Welcome

Hello! Welcome to HYDROGEN ONE, the secure dual domain smartphone by RED. In this manual, you will learn about HYDROGEN ONE's basic operation and features, as well as important safety information.

Before reading the contents of this manual, please note:

-  The functions described in this manual are those featured on your phone as it is now. If the descriptions do not match your phone's actual functions due to software or hardware changes, then please use the functions as they actually are on your phone.

Getting Started

Initial setup

-  Please read the quick start guide inside the box before using your phone.

When you first turn on the device, follow the instructions on the screen to choose your language, connect to a network, migrate data, log in to a Google account, record a fingerprint, set a password, and personalize the device.

Setting a SIM card

Enabling or disabling a SIM card

If you want to stop one of your SIM cards from being used to make calls, send messages, or access the Internet, you have the option to disable that SIM card.

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **SIM cards**.
4. Click the switches besides the two SIM cards to enable or disable each SIM card.
5. Confirm your choice when prompted.

-  When re-enabling a previously disabled SIM card, the phone will restore the previous SIM card settings, including your mobile data preferences.

Renaming a SIM Card

By default, each SIM card is named after the carrier, but you can rename your SIM card to make it easier to remember.

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. **Touch Network & Internet > SIM cards.**
4. Touch the SIM card name, and enter a new name.
5. Touch **OK**.

Setting the preferred card for mobile data

Select which SIM card is preferred for mobile data. Once set, the phone will connect to the mobile network using this card. No mobile data will be consumed via the other SIM card.

6. From the home screen, swipe up to access app list.
7. Touch  **Settings**.
8. **Touch Network & Internet > SIM cards.**
9. Touch **Cellular data**, and select an SIM card as the preferred card.

Setting a preferred card for phone calls

Select which SIM card is preferred for phone calls. All phone calls will be made using this SIM card.

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. **Touch Network & Internet > SIM cards.**
4. Touch **Calls**, and select your preferred SIM card for phone calls or select **Ask every time**.

If you don't set a preferred card for calls, you will have to select a SIM card each time you make a phone call.

Setting a preferred card for messages

Select which SIM card is preferred for messages. All text messages will be sent using this card.

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet > SIM cards**.
4. Touch **SMS messages**, and select your preferred SIM card for messages or select **Ask every time**.

If you don't set a preferred card for phone-calls, you will have to select a SIM card each time you send a message.

Locking and unlocking the screen

By default, your phone's screen will automatically lock after a period of time. You can set the screen lock time and method.

Setting the lock screen method

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Security & location > Screen lock**.

You can choose one of the following lock screen methods.

- **None:** Do not lock the screen.
- **Swipe:** Swipe up on the screen to unlock your device.
- **Pattern:** Draw a pattern on the screen to unlock your device.
- **PIN:** Set a PIN code for unlocking the screen.
- **Password:** Enter a password to unlock the device.

To remove the screen unlock password, select **None** and follow the onscreen instructions.

