepare them with the necessary skills to help them obtain employment.

Kentucky School for the Deaf Charitable Foundation, Inc.
Danville, KY
To support the addition of state-of-the-art videoconferencing equipment that will help improve educational opportunities for deaf and hearing-impaired students and provide better communications between students, families, staff, and the community.

Louisville Urban League
Louisville, KY
To support the internet connection of five computer labs which will be used for youth and workforce development programs and services, designed to extend the reach to underserved clients in order to empower them with better opportunities.

Owensboro Area Museum, Inc.
Owensboro, KY
To support the Museum's installation of updated hardware and a new integrated software system that will better manage school tours, camps, classes, and other activities, as well as help streamline daily operations.

Shelby Council for Retarded Children, Inc.
dba Dorman Preschool Center
Shelbyville, KY
To support the addition of upgraded technology
which will provide improved educational
programming for special-needs, preschool
children, and allows for better coordination of
services for families and staff.

Simpson County Literacy Council Inc.
Franklin, KY
To support the addition of updated hardware
and staff training in order to provide computer
education to a wide range of underserved adults
to help them gain employment and improve their
overall quality of life.

Youth Alive Inc.
Louisville, KY
To support the addition of updated technology to
provide vital tools for youth to obtain a solid
education and path to college, vocational training for
the underprivileged, and enable staff to deliver a
high quality of service to the community.

LOUISIANA

Acadiana Outreach Center, Inc.
Lafayette, LA
To support the creation of a computer lab for training the homeless basic computer literacy skills, job search skills, and how to prepare resumes to assist clients in finding employment and becoming self-sufficient.

Alton Ochsner Medical Foundation
New Orleans, LA
To support interactive online computer skills training for the growing staff, improving training flexibility to better manage the organization.

Angels Place Inc.
Metairie, LA
To support a technology infrastructure upgrade with a new server, computers, and scanner/printer to improve the services offered to terminally ill children and their families.

Arc of Louisiana
Baton Rouge, LA
To support ArcLink, an online roommate matching service, allowing families secure access to post vacancies or make living arrangements for disabled family members. The proposal also includes web hosting, maintenance, and staff training.

Association for Retarded Citizens Ouachita
Monroe, LA
To support the use of digital books to provide literacy education to disabled children. Teachers and librarians will be trained to use this technology in their library or Headstart center. Computers with touchscreens and software are part of proposal.

Best Buddies International, Inc.
Baton Rouge, LA
To support the e-Buddy program that matches disabled individuals with a non-disabled email buddy. A weekly email enables friendships which may not otherwise exist. Funds will be used to purchase a computer with adaptive hardware and software.

Boy Scouts of America Southeast Louisiana Council
Metairie, LA
To support a technical infrastructure upgrade to include laptops for field staff to bring training and other resources to volunteers and youth, after losing computers in the recent hurricanes.

Boys & Girls Club of Central Louisiana Inc.
Alexandria, LA
To support an infrastructure upgrade including computers and software for management of the organization, and training for the staff to improve their computer skills, enabling them to better train and assist the kids with basic computer literacy skills.

Chartwell Consortium dba Chartwell Center
New Orleans, LA
To support a technology infrastructure upgrade with computers, software, and training for staff to manage organization more efficiently and expanding educational outreach to community about children with autism.

Families Helping Families of Louisiana
Thibodaux, LA
To support a technological infrastructure upgrade with laptop and desktop computers, software, and printer to more efficiently manage the organization that is serving the needs of the disabled.

Green Project, Inc.
New Orleans, LA
To support a technology infrastructure upgrade, including computers and software to track donors, members and volunteers, and training for the staff to more efficiently manage the organization, which recycles excess paint and surplus building materials.

Junior Achievement Greater New Orleans, Inc.
New Orleans, LA
To support a technology infrastructure upgrade to include new computers and a new server to manage the organization after damage to the equipment by hurricane Katrina.

Louisiana Art and Science Museum Inc
Baton Rouge, LA
To support a collaboration for the upcoming Jim Henson Fantastic World exhibit that will utilize IPods for an audio/visual tour of the museum exhibit, enhancing the experience for the youth and adult visitors.

