

AT&T SMART WI-FI EXTENDER

A SIMPLE SETUP GUIDE

Wi-Fi Extender

UNPACK YOUR KIT

Remove protective film if present

Ethernet cable
(for optional installation process)

Power cord

You need to have AT&T Internet service for your new Wi-Fi Extender to work. Check the compatibility with your Gateway at att.com/wifiextender

Easy Setup Method

Use AT&T Smart Home Manager

Smart Home Manager is a free app that provides an easy way to view and manage your home network from your smartphone, tablet, or computer. You can personalize and monitor devices, as well as troubleshoot. Plus, it helps with installation, identifying where Wi-Fi coverage is weaker so you can make adjustments.

1. Download the Smart Home Manager app to your smartphone through your device's app store.

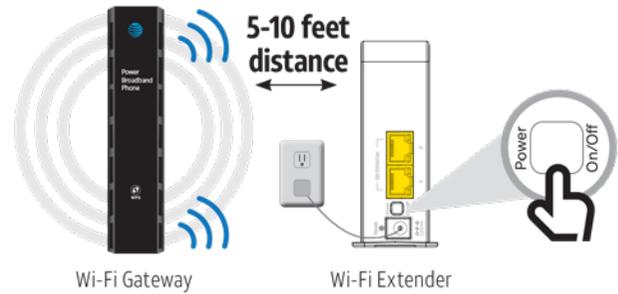

Data charges may apply for app download and usage.
Coverage and service not available everywhere.

2. Set up in minutes with your User ID or AT&T Email and Password.
3. Select **“Tools.”**
4. Select **“Install Smart Wi-Fi Extenders.”**

Note: AT&T Smart Home Manager is available to AT&T Internet service customers with a compatible AT&T Wi-Fi Gateway. Limited to home Wi-Fi network. Features may depend upon Gateway models.

Power Up

Plug in

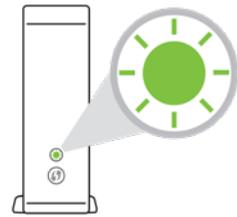

the power cord to your Wi-Fi Extender and then plug it into a power outlet close to your Wi-Fi Gateway.

Push

the Power button on the **back** of the Wi-Fi Extender.

Watch

for the light to blink GREEN.

Press

and release the WPS button on your Wi-Fi Gateway.

Pair

Press

and release the WPS button on your Wi-Fi Extender.

Wait

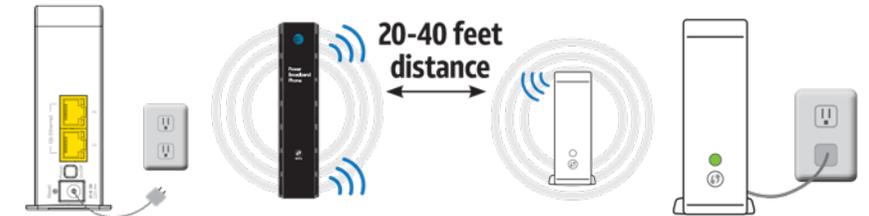

about 3 minutes for the devices to automatically pair. The blinking light will turn solid GREEN when paired.

Tip:

Once the Wi-Fi Extender is successfully paired and placed in the home, the Extender provides two optional wired Ethernet connections for devices, such as game consoles, connected TVs, etc.

Note: If it does not light up solid GREEN within 5 minutes, repeat the pairing process or refer to the Troubleshooting section.

Place

Unplug

your Wi-Fi Extender from the power outlet.

Move

your Wi-Fi Extender to its new location between your Wi-Fi Gateway and the area where you want a stronger signal.

Plug

your Wi-Fi Extender into a power outlet and wait a few minutes for the connection to re-establish and the light to turn GREEN.

Tip: Max distance between nearest Gateway or Extender is 40 ft, two walls, or one floor away. Extenders work best when placed up off the floor and on open surfaces away from large obstructions and things that can cause interference (e.g., microwaves, wireless devices, etc.).

You're done!

Tip:

For a successful setup, make sure:

- Both the 2.4GHz and 5GHz radio bands are enabled. For help, use the Smart Home Manager app or go to att.com/enhancedwifi
- If you have dual SSIDs make sure they have the same name and password

Troubleshooting

If you see a flashing red light, move the Wi-Fi Extender closer to the Wi-Fi Gateway or another connected Extender.

If you see a solid red light, try to pair with WPS or use the included Ethernet cable to connect your Extender to your Gateway and pair them manually.

If you still have an issue, check your AT&T Internet service or Wi-Fi Gateway.

Check your connections.

Check all cables and cords to ensure they are connected properly and securely.

Power down, power up.

Unplug the power cord from the back of your Wi-Fi Gateway. Leave it unplugged for 15 seconds and plug it back in.

Then unplug the power cord from the back of your Extender. Leave it unplugged for 15 seconds and plug it back in.

You may need to wait up to 10 minutes for your Gateway or Extender to completely reboot.

Go to att.com/wifiextender for additional Extender support and a list of compatible Gateways.

Is my Extender working?

Your Wi-Fi Network name and password do not change so it won't appear as a new network. To check if it's working:

1. Your Extender is paired and functioning when the light is solid green.

OR

2. Use the AT&T Smart Home Manager app to check if the Extender is on your network. (It will appear in the Devices section when it's connected.) Get Smart Home Manager at att.com/smarthomemanager

AT&T Smart Home Manager gives you easy access to your home network information in one convenient spot and can also be used to:

View and customize your Wi-Fi name and password.

See who's on your Wi-Fi network.

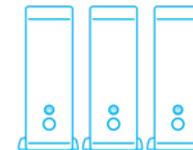

Personalize your device names, like "Matt's smartphone," or "Monica's laptop."

Choose when and how your family uses your network with parental controls.

Need more coverage?

It's easy! **Go to att.com/betterwifi** to purchase additional AT&T Smart Wi-Fi Extenders and improve Wi-Fi coverage in your home.