Unlocking the screen

1. Press **Power button** to turn on the screen.
2. Swipe the screen up to unlock it.

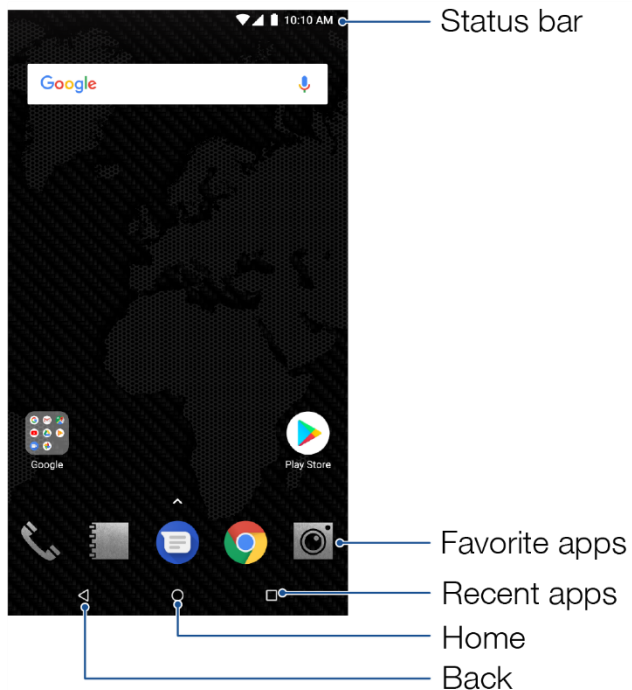

- When pattern, PIN, or password unlock has been set up, you need to draw the pattern, enter the PIN or a password to unlock the screen.
- Please enter the password to unlock the screen from time to time to prevent it being forgotten after using the iris and fingerprint options for a long period.

Screen and Display

The home screen

The home screen interface

Screen gestures

Touch	Touch an item on the screen once. For example, touch to select an option or open an app on the home screen.
Double touch	Touch the target on the screen twice in quick succession. For example, double touch an image in full screen mode to zoom in or out.
Touch and hold	Touch and hold a target until the phone vibrates, then proceed to the next step. For example, touch and hold an app in the home screen to allow you to move the app icon.
Swipe	Swipe your fingers on the screen. For example, swipe up or down your contact list to scroll through it.
Drag	Touch and hold an icon until the phone vibrates, then move it to another position on the screen. For example, drag an icon to change its position.
Spread fingers apart	Spread two fingers apart on the screen. For example, spread two fingers apart to zoom in on a picture.
Pinch fingers together	Pinch two fingers together on the screen. For example, pinch two fingers together to zoom out on a picture.

Revealing hidden navigation icons

In some circumstances, such as when you are taking a photo or viewing an image, the device automatically hides the navigation icons at the bottom of the screen. Swipe up from the bottom of the screen to reveal the hidden navigation icons.

Customizing the home screen

Setting the wallpaper

1. From the home screen, swipe up to access app list.
2. Touch **Settings**.
3. Touch **Display > Wallpaper**, you can:
 - Select a picture from the gallery or a pre-saved wallpaper, and then click **SET WALLPAPER** in the top left of the screen. Follow the onscreen instructions to set the picture as a wallpaper for the home screen or the lock screen, or both.
 - Touch **Red Launcher**, select a pre-saved wallpaper for lock screen or home screen and then touch **Set Wallpaper** in the top of the screen.

Setting the home screen switch effect

Your phone comes loaded with numerous special effects for switching between home screens.

1. Touch and hold an empty area on the home screen until the phone vibrates.
2. Touch **Transitions**.
3. Select a special effect for switching between home screens.

Adding widgets

 Widgets cannot be added if there is not enough empty space on the home screen. Please first ensure there's enough empty space on the current home screen, or create a new home screen.

1. Touch and hold an empty area on the home screen until the phone vibrates.
2. Touch **Widgets**.
3. Select a widget and drag it to home screen.

Moving icons or widgets

Touch and hold an icon on the home screen until the phone vibrates, and then drag it to a new position.

Resizing widgets

 Only some widgets can be resized.

-
1. Touch and hold a widget until the phone vibrates.
 2. Drag the dots appearing around the widget to adjust its size.
 3. Touch any empty space on the screen to finish.

Deleting widgets

Touch and hold the widget until the phone vibrates, and then drag it onto the uninstall icon at the top of the screen.

Adjusting the font size on the home screen

You can set a bigger font size for the home screen if you feel the text is too small.

1. From the home screen, swipe up to access app list.
2. Touch **Settings > Display > Advanced**.
3. Touch **Font size**.
4. Follow the instructions and drag the slider to make the font size larger or smaller.

Creating a folder

On the home screen, drag an application icon onto another application icon to create a folder.

Renaming a folder

Touch a folder and then touch the folder's name in the folder details interface to rename it.

Adding objects to a folder

Touch and hold an icon on the home screen until the phone vibrates, and then drag it onto the desired folder icon.

Quickly browsing folders

If the home screen has multiple folders, you can quickly switch between folders by touching different folder names at the top of the screen when viewing a folder's details.

Taking screenshots

You can take a screenshot of the screen by pressing the **Power button** and the **Volume Down button** simultaneously.

