1. Programming the TV Receiver no matter what Devices

Every nine months for optimal performance, two AA size (1.5V) Alkaline batteries are required to operate the remote control. For optimal performance, replace the batteries every nine months. If the remote control does not operate the TV when pointed directly at the combination unit, they may need to be replaced sooner. If this occurs, press and hold the AT&T mode key. Press the enter key. Replace both the AT&T key and the OK key. Press and hold the AT&T key and the OK key. Press 1 to 4, the selected mode key will give a long flash of the mode keys. If any key is pressed except the number keys, the selected mode key will change to Factory Default. Should the remote control not work, start again. If this does not work, start again.

2. Setting up your Volume, Channel and Power Options

The default for your power, volume and channel control is to go to the combination unit. They can be changed to go to one or more devices, depending on which devices you would like to control. To change this, follow these instructions:

- Press and hold the AT&T key until the selected mode key will give a long flash of the mode keys.
- Enter 915 by pressing the number keys on the remote control. The AT&T key will flash twice indicating correct entry.
- Press and hold the AT&T key and the OK key.
- Press and hold the AT&T key and the OK key. Press 1 to 4, the selected mode key will give a long flash of the mode keys. If any key is pressed except the number keys, the selected mode key will change to Factory Default. Should the remote control not work, start again. If this does not work, start again.

3. Changing and Removing Codes

To deactivate a mode key, follow these steps:

- Press and hold the AT&T key and the OK key.
- Press and hold the AT&T key and the OK key. Press 1 to 4, the selected mode key will give a long flash of the mode keys. If any key is pressed except the number keys, the selected mode key will change to Factory Default. Should the remote control not work, start again. If this does not work, start again.

4. Setting to Factory Defaults

To set all AT&T keys to Factory Default (specific devices):

- TV key, TV/DVD key, DVD key, CD key, Receiver key (Home Theater in a Box (HTB), Receivers, etc.).
- You may change these mode keys to operate another type of device. To do this, you must copy an existing mode key to the one you would like to change. For example, you may copy the TV key to the DVD key.
- Press and hold the AT&T key and the OK key. Press 1 to 4, the selected mode key will give a long flash of the mode keys. If any key is pressed except the number keys, the selected mode key will change to Factory Default. Should the remote control not work, start again. If this does not work, start again.
