

HTC Inspire™ 4G

4.3-inch Display Smartphone First to Run Next-Generation HTC Sense™

Overview

A 4G smartphone sporting a gorgeous 4.3-inch, super LCD touchscreen and a 1GHz processor, HTC Inspire 4G* will make quick work of any number of apps from the Android Market over the nation's fastest mobile broadband network – getting even faster with 4G speeds. Equal parts speed and beauty, the HTC Inspire 4G will feature an 8-megapixel camera with dual-LED flash plus 720p HD camcorder all within a single piece of aluminum running the Android 2.2 platform.

HTC Sense™

The HTC Inspire 4G will be the first in the U.S. to offer the next generation of the popular HTC Sense mobile experience, which automatically delivers the most-wanted information by bringing it to the forefront of the mobile experience. HTC Sense offers even more ways to stay connected, including FriendStream™, which delivers Facebook, Twitter and Flickr updates in a consolidated view. HTC Inspire 4G also offers customers the ability to pinpoint the location of a lost phone on a map, send a command to make the phone sound an alert – even while on “silent” mode – through the htcsense.com website. If needed, owners can also remotely wipe all of the phone's data with a single command in addition to forwarding calls and text messages to a different number.

HTC Inspire 4G: Requires a minimum data service starting at \$15/month. Two-year contract required. Qualified customers only. HTC Inspire 4G is configured to work only with the wireless services provided by AT&T.

Mobile broadband coverage is not available in all areas.

*4G speeds delivered by HSPA+ with enhanced backhaul. Will be available in limited areas. Availability increasing with ongoing backhaul deployment. Learn more at att.com/network.

**Tethering and/or Mobile Hotspots require a Data Plan with Tethering and an AT&T approved Tethering or Mobile Hotspot device. Data used by devices connected to a tethering device or Mobile Hotspot is deducted from the data allowance included in your Data Plan with Tethering, in addition to the data your device consumes. Data Plans with Tethering are not unlimited and significant charges may be incurred if the included data allowance is exceeded. Performance may vary depending on the number of devices connected, the strength of connection, proximity, radio wave interference, and other factors. AT&T does not guarantee privacy of communications when using tethering or Mobile Hotspots and you are responsible for establishing passwords to allow others to connect through tethering or Mobile Hotspots. Tethering and mobile hotspot use on an unauthorized device or by unapproved sources or not on the tethering data plan are prohibited. For more details on Data Plans, go to att.com/dataplans.