The screenshot will be saved to **Internal storage/Pictures/Screenshots/**.

Viewing recently opened apps

To view a list of recently opened apps, touch . Scroll up and down to view the apps. Touch an app window to access it.

Notifications

Opening the notification bar

1. Depending on the screen mode, you can:

- When the screen is unlocked: swipe down from the top of the screen to open the notification bar.
 - When the screen is locked: touch the **Power button** to turn on the screen, and swipe down from the top of the screen to open the notification bar.
2. View or close notifications using the switches, or touch a notification to see more details. A password is needed when the screen is locked.

 You can set up how to display notifications when the screen is locked at **Settings > Apps & notifications > Notifications**. For details, see [Setting how notifications are displayed](#).

Viewing notifications

When the screen is locked, turn on the screen and all new notifications will be displayed on the screen. When the screen is unlocked, swipe down from the top of the screen to open the notification bar and view the list of notifications.

Setting how notifications are displayed

You can set up how to display notifications on your phone, adjust the level of detail, and change which apps can send notifications.

1. From the home screen, swipe up to access app list.

2. Touch  **Settings**.

3. Touch **Apps & notifications > Notifications**.

4. You can:

- Touch an app, and select how notifications should be displayed.
- Touch **All apps**, categorize your apps, and then select the notification display style by category.

-
- Touch  to set up how notifications are displayed for all apps when the screen is locked.

Touch  > **Reset app preferences** in the upper right corner of the screen if you want to restore the default notification display setting for all apps.

Setting the do not disturb mode

Enabling do not disturb

In the do not disturb mode, your phone will remain silent when you do not want to be disturbed, and it will neither make sounds nor vibrate. You can also set the screen not to light up for notifications to avoid visual distractions.

1. Swipe down from the top of the screen to open the notification bar.

2. Touch . You can:

- Select **Total silence** to disable all sounds and vibrations (including alarm clock, music, video and games), while still being able to make phone calls.
- Select **Alarms only** to disable all sounds and vibrations except for the alarm clock.
- Select **Priority only** to disable all sounds and vibrations from the alarm clock, reminders, and events other than calls from designated callers.

3. Select how long do not disturb mode lasts:

- To keep do not disturb mode on indefinitely, touch **Until you turn off Do Not Disturb**.
- To enable do not disturb for a specific period, touch  or  to increase or decrease the time.

Customizing do not disturb options

1. From the home screen, swipe up to access app list.

2. Touch  **Settings**.

3. Touch **Sound > Do not disturb preferences**. You can:

- Touch **Priority only allows** to allow only certain content types to play sounds or vibrate.
- Touch **Block visual disturbances** to allow or prevent notifications lighting up the screen in do not disturb mode.
- Touch **Automatic rules** to turn a do not disturb rule on or off. Each do not disturb rule contains options including duration, start and end time and

do not disturb type.

Status icons

In the status bar, different status icons have different meanings:

	Signal strength		No SIM card found
4G+	Connected over 4G+		Flight mode enabled
LTE+	Connected over LTE+	4G	Connected over 4G
H+	Connected over HSPA+	LTE	Connected over LTE
3G+	Connected over 3G+	H	Connected over HSPA
1X	Connected over CDMA 1X	3G	Connected over 3G
G	Connected over GPRS	E	Connected over EDGE
HD	VoLTE enabled	2G	Connected over 2G
	Connected over Wi-Fi		Bluetooth enabled
	Battery full		Charging
	Battery low		Receiving location data from GPS
	Vibration mode enabled		Do not disturb mode enabled
	Total silence mode enabled		Alarm clock enabled

Managing Apps

Downloading apps

 To protect your phone, please download apps from the Google Play Store on your phone. Downloading apps from other sources may cause unforeseeable damage to your phone.

You can download apps from the Google Play Store. Please visit play.google.com/store/apps to learn how to download and install apps.

Removing apps

Touch and hold an icon on the home screen until the phone vibrates, and then drag it to **REMOVE** at the top of the screen.

Apps removed from the home screen can be found in app list.

Deleting apps

Touch and hold an icon on the home screen until the phone vibrates, and then drag it to **UNINSTALL** at the top of the screen.

