This document illustrates the primary differences between your current BellSouth Shared Web Hosting Windows control panel and your new AT&T Web Hosting℠ control panel on the Windows platform.
1 Control Panel Comparison

1.1 Accessing the Interface

Today you access your BellSouth Shared Web Hosting Windows control panel at http://yourdomain.com/manager/, where “yourdomain” is your domain name. Below is the login screen you currently use to access your BellSouth control panel using your user name and password:

Enter your user name and password and select the language of your choice.

```plaintext
User Name: [input field]
Password: [input field]
Language: [English (U.S.)] [dropdown]
Login
```
To access your new AT&T Web Hosting control panel on the Windows platform, perform the following steps:

1. In your web browser’s **Address** field, type your domain name followed by /stats/ and press **ENTER**. For example: http://www.yourdomain/stats/, where “yourdomain” is your domain name.
2. You will be prompted to enter your **user ID** and **password**, as shown in the illustration below. Your user ID and password will be provided in migration notices 3 and 4.
3. Click **OK**. Your control panel will appear.
4. Bookmark your control panel. This will enable you to access your control panel quickly and easily.

**Note:** If your domain has not yet resolved to the IP address or is having DNS issues, you can access your control panel using the new IP address that was provided to you in the migration notices. For example, you would type http://your_ip/stats/ in your web browser’s **Address** field.
1.2 INTERFACE OVERVIEW

This section provides an overview of your AT&T Web Hosting℠ control panel on the Windows platform as it compares to the BellSouth Shared Web Hosting control panel you have been using to manage your BellSouth hosting account.

1.2.1 CONTROL PANEL MAIN INTERFACE

Here is a screenshot of your current BellSouth Shared Web Hosting control panel:
The AT&T Web Hosting control panel on the Windows platform is a web based user interface to manage your hosting account.

The control panel is broken down into the following sections, as shown below:

- Web Site Tools
- Product Configuration and Quick Links
- Account Configuration
1.3 Account Usage

1.3.1 Managing Users

On the BellSouth Shared Web Hosting platform, you access the “Statistics” section of your control panel to view your Accounts Usage.

On the AT&T Web HostingSM Shared Hosting platform, this interface will not be necessary since you cannot control quotas per user. The space available is based on your particular plan’s specifications.
1.4 Bandwidth Usage

In the BellSouth Shared Web Hosting control panel, you used to access the Statistics section of your control panel to view your Bandwidth Usage, as illustrated below.

In the AT&T Web Hosting control panel on the Windows platform, you can utilize the following tool to notify you when your bandwidth has reached a certain amount by following these steps:

Step 1:
In the Account Configuration section of your control panel, click on Account Control Panel.
Step 2:
In the **Profile** section, click on **Overage Notification**.

Step 3:
Make your desired changes and click **Submit**.
1.5 Email & FTP Settings

This section compares the Email Setting sections in the BellSouth Web Hosting Windows shared hosting platform and the AT&T Web Hosting™ control panel on the Windows 2003 platform.

1.5.1 Accounts

On the BellSouth Shared Web Hosting platform, you used the following screen to create email and FTP accounts.
In the AT&T Web Hosting℠ Shared Hosting on the Windows 2003 platform control panel, go to the section named Product Configuration and Quick Links and click on the Email Control Panel icon to create and manage email users.
1.5.2 **EMAIL ALIASES**

In the AT&T Web Hosting℠ control panel on the Windows 2003 platform, you will click on the **Email Control Panel** icon to add and manage email aliases.
1.6 Manage Your Site

1.6.1 Change Password

In the BellSouth Shared Web Hosting control panel, you used the following screen to change your password.
To change your account password for your AT&T Web Hosting℠ Shared Hosting on the Windows platform account, you will utilize the **Account Configuration** section in the Control Panel.

**Step 1:**
In the **Account Configuration** section of your control panel, click on **Change Password**.

**Step 2:**
Enter your new password in the appropriate fields and click on **Change Password**.
1.6.2  **Contacts**

You used the following screen to access your Contact Information on the BellSouth Shared Web Hosting platform.

![Contact Information Screen](image)

To change the Contact Information for your AT&T Web Hosting account via the control panel, follow the steps below.

**Note:** It is very important to keep your account’s contact information current to ensure you can receive important communications from AT&T regarding your account.
Step 1:
In the *Account Configuration* section, click on **Account Control Panel**.

![Account Configuration](image1)

Step 2:
In the *Profile* section, click on **Contact Information**.

![Profile](image2)
Step 3:
Complete the appropriate fields in the screen that appears.
1.7 Mail Server

On the BellSouth Shared Web Hosting platform, you used the screen shown below to view your Mail Server information.

On the AT&T Web Hosting platform, you can login to your email online by using the following URL: http://webmail.yourdomain.com/webmail where “yourdomain” is the domain you have registered. Any of your email users can use this URL to access their email.
1.8 Added Services

You used the following screen to add services to your BellSouth Shared Web Hosting account.

In the AT&T Web Hosting Shared Hosting℠ control panel on the Windows 2003 platform, you will be able to utilize Windows Labs. In this section, you will have access to various new utilities and applications.