Macon Ridge Community Development Corporation
Ferriday, LA
To support elderly and disabled residents' access to computers and the internet. Macon Ridge is requesting support to install computer workstations in seven affordable housing facilities for use by the underserved residents.

NAMI New Orleans, Inc.
New Orleans, LA
To support a technical infrastructure upgrade to include computers, software, and internet access, as well as training for more efficient management of the organization that serves the mentally disabled.

Performing Arts Society of Acadiana Inc. (PASA)
Lafayette, LA
To support an artistic/technological partnership to develop a 3-D dance performance for the rural communities.

Project Lazarus
New Orleans, LA
To support improving the quality of life for those living with AIDS in the Lazarus residences. Computers with Microsoft Office and internet access will enable residents to communicate with family and access health information online.

Reconcile New Orleans Inc
New Orleans, LA
To support an infrastructure upgrade with new computers, telephone service, and PDAs to increase the efficiency of the organization and better track data, as well as institute a new financial accounting system.

Scholarship America Inc. (as fiscal agent for Jefferson Dollars for Scholars)
Metairie, LA
To support recipients of collage scholarships with the purchase of laptop computers to help them succeed in their academic pursuits.

Shreveport Metropolitan Ballet
Shreveport, LA
To support a telephone system upgrade, with additional telephone lines to manage incoming calls from customers and the community. One telephone line is inadequate to respond to the needs of the community, and may negatively impact support for the ballet.

Slidell Art League
Slidell, LA
To support a technology infrastructure upgrade, including a computer, digital camera, and scanner that will enable the creation and display of artwork created. Artwork will be more readily available to the community, as part of an outreach effort.

Youth Service Bureau of St. Tammany
Bogalusa, LA
To support a technology infrastructure upgrade with computers and software for the staff to more efficiently manage the organization that serves at-risk youth.

MICHIGAN

Association for the Blind and Visually Impaired (ABVI)
Grand Rapids, MI
To support the replacement of aging computers and purchase compatible software that enables the visually impaired staff and volunteers read the computer screen, perform their work and assist their clients.

Catholic Human Services, Inc.
Traverse City, MI
To support the implementation of an electronic scheduling system for ten offices across a ten-county area to efficiently manage services for the underserved clients and eliminate redundant tasks for the staff.

City of Ironwood (as fiscal agent for Ironwood Carnegie Library)
Ironwood, MI
To support an upgrade of the library's mobile computer lab hardware and software to implement training on the internet and computer skills training for seniors, job seekers, and students. Training will be provided by local high school students.

Detroit Artists Market
Detroit, MI
To support the enhancement of services at the Resource Center to enable students and emerging artists to create their own website and marketing materials. An artist database will also provide a biography and list of exhibit or events for each artist.

Detroit Entrepreneurship Institute Inc.
Detroit, MI
To support the creation of an interactive website to increase access to information about DEI and register for programs online and to promote fundraising through e-commerce, by allowing DEI graduates to sell their products and service online for a fee.

EUP Learning Center, Inc.
Brimley, MI
To support the creation of CONNECT, a website that will host interactive tutoring and lessons developed by the teachers. An technology upgrade to the Learning Center will also allow more students to benefit from this after-school tutoring program.

Inkster Senior Services Inc.
Inkster, MI
To support a collaboration with five senior centers to bring computer access to their residential complex and recreation center. Training on basic computer skills and internet access will be provided.

Judson Center, Inc.
Royal Oak, MI
To support the creation of a web-based private forum for teens with autism or Aspergers disorder to connect with each other or with therapists. Social interaction and communication are difficult, but vital to the teens' well-being.

Kent County Community Coordinated Child Care Inc.
Grand Rapids, MI
To support online web training for child care providers, increasing the flexibility in training and enhancing access to training that was previously cost-prohibitive at an offsite facility.

Legal Aid of Western Michigan
Grand Rapids, MI
To support greater access to legal advice and services for low-income individuals, with an emphasis on spanish-speaking clients. Additional outreach to the community and recruitment of attorney volunteers are also part of this project.

Local Initiatives Support Corporation
Kalamazoo, MI
To support an upgrade of the technology infrastructure, to include an enhancement of the telephone system and purchase of hardware and software to better manage the four offices that serve the community in their effort to build sustainable neighborhoods.