 Pre-loaded apps cannot be deleted.

Managing permissions

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Apps & notifications > App permissions**.
4. Select a type of permission, and the apps requesting that permission will be displayed in a list.
5. Use the switches to turn the permissions for the apps on or off, enabling or disabling access.

 If you disable certain permissions for system apps, you might lose some of the phone's basic functionality. To you want to disable such permissions, you can touch **DENY ANYWAY** to dismiss the warning.

Setting default apps

1. From the home screen, swipe up to access app list.

-
2. Touch  **Settings**.
 - 3.
 4. Touch **Apps & notifications** > **Advanced** > **Default apps and keys**.
 5. You can select default apps for the functions listed for the current domain.

Internet and Sharing

Configuring the network

Activating mobile data

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **Data usage**.
4. Switch on **Mobile data**.

Setting the preferred mobile network

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **Mobile network** > **Advanced**.
4. Touch **Preferred network type** and select the preferred network type.

Activating mobile data roaming

When you move outside of the area covered by your mobile service contract to another part of the country or overseas, you will need to pay roaming fees if you need connect to the Internet using mobile data. Please consult your carrier for details.

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.

-
3. Touch **Network & Internet** > **Mobile network**.
 4. To select the SIM card for mobile data roaming, switch on **Roaming**.

Sharing your mobile network

 The mobile network cannot be shared in the business domain.

Sharing a network via a USB cable

1. Use a USB cable to connect your phone to a PC.
2. From the home screen, swipe up to access app list.
3. Touch  **Settings**.
4. Touch **Network & Internet** > **Hotspot & tethering**.
5. Switch on **USB tethering**.

Sharing a network via Bluetooth

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **Hotspot & tethering**.
4. Switch on **Bluetooth tethering**.

Using your device as a Wi-Fi hotspot

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **Hotspot & tethering**.
4. Switch on **Wi-Fi hotspot**.

To change the Wi-Fi hotspot name, network security options and other properties, touch **Set up Wi-Fi hotspot**.

Wi-Fi

Connecting to Wi-Fi

Please do not connect to unknown Wi-Fi networks to prevent data or property loss.

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **Wi-Fi**, and turn on the switch. Available Wi-Fi networks will be displayed in a list.
4. You can:
 - **Connect to a Wi-Fi network:** touch the Wi-Fi network you want to connect to. A password may be needed for encrypted networks.
 - **Manually refresh the Wi-Fi network list:** touch  > **Refresh** to refresh the Wi-Fi list.
 - **Manually add a Wi-Fi network:** swipe down the Wi-Fi network list, touch  , and follow the instructions to enter the network properties.

Controlling data use

Setting a data alert

You can set up data alert to avoid exceeding the data limit for your contract. When data usage is approaching the limit, the phone will display a warning to remind you to conserve data.

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **Data usage** > **Billing cycle**.
4. Switch on **Set data warning**.
5. Touch **Data warning** to select a unit of measurement and enter a number for the data limit.
6. Touch **SET**.

Setting data usage restrictions

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **Data usage** > **Billing cycle**.
4. Switch on **Set data limit**, and after reading the warning, touch **OK**.
5. Touch **Data limit** to select a unit of measurement and enter a number for the data limit.
6. Touch **SET**.

Controlling data usage for apps

If you want to limit how much data apps use, you can allow certain apps to connect to the Internet without restrictions while making other apps send and receive data less frequently and only while in use.

1. From the home screen, swipe up to access app list.
2. Touch  **Settings**.
3. Touch **Network & Internet** > **Data usage** > **Data saver** > **Unrestricted data**.
4. Switch on to allow the app unrestricted Internet access.
5. Touch  , then touch **Off** to enable the mobile data saving program.

 Once enabled, the mobile data saving program applies to both personal and business domains simultaneously.

Calls and Contacts

Making phone calls

Smart dialing

When making phone calls, the phone can find the relevant contact by telephone number or the pinyin or alphabetic spelling of their names.

