

Setting up your Battery Backup

A simple guide

Important Information:

- It's important that you periodically check your batteries to ensure they're functioning properly. Batteries have a limited lifespan, even if they are not in use. Older batteries may not provide a full 24 hours of backup. We recommend that you have a spare set of new alkaline batteries available.
- During a power outage, you may need to replace the batteries more than once to maintain working service.
- When replacing batteries, replace ALL of them at the same time with the same type and brand of **alkaline** batteries. **Caution:** Do not mix old and new batteries or use rechargeable batteries as it could damage the device.

Note: Backup battery will not power a cordless phone, it will only power a corded phone.

Check Your Batteries

It's important to check your batteries from time to time to ensure you'll have service if there's a power outage.

Press **TEST** button on the D-cell holder. The LED lights will indicate how much charge is left. Replace all 12 batteries with fresh batteries if necessary.

Replace Your Batteries:

1
Turn the D-cell unit **OFF**.
Open cover of D-cell holder
and remove all 12 of the old
D-cell batteries.

2
Insert the 12 NEW D-cell
batteries into holder.

3
Push **TEST** button on
D-cell holder. LED lights
will indicate power level.
(See chart above.)

4
Turn unit **OFF** when
finished testing. You will
need to turn the unit back
on during a power outage.

for D-cell Battery Units

If your phone does not have a dial tone during a power outage:

Check Your AT&T Network Box/ONT and D-cell Battery Unit

- 1** Make sure AT&T network box (ONT) has power and is turned **ON**.
- 2** If AT&T network box (ONT) does not have power, make sure:
 - D-cell holder is plugged into power supply
 - D-cell holder is turned **ON**
 - Power supply is plugged into AT&T network box (ONT)
 - D-cell batteries are installed and have enough charge.
(Push the battery **TEST** button to see the battery power level.)
If not sufficiently powered, replace ALL the D-cell batteries.