Macatawa Area Community Media Center Inc.
Holland, MI
To support a collaborative effort to expand the MacWIA program for underserved youth. The kids receive training to create TV shows that air on the community access channel, highlighting local nonprofit work. This project will add webstreaming training.

Madonna University
Livonia, MI
To support an upgrade of hardware and software at the off-campus computer lab utilized by underserved students. Training will also be provided for higher-level computer skills to complement academic success.

Michigan Disability Rights Coalition
East Lansing, MI
To support a collaborative effort with UCP of Michigan to bring the stories of the disabled to the community through digital video and the web. Funds will provide video cameras, software, and training.

Midwest AIDS Prevention Project
Ferndale, MI
To support an expansion of the SexEd4U internet outreach project that targets minority gay males that engage in risky sexual behavior. Popular Opinion Leaders will be trained to encourage healthy behavior and a website will also address these efforts.

Non Profit Enterprise at Work Inc.
Ann Arbor, MI
To support shared technology solutions with nonprofit organizations, to include financial management, fund raising, and volunteer management. Services will cost less than market rate and will enhance productivity.

Region IV Area Agency on Aging Inc.
Saint Joseph, MI
To support seniors' access to computers and the internet through a mobile computer classroom. The classroom will be equipped with 13 computers and training for all user-levels will be provided.

Samaritan Counseling Services
Ann Arbor, MI
To support a collaborative effort to upgrade the infrastructure with computers, tablet PCs, and software that will provide a HIPPA compliant, integrated system for electronic billing, scheduling, and chart management.

The Child Abuse and Neglect Council of Saginaw
Saginaw, MI
To support a computer infrastructure upgrade and revitalization of the website to add interactive training, improve fund development, implement a marketing plan and target multi-lingual populations, in an effort to stop child abuse.

The Guidance Center
Southgate, MI
To support technology upgrades, including a computer ID card reading device that will enhance the identification of appropriate programs and learning tools for underserved at-risk youth. The card will also provide an efficient product inventory system.

Think Detroit Police Athletic League Inc.
Detroit, MI
To support enhancement of the website to allow online registration for the sports teams, as well as an improvement in communication between staff, coaches, and parents in the minority community. Hardware upgrades also sought for improving fundraising.

Upper Peninsula Commission For
Escanaba, MI
To support a collaboration to create a software
program that will standardize and automate the
way non-profit agencies support a home-
delivered meal service for seniors in a 15-county
region.

**Volunteers in Prevention Probation &
Prisons, Inc.**
Detroit, MI
To support an infrastructure upgrade to the
computer hardware and software, as well as
provide training to the staff. An online outreach
to recruit volunteer mentors and e-fundraising
are also part of the project.

**Young Mens Christian Association of Blue
Water Area**
Port Huron, MI
To support an upgrade of the technology
infrastructure and incorporate software that will
build communication with prospective members,
volunteers, and donors as well as provide
financial support and operations management
for the staff.

MISSOURI

Big Brothers Big Sisters of Eastern Missouri
St. Louis, MO
To support the addition of upgraded technology for the new headquarters location, enabling improved communications, information management, fund development, and overall operations to better serve youth, volunteers, and families.

Carr Square Tenant Corporation
St. Louis, MO
To support the addition of hardware and software that will provide low-income youth and adults with the technology skills needed to improve academic performance in school and increase employment opportunities.

City of Florissant, Missouri
Florissant, MO
To support upgraded video technology for the media department to efficiently broadcast information in order to educate as many residents as possible about vital issues to help the city achieve its goals for a better community.

Curators of the University of Missouri as fiscal agent for University of Missouri - St. Louis
St. Louis, MO
To support the Arts Technology in Transit project that will deliver media education via a mobile lab to underserved, low-income schools and community organizations to empower them with the necessary skills to be successful in today's mediated environment.

Heartland Foundation
St. Joseph, MO
To support the addition of state-of-the-art technology for the emPower facility, providing students with skill-building opportunities which will prepare them for the future workforce and enrich their communities and families now and in the future.

Historic Downtown Liberty Inc.
Liberty, MO
To support development of an interactive website and kiosk for self-guided tours, educating visitors and residents about historic downtown, Liberty, MO, rich in architecture and character, and about its historic preservation efforts.