1. On the home screen, touch  **Phone**.

-
2. Touch  and enter the contact's number or the letters in their name. For example, to make a call to a person named Jane Smith with the number 12345678900, simply enter 123 or JS, and the phone will present this contact and contacts with similar information.

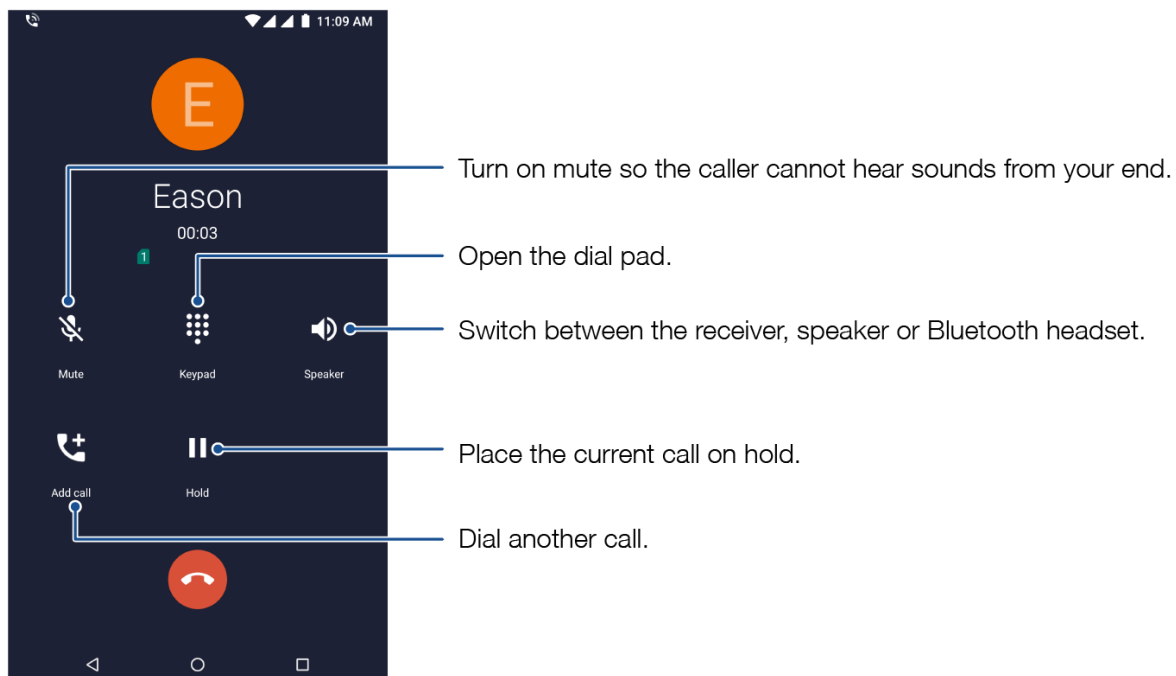

Making phone calls from the contact list

1. On the home screen, touch  **Contacts**.
2. Touch  and enter the first few numbers of the phone number or the initials of the contact in the search box.
3. Touch the number to be dialed.

Making phone calls from the call log

1. On the home screen, touch  **Phone**.
2. Touch .
3. Touch the call log entry to be dialed.

Using your phone during a call

During a phone call, you can swipe up from the bottom of the screen, and touch

to leave the call interface without interrupting the call. To return to

the call interface, touch the green call bar at the top of the screen.

Dialing an extension number

1. On the home screen, touch  **Phone**.
2. Open the dial pad and enter the main number.
3. Touch  to the left of the number, then touch **Add 2-sec pause** to enter the pause symbol ",".
4. Enter the extension number.
5. Touch .

When dialing a number, you can also enter the pause symbol "," by touching and holding the * key.

Speed dial

With the speed dial feature you can assign telephone numbers to dial pad number keys. Touch and hold a speed dial number key to dial a pre-set number quickly.

Assigning a speed dial number

1. On the home screen, touch  **Phone**.
2. Touch  to open the dial pad.
3. Touch and hold any number between 2 and 9.
4. Touch **YES** in the pop-up window.
5. Touch a number, you can: :
 - Enter a number.
 - Touch  and select a number from your contacts.

