

# Mandatory 10-Digit Dialing Coming June 18, 2016

## New area code 934 will overlay the 631 area code region of Suffolk County, New York, thereby bringing 10-digit dialing to the region.

**You won't have to change your present telephone number.** The new **934** area code will be assigned *only for new telephone numbers* within the area code region. The only change will be the way you dial local calls in the **631 area code region**.

Effective **June 18, 2016**, area code **631 + the seven-digit telephone number** will be necessary for local and expanded local calls to be completed. The same dialing procedure will apply to telephone numbers assigned to the *new 934* area code.

- It will not be necessary to dial a "1" or a "0" when dialing your local and expanded local calls.
- Local calling areas and rates will not be affected by this change.
- Special services that use three-digit numbers, such as 911 and 411 as well as 1+ 10-digit long distance, will not change.
- Other three-digit numbers that are currently available in your community or from your provider, such as 211, 311, 511, 611, 711 or 811, will not change.

**Start early using 10-digit dialing so it will be second nature by the time it is required on June 18, 2016.**

Beginning **July 16, 2016**, new telephone lines or services may be assigned numbers using the new **934** area code.

### **What you should do to get ready for 10-digit dialing.**

- Make sure your websites, stationery, advertising materials and checks include your area code. Since your area code remains the same, there is no need to reprint these items if they already contain your area code.
- Update all stored local telephone numbers to include the area code for services such as call forwarding, call blocking and voicemail, and for equipment, such as wireless phones.
- You may need to reprogram or upgrade equipment such as fax machines, Internet connections, multi-line key or PBX systems, or any equipment with automatic dialing features.
- Customers who have security systems, life safety systems, or monitored medical devices need to contact their vendor to determine reprogramming needs for 10-digit local dialing.

If you have questions about the new area code in New York, visit **[att.com/areacode](http://att.com/areacode)**. For assistance by phone, residential customers may call **800.288.2020**.