Hope House Inc.
Lee's Summit, MO
To support upgraded technology for enhanced network security, reliability, and speed at the two facilities in eastern Jackson County, improving operations and delivery of service to families who are victims of domestic violence.

Joplin Area Chamber of Commerce Foundation
Joplin, MO
To support the addition of upgraded equipment and data services for the staff, providing them with improved communications during their business travels in order to better serve their members, communities, and region.

Joplin Historical and Mineral Museum Inc.
Joplin, MO
To support the addition of hardware and software for technology-driven, interactive displays for self-guided tours, enhancing the recreational and educational experience for local visitors and tourists and increasing additional visitation to the Museum.

Kansas City Metropolitan Crime Commission Inc.
Kansas City, MO
To support upgraded technology to serve caseworkers with a more efficient system, enabling them to work from remote locations while handling a high volume of community service assignments for their client base and providing case status updates for judges.

Lemay Housing Partnership Inc.
St. Louis, MO
To support the addition of technology for the creation of an interactive website that will facilitate services for low-income homeowners applying for assistance, as well as volunteers, donors, and board members and improve overall operations.

Literacy Investment for Tomorrow Missouri dba LIFT Missouri
St. Louis, MO
To support technology training for teachers and tutors, who work with low-literate adults and families, in order to equip them with the necessary tools for better instruction as they work to expand their students' literacy and computer skills.

Main Street USA Charitable Foundation as fiscal agent for Marceline Carnegie Library
Marceline, MO
To support the Community Heritage/Genealogy via Internet project that will facilitate and expand information and resources at the Library and the Walt Disney Hometown Museum, enabling access to patrons and visitors of all ages.

Marshall Nicholas Beazley Aviation Museum Inc.
Marshall, MO
To support a computer information network for the Martin Community Center to complement the Museum as a multiuse facility and serve as a state-of-the-art regional convention center for business professionals, teachers, students, and the entire community.

National Association of Intercollegiate Athletics
Kansas City, MO
To support the Champions of Character program with an interactive, web-based program to train coaches, teachers, student leaders/athletes, and youth development professionals to teach positive values to youth about character, respect, and integrity.

Public Television 19, Inc. aka KCPT
Kansas City, MO
To support internet streaming capacity for KCPT's educational programs and resources delivered to 103 public schools in three Missouri school districts, as well as enable access to GED programs for adult learners.

Regional Violence Initiative Inc. dba St. Louis for Kids
St. Louis, MO
To support the addition of updated hardware and the development of an enhanced website to efficiently and effectively communicate with youth-serving organizations and the community in order to provide quality youth development programs.

Saint Louis University dba John Cook School of Business
St. Louis, MO
To support updated technology, enabling students, inside and outside the classroom, to apply their academic and team-building skills while completing group assignments, simulating real-world team working environments in business settings.

Shawn Hornbeck Foundation Inc.
Richwoods, MO
To support the addition of technology tools that will better equip the Mobile Incident Command Unit to immediately respond and coordinate the speedy search and rescue missions of missing persons within a 400-mile radius of the St. Louis Metro region.

St. Francis Medical Center
Cape Girardeau, MO
To support the implementation of a wireless Mobile Barcode Medication Administration system at the Medical Center in order to reduce human error when administering drugs to patients, as well as improve documentation and information tracking.

St. Louis Crisis Nursery
St. Louis, MO
To support the addition of hardware in order to help the staff accommodate and better meet the needs of an increasing number of child abuse and/or neglect prevention cases for families in crisis in a more efficient and productive manner.

Susanna Wesley Family Learning Center Inc.
East Prairie, MO
To support internet and telecommunications needs that are vital for rural, low-income youth and adults to complete their GED education, enabling them to gain employment and enrich their overall lives and community.

Urban Future
St. Louis, MO
To support the addition of upgraded technology to improve youths' academic performance to better prepare them for successful careers, increase staff efficiency, enhance information management, and provide ongoing development for mentors/tutors.

Womens Support and Community Services
St. Louis, MO
To support the replacement of an outdated system version of DonorPerfect to a new web-brower version in order to improve donor and volunteer management and outreach to the community for better service delivery and overall operations.