Calling a speed dial number

1. On the home screen, touch  **Phone**.

-
2. Open the dial pad.
 3. Touch and hold a number key assigned a speed dial number.

Making international phone calls

 Please first ensure international calling services or international roaming services have been enabled with your carrier.

1. On the home screen, touch  **Phone**.
2. Touch  to open the dial pad.
3. Touch and hold the 0 key to insert the + symbol, and then enter the country code, area code, and phone number.
4. Touch .

Making an emergency call

In the event of an emergency, you can make emergency calls from your device even without a SIM card. However, you must be in an area with cellular coverage.

 As different countries have different emergency numbers, please first confirm the local emergency number.

 You cannot dial an emergency number if there is no cellular coverage where you are. Please do not rely on your mobile phone as the only means of seeking help.

1. On the home screen, touch  **Phone**.
2. Open the dial pad.
3. Enter the emergency number.
4. Touch .

Answering calls

Accepting calls

When a call is incoming, the screen will light up and display the incoming number or the caller's contact information. You can:

- Swipe up  to answer the call.

- Swipe down to reject the call.

- Swipe from  to decline with message.

When you using the phone, a call is incoming, you can touch DECLINE to reject the call, or touch ANSWER to answer the call.

Switching between calls

-  If you receive a new incoming call while on the phone, you can touch  to answer the new call. The original call will be kept on hold. To resume the original call, touch  > **Hold Call** on the call interface to put the new call on hold.

Sending a quick text response

When receiving an incoming call which cannot be answered right away, you can respond quickly with a text message to inform the caller of the situation.

1. In the incoming call interface, swipe from .
2. Select a message from the template list. The incoming call will be rejected and the caller will receive the text message.
3. You can pre-set a quick text response in call settings. See [Setting a quick text response](#) Setting a quick text response for details.

Making a conference call

When you need to communicate with multiple parties, you can choose to set up a conference call.

-  Conference calling must be supported by your carrier. Please ensure you have activated this service. For more details, please consult your carrier.

1. On the home screen, touch  **Phone** to call the first participant.
2. Once the call is connected, touch the dial pad and call the second participant.
3. When the second call is connected, the call to the first participant will be put on hold. At this time, you can touch  > **Merge call** in the call interface to start the conference call.
4. To add more participants, just repeat steps 2 and 3.

Touch **Manage conference call** during a call to view a list of participants. You can:

- Touch  to remove a participant from the conference call and keep them in a separate call.

-
- Touch  to end a call with a participant.

Setting call options

Setting a quick text response

When there is an incoming call, you can send a pre-set message to provide a quick response. Pre-set messages can be customized.

1. On the home screen, touch  **Phone**.
2. Touch  > **Settings** in the search box at the top.
3. Touch **Quick responses**.
4. Select and edit a pre-set message.
5. Touch **OK**.

Setting a blacklist

You can add a number to the blacklist to stop nuisance calls. Calls and messages from blacklisted numbers will be blocked.

1. On the home screen, touch  **Phone**.
2. In the search box at the top, touch  > **Settings** > **Call blocking**.
3. Enter the number you want to block.
4. Touch **BLOCK**.

To remove a number from the blacklist, touch  next to the number, and then touch **UNBLOCK**.

Contacts

Creating a new contact

Adding a contact

 The number of contacts that can be saved on your phone depends on the amount of free space on your phone. The more free space, the more contacts

that can be saved. The number of contacts that can be saved on the SIM card depends on its specifications. Please consult your carrier for details.

1. On the home screen, touch  **Contacts**.
2. Touch  .
3. Touch **Saving to**. You can:
 - Save a contact to your Google account.
 - Save a contact to your SIM card.
4. Enter the name, number and other information of the new contact.
5. Touch **More fields** to enter more information.
6. Touch  to create an avatar for a contact by taking their picture or selecting one from the gallery.
7. Touch **SAVE**.

Saving a contact from the call log

1. On the home screen, touch  **Phone**.
2. Touch  .
3. Touch  on the right of the call log entry from the unknown number.
4. Touch  , you can:
 - Touch  to create a new contact.
 - Touch a contact to save the unknown number.
5. Touch **SAVE**.

