AT&T 3G MicroCell™
Getting To Know Your Device

Status Indicators (Front of the Device)
- Power
- Ethernet
- GPS
- Computer
- 3G

In The Box
AT&T 3G MicroCell™ | Yellow Ethernet Cable | AC Power Adapter | Quick Start Guide | User Manual
Before You Begin

- Plan your installation location – your device should be:
  - **Within three feet of a window** to receive a GPS signal for 911 purposes.
  - At least **one foot away from other wireless broadcasting devices** to avoid possible interference.
  - Where you can **connect your MicroCell to your Internet equipment**.

- Plan on 10-15 minutes for equipment setup and online activation. Your device will then need up to an additional 90 minutes for final device activation, which requires no effort on your part.

- You will need your AT&T wireless phone number/user name and password for online activation. If you haven’t set up an AT&T online wireless account, you can do so while activating your MicroCell online.

Serial Number (S/N) Tip

Write down your MicroCell’s serial number; you’ll need it for online activation and future reference. It can be found on the bottom of the device or on the box label.

Serial # (S/N)

To view an activation tutorial, visit [att.com/3GMicroCell](http://att.com/3GMicroCell) under the “Help” tab.
AT&T 3G MicroCell™
Quick Setup

1. Connect your device to the Internet.

Connect the yellow Ethernet cable from the “Ethernet” port on your MicroCell to your router.

(If you don’t have a router, see User Manual page 9.)
2. Power on your device.

Connect your MicroCell to a power outlet with the AC Power Adapter.

The Power light on the front of the device will come on immediately. Within a few minutes, other lights will flash as a GPS signal is located and software is updated.

3. Activate your device online.

Visit att.com/3GMicroCell-Activate and follow the instructions on the screen.

You’ll need the following:
» Serial number (S/N)—it’s on the bottom of the device or the box label.
» Your AT&T wireless phone number/user name and password. If you haven’t set up an AT&T online wireless account, you’ll need to do so.

Proceed to Step 4 if you completed online activation at the AT&T store.
Wait while your device connects.

Take a break!
You will receive a text message and email once activation is complete.
Visit att.com/3GMicroCell to learn more on how to get the most out of your MicroCell.

NOTE:
It can take up to 90 minutes to complete activation. Your device may update and restart during this time.

3G Status Confirmation

- Power: Solid Green
- Ethernet: Solid Green
- GPS: Solid Green
- Computer
- 3G: Solid Green

The GPS and 3G lights will start flashing GREEN after connecting power to your device. Solid GREEN indicates activation is complete!
Confirm your success!

Your device is configured and working properly when:
» You receive a text message and an email confirmation.
» The 3G light on your MicroCell is solid and **GREEN**.
» Your cell phone shows **“AT&T MicroCell”** or **“AT&T M-Cell”** instead of “AT&T” as the network provider (as shown below).

**NOTE:**
You may need to restart your cell phone for “AT&T MicroCell” or “AT&T M-Cell” to appear.

**NOTE:**
Some mobile devices will display items differently.
Having Trouble?

1. Have you waited at least 90 minutes?
2. Have you activated your MicroCell online and received the Online Activation Complete email?
3. Does your MicroCell have a solid GPS light?
4. Is your Internet connection and home network up and running and connected?