Youth In Need
St. Charles, MO
To support the creation of an interactive website to facilitate resources for low-income youth and families in crisis who are searching for immediate help and improve overall operations for better service delivery to the entire community.

MISSISSIPPI

Boys and Girls Clubs of The Gulf Coast, Inc.
Gulfport, MS
To support the Tech Clubs family of programs and resources with software, computer lease renewals, and a digital camera for the purpose of strengthening youth's usage and knowledge of technology in school and eventually in the workplace.

Center for Violence Prevention
Pearl, MS
To support the Center's online outreach project with the addition of an interactive website that will showcase the Center's presence in the community and develop better communications between staff, clients, and other interested parties.

Copiah-Jefferson Regional Library
Hazlehurst, MS
To support the addition of portable hardware, software, and peripherals to improve staff training, as well as enable community-based training which will establish the library as a valuable resource for economic and personal development.

Elizabeth Jones Library
Grenada, MS
To support the addition of upgraded hardware for staff development and enable adequate training in basic adult education, English-as-a-Second Language, adult and family literacy, and provide computer literacy services to the community.

Habitat for Humanity, Inc. dba Lauderdale County Habitat for Humanity
Meridian, MS
To support the addition of updated hardware and software, enabling better communications with the international office, volunteers, and potential homeowners, thus providing the highest quality of service to the community.

HIS Heart Inc.
Jackson, MS
To support the addition of updated technology in order to provide low-income youth with an avenue to work on after-school assignments and help increase donor and volunteer base, as well as improve office efficiency for better service delivery.

Jefferson Comprehensive Health Center, Inc.
Fayette, MS
To support the addition of a web-based infrastructure network system, allowing connectivity between satellite clinics for better sharing and management of patient information to better serve the uninsured and underinsured individuals and school-age youth.

Mississippi Center for Nonprofits Inc.
Jackson, MS
To support the Center with portable hardware and software and a technology trainer who will provide tailor-designed training to nonprofits in the Gulf Coast region, enabling them to administer their programs more effectively to the underserved.

Mississippi Methodist Hospital Rehabilitation Center Inc.
Jackson, MS
To support the addition of hardware and software for a specialized computer lab to assess needs of, and provide training to, spinal cord injury patients to help enhance their lives and facilitate them with opportunities to contribute to society.

Mississippi Technology Inc. dba Mississippi Technology Alliance
Ridgeland, MS
To support the addition of a web-based conferencing system for the Mississippi Innovation Network in order to facilitate resources in its economic development efforts to help Mississippi compete in a global technology-driven economy.

Montgomery Institute
Meridian, MS
To support the addition of hardware and software, enabling the Institute to share information online with eight community colleges, other partners, and community leaders in order to fullfill their initiative to strengthen economic growth and stability.

North Delta Youth Inc.
Lambert, MS
To support the addition of upgraded technology and provide computer training so the youth can use for homework assignments, school projects, and during the summer months. The entire community will have access for their use as well.

Noxubee County Library System
Macon, MS
To support the addition of hardware and software and provide much needed training for the library system staff, seniors, and the entire community, enabling opportunities for employment and overall life enrichment.

Pike-Amite-Walthall Library System
McComb, MS
To support the installation of a wireless network in the McCombs branch library, enabling patrons to access the internet free-of-charge in order to meet their work, study, or other activity needs. This project expects to attract new patrons.

University of Southern Mississippi - Dubard School for Language Disorders
Hattiesburg, MS
To support the replacement of outdated computers with new computers to continue providing special-needs students with technology instruction that is vital for their overall learning and development.

NORTH CAROLINA

Alice Aycock Poe Center for Health Education
Raleigh, NC
To support an infrastructure upgrade to include a new server, software, and re-design of the website to enable underserved students, parents, and teachers access to interactive programs about physical activity, and healthy food choices.

Asheville-Buncombe Community Relations Council
Asheville, NC
To support creation of an interactive website that will allow users to identify available services and to apply online. Website will be available in multiple languages for minorities, including Spanish, Korean, and Ukranian.

Central Piedmont Community College
Charlotte, NC
To support expanding the educational opportunities for disabled students, with additional assistive technology equipment to meet the growing needs at all campus locations in the county.