Importing/exporting contacts

Importing contacts from a microSD card

1. On the home screen, touch  **Contacts**.
2. Touch  >  > **Import** > **.vcf file**.
3. Select a .vcf file to import.

Importing contacts from a SIM card

1. On the home screen, touch  **Contacts**.
2. Touch  >  > **Import**.
3. Touch SIM card name.
4. Touch the contacts you want to import.
5. Touch **IMPORT**.

Exporting contact information to a microSD card

1. On the home screen, touch  **Contacts**.
2. Touch  >  > **Export** > **Export to .vcf file**.
3. Enter the name, and touch **SAVE**.

Exporting contact information to a SIM card

1. On the home screen, touch  **Contacts**.
2. Touch  >  > **Export**.
3. Touch SIM card name.
4. Select the contacts you want to export, and touch **Ok**.

Contacts saved on a SIM card can be identified in the address book by the SIM card icon.

Create a personal name card

1. On the home screen, touch  **Contacts**.
2. Touch  >  > **My info**.
3. Enter the name, number and other information.
4. Touch  to create an avatar by taking a picture or selecting one from the gallery.
5. Touch **SAVE**.

Managing contacts

Editing contacts

You can edit the information saved for a contact, such as telephone number or email address, at any time.

1. On the home screen, touch  **Contacts**.
2. Touch the contact you want to edit.
3. Touch  to edit the contact's information.
4. Touch **SAVE**.

Creating frequent contacts

You can get in touch with your contacts more easily by creating frequent contacts.

1. On the home screen, touch  **Contacts**.
2. Touch the contact you want to save as a frequent contact.
3. In the contact details view, you can:
 - **Save contacts:** touch  to list the contact under the **FAVORITES** tab in **Contacts**.

-
- Create a contact shortcut on the home screen: touch  > **Create shortcut** and follow the instructions on the screen.

Linking contacts

When there are multiple records for the same contact in the contact list, you can link these records and remove the duplicate entries.

1. On the home screen, touch  **Contacts**.
2. Touch the contact to be linked.
3. Touch  > **Link**.
4. Touch the contacts to be linked.

To unlink contacts, touch a contact and then touch  > **View linked contacts** > **UNLINK**.

Sharing contacts

1. On the home screen, touch  **Contacts**.
2. Touch and hold the contact you want to share, and then touch  > **Share**. If you want to share multiple contacts, select multiple contacts to be shared together.
3. Select the sharing method and follow the instructions on the screen.

Deleting contacts

1. On the home screen, touch  **Contacts**.
2. Touch and hold the contacts you want to delete, and then touch  .
3. Touch **OK**.

Messaging

Sending a message

1. On the home screen, touch  **Messages**.
2. Touch  .
3. You can:
 - Touch the recipient box and enter the name or number of the recipient, and the phone will automatically present relevant contacts.
 - Touch  to add a recipient group from the address book.
4. Enter the message content. Touch  to add extra information such as attachments.
5. Touch  or  to send the message from SIM card 1 or SIM card 2. If only one SIM card is inserted in the phone, touch  to send.

Replying to a message

1. On the home screen, touch  **Messages**.
2. Touch the message you want to reply to.
3. You can:
 - **Reply:** touch  or  to send the message from SIM card 1 or SIM card 2. If only one SIM card is inserted in the phone, touch  to send.
 - **Forward the message:** touch and hold the body text of the message then touch  .
 - **Call back:** touch  .
 - **Save an unknown number:** touch  > **Add Contact**.

