IMPORTANT SAFETY INSTRUCTIONS

Read these instructions.

2. Keep these instructions.

3. Heed all warnings.

4. Follow all instructions.

5. Do not use this apparatus near water.

6. Clean only with dry cloth.

7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.

8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.

11. Only use attachments/accessories specified by the manufacturer.

12. Use only with the cart, stand, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

13. Unplug this apparatus during lightning storms or when unused for long periods of time.

14. Refer all servicing to qualified service personnel. Service is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

Power Source Warning

A label on this product indicates the correct power source for this product. Operate this product only from an electrical outlet with the voltage and frequency indicated on the product label. If you are uncertain of the type of power supply to your home or business, consult your service provider or your local/foreign power company.

The AC inlet is the unit’s main plug, and the unit shall be disconnected at all times.

Ground the Product

A label on this product indicates the correct power source for this product. Operate this product only from an electrical outlet with the voltage and frequency indicated on the product label. If you are uncertain of the type of power supply to your home or business, consult your service provider or your local/foreign power company.

The AC inlet is the unit’s main plug, and the unit shall be disconnected at all times.

CAUTION: To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions, unless you are qualified to do so.

Notice to Installers

For this apparatus, the cable shielding/screen shall be grounded as closely as practicable to the point of entry of the cable into the building. For products sold in the US and Canada, this reminder is provided to call the system installer’s attention to Article 800-93 and Article 800-106 of the NEC (or Canadian Electrical Code Part 1), which provides guidelines for proper grounding of the cable shielding.

This symbol is intended to alert you that uninsulated voltage within this product may have sufficient magnitude to cause electric shock.

Therefore, it is dangerous to any kind of contact with any inside part of this product.

CAUTION: To reduce the risk of electric shock, do not remove cover (or back).

This symbol is intended to alert you of the presence of important operating and maintenance (servicing) instructions. The user should read the provided instructions.

Eliminate AC Power/Mains Overloads

WARNING: Avoid electric shock and fire hazard. Do not overload AC power/mains outlets, extension cords, or integral convenience receptacles. For products that require battery power or other power sources to operate, refer to the operating instructions for those products.

Provide Ventilation and Select a Location

• Remove all packaging material before applying power to the product.

• Do not place this apparatus on a bed or any other similar surface.

• Do not place this apparatus in a confined space, such as a bookcase, or near the back of the receiver, outlet, or under conditions that may reduce ventilation. The apparatus should always be situated in such a manner that the ventilation openings are not blocked. If the equipment is mounted in an enclosure, appropriate ventilation openings must be ensured.

• Do not operate this product in a location where it is exposed to rain or moisture. This may cause electric shock.

FCC Compliance

United States FCC Compliance

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

If this device does cause harmful interference to radio or television reception, which can be determined by turning the equipment OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the manufacturer or an experienced radio/television technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) the device may not cause harmful interference, and 2) the device must accept any interference received, including interference that may cause undesired operation.

Declaration of Conformity

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions: 1) the device may not cause harmful interference, and 2) the device must accept any interference received, including interference that may cause undesired operation.

Open Source GNU GPL Statement

Dynamic Frequency Selection (DFS) Dual Band Frequency

Some configurations of this product may operate in the 5.150-5.250 MHz and 5.470-5.725 MHz MHz bands. If you select any channel in these frequency ranges, the product is restricted to indoor operation only per FCC guidance. Note: this product has been designed to function indoors. Operation of the product in non compliant environments may result in the denial of service to users of the permitted wireless services.

RF Exposure Statements

Note: This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter. This equipment and its antenna must be installed to ensure a minimum separation distance of 7.9 inches (20 cm) between the antenna and the human body. The above distance should be maintained for all set-up positions and orientation of the antenna.

Welcome
With the VEN401 Video Over Wireless Solution, you can put a set-top almost anywhere in the home. The VEN401 (Wireless Access Point) must be accompanied by the Cisco ISB7005 Wireless Receiver (set-top).

Simply connect the Wireless Access Point to your wireless gateway. Then, power up your set-top. Once you pair the devices, you don't need cables or wall jacks to pass high-definition video streams from the Internet to your set-top. Follow these simple instructions to get connected now.

Front Panel
1. Wireless LED
2. Wi-Fi Protected Setup (WPS) button
3. Wi-Fi Protected Setup (WPS) LED
4. Ethernet LED
5. Power LED

Note: This illustration may vary from the actual product.

Back Panel
1. Ethernet Port
   Connects the wireless access point to a wireless gateway
2. Reset
   Restores factory default settings when held for more than 5 seconds
3. Power
   Connects device to the external 12 VDC power supply

Note: This illustration may vary from the actual product.

Connecting the Wireless Access Point to a Wireless Gateway
1. Connect the 12 VDC Power Supply plug to the wall power outlet. Use only the power adapter provided with this product.
2. Connect the power plug to the power receptacle on the wireless access point.
3. Connect one end of the RJ-45 Ethernet cable to the Ethernet port on the wireless access point.
4. Connect the other end of the RJ-45 Ethernet cable to an available Ethernet port on your wireless gateway.

Pair Devices
1. Press the OK button on the receiver.
2. Press the WPS button on the wireless access point.
Refer to the installation guide included with your ISB7005 Wireless Receiver for troubleshooting information.
