

GoPhone Devices

AT&T offers customers a wide range of devices to select from when purchasing a GoPhone plan. Handsets currently packaged for GoPhone include devices by Nokia, LG, Samsung, and Motorola.

AT&T GoPhone devices are available in AT&T stores throughout the United States. Outside of AT&T stores, GoPhone handsets and prepaid refill cards are available at 48,000 distribution points including Wal-Mart, Target, Radio Shack and Best Buy.

Parents interested in GoPhone for their children can take an older AT&T phone, give it to a son or daughter and activate by adding balance. To create an account and get a new SIM for an older device, customers can visit an AT&T store.

Current GoPhone Devices Include:

- Nokia 2320
- Nokia 2610
- Nokia 2660
- Nokia 2680
- LG Neon
- Samsung a137
- Samsung a167
- Samsung a177
- Motorola V3 Razr

* In addition to the phones sold in the GoPhone packaging, almost any AT&T phone can be used as a prepaid phone. The phone needs to be an unlocked GSM-based device or an AT&T phone that is not an advanced smartphone. CDMA-based phones are not compatible. Customers can activate prepaid minutes and features on an older AT&T GSM phone at an AT&T store.