Deleting messages

1. On the home screen, touch  **Messages**.

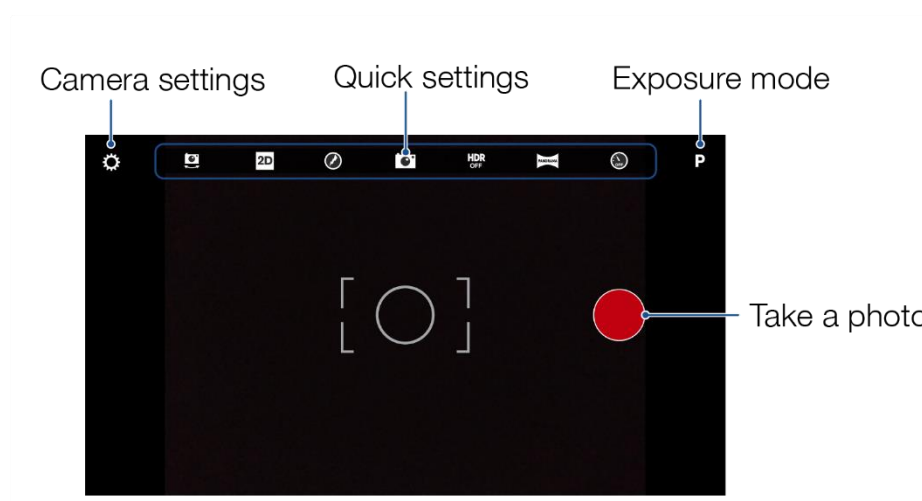

2. Touch the message you want to delete.

3. You can:

- **Delete a message:** touch and hold the message you want to delete, then touch .
- Delete a conversation: touch  > **Delete**, and touch **DELETE**

Camera and video

Camera interface

	Switch between rear and front camera
	Switch between 2D and 3D mode
	Flashlight
	Switch between camera and video mode

	HDR mode
	Panorama mode
	Timer mode

Taking photos

- From the home screen, swipe up to access app list.
 - Tap  **Camera**.
 - When you have composed your photo in the screen, tap  to take the photo. Tap  at the top of the screen to put the camera in 3D mode. Tap  to take a picture.
- Tap  **RED Player** to view the 3D photo or video you have taken. See [Viewing 3D photos and videos](#) for information on viewing options.

Taking quick photos

Press and hold the **shortcut button** to light up the screen and access the camera. After you have composed your photo in the screen, press the shortcut button again to take the photo.

You can also swipe up on the  icon in the bottom right corner of the lock screen to access the camera.

Selecting flash modes

When the camera is open, tap  in the top right corner to quickly switch between the two flash modes: **Program mode** and **Manual mode**.

Program mode

When the camera is pointing at the subject of the photo, press the shortcut button or  on the camera screen to take a photo with the appropriate level of exposure, light and shade.

Manual mode

If you want to choose your own camera settings, select **Manual mode** to separately set the shutter speed and ISO.

-  : Drag this icon to adjust the shutter speed. The larger the value, the longer the camera will take to take a photo.
-  : Drag this icon to adjust the ISO. The larger the value, the greater the light sensitivity of the camera.

Recording videos

1. From the home screen, swipe up to access app list.
2. Tap  Camera.
3. Tap  to switch to video mode. Tap  to put the camera in 3D mode.
4. Tap  to start recording. When recording, tap  to pause recording or  to stop recording.

Taking panoramas

1. From the home screen, swipe up to access app list.
2. Tap  Camera.
3. Tap  .
4. Tap  and move the device as directed to take the photo.

When in panorama mode, tap  in the image capture screen to return to ordinary camera mode.

Camera settings

Selecting the white balance

Photos have different color tones depending on the lighting at the time the photo is taken. Select the appropriate white balance for the scene to restore the lighting to the real lighting as much as is possible.

-
1. When the camera is open, tap .
 2. Tap **LIGHTING** then select a white balance option from the list.

 Select **FLASH** to turn the flash on or off when taking a picture.

Changing imaging settings

1. When the camera is open, tap .
2. Tap **IMAGING**. You can:
 - Tap  or  to switch between photo and video modes.
 - When in photo mode, tap  to set a timer for a photo.
 - Tap  to adjust the camera's default color tones. Tap **SAVE LOOK** to save the adjusted color tones. Tap **LOAD LOOK** to use the saved color tone.
 - Tap  to see the light histogram for the current scene being captured.
 - Tap  to change the resolution of the front or back camera. When in photo mode, you can only change the photo resolution. When in video mode, you can change the recording resolution and frame rate.

Managing files

1. When the camera is open, tap .
