

Installation and Return Instructions

You're getting the best entertainment can offer, so we've made setup easy to keep you from missing a thing. Please return your old device to us and get started on setting up your new device. Here's how to set up your replacement AT&T TV device:

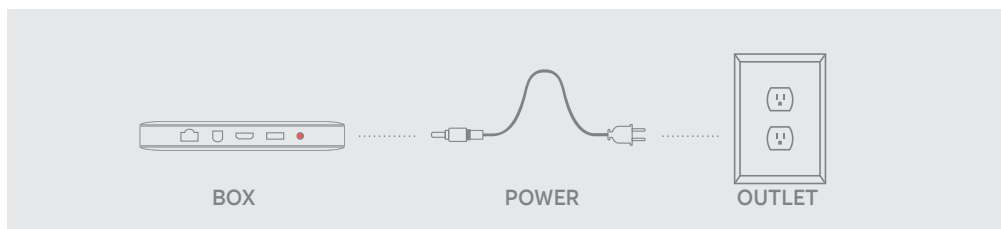

1. CONNECT your replacement AT&T TV device

- > Connect your HDMI cable from your TV to the new AT&T TV device.

- > **If you had an ethernet cable and/or optical cable connected, reconnect it.**
- > Plug the **power cord** into the replacement AT&T TV device, then into a power outlet. Turn on your TV.

- > Follow the on-screen instructions.
Note: Make sure the input on the TV matches the input of the AT&T TV device

2. RETURN your non-working device

- > Pack the non-working AT&T TV device in the box that your replacement device came in or in another suitable box and use the supplied return shipping label. Remember to keep **the bottom portion** of the label for your records.
- > Drop off the box at your local **Post Office.**[™] Returns will not be accepted at UPS or FedEx[®] locations.
