How to use the AT&T U-verse remote control

Your remote can control up to four devices

At the time of installation, your remote was set up to control your AT&T HD-ready receiver. The remote is also capable of controlling up to three other devices, such as the TV, DVD player, or home theater system. You can access step-by-step instructions on how to program your TV or other devices by pressing **MENU** on your remote control and scrolling to **Help** and selecting **Remote Control Setup**.

Visit att.com/uversewelcome to learn more.

TV user guide

TV like you've never seen before

One DVR, one experience, any receiver

Record up to four shows at once and record and play back shows in any room from a single DVR.* Your AT&T U-verse HD-ready receiver with Total Home DVR® lets you:

- > Record up to four shows at once on a single DVR and record and play back your shows from any room in your home
- > Schedule, update, or delete your recordings from any room in your home
- > Pause your recorded show in one room and pick it up where you left off in another
- > Pause and rewind live TV or recorded shows from any receiver
- > Set Parental Controls for U-verse Movies, Pay Per View, and live or recorded shows

NOTE: BLUE CAPITAL LETTERS refer to buttons on the remote control.

Pause, fast-forward, and rewind live TV from any receiver

Your Total Home DVR stores up to 60 minutes of the live TV channel you're watching, on up to four of your receiver-connected TVs at the same time! (When you change channels, your DVR will begin storing the new program instead.) You can rewind live TV by pressing **REW**. You can also freeze live TV for up to 60 minutes by pressing **PAUSE** (press **PLAY** to restart).

Record the program you're watching from any receiver

Press **RECORD** on your remote control to begin recording the program you're watching. The Record light on your receiver remains lit until recording stops automatically at the program's scheduled end time. You can also press **STOP** to end recording at any time; press **OK** to confirm.

Schedule program or series recordings from the Guide from any receiver

Press **GUIDE**, then use **UP/DOWN ARROWS** to scroll to the program you want to record. Press **RECORD** once to record a single show (one red dot appears); press **RECORD** twice to record the whole series (three red dots appear); press **RECORD** three times to cancel recording.

Search for a show or series you want to record from any receiver

Press **MENU**, select **Live**, and use the **DOWN ARROW** to select **Search**. Press **OK**. Choose **Options** to narrow your search, or type the show title (use **ARROWS** to highlight a letter, then press **OK** to select it). Highlight the show you want when it appears, and press **INFO** to record a single episode or the whole series.

Watch your recordings from any receiver

Press **RECORDED TV** and select **Browse Recordings** to see a list of your recordings. Highlight a show and press **OK** to see a **Program Info** screen, then select **Play** to watch the program.

*DVR not included with U100 or U-basic packages. Models may vary. †Total Home DVR functionality is available on up to 8 TVs, and requires a receiver for each additional TV at \$8/mo. Pricing subject to change. ‡AT&T U-verse TV and High Speed Internet account required for DVR-related functions. ‡Requires qualifying device, U-family or higher TV plan and Wi-Fi or data

6 Visit att.com/uversewelcome to learn more.

Now you can watch hit TV shows in more places

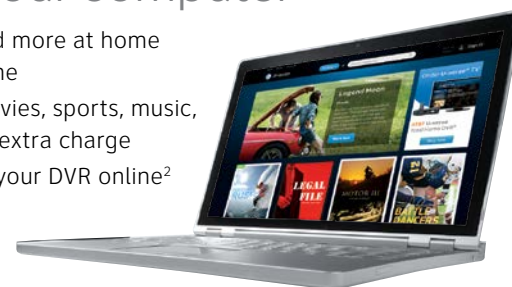

Take the AT&T U-verse experience with you on your computer, smartphone, or tablet with an extensive library of On Demand programs.

AT&T U-verse on your computer

- > Watch Live Disney, ESPN, CNN, and more at home or on the go with Uverse.com online
- > Watch over 300,000 TV shows, movies, sports, music, and more on your computer at no extra charge
- > View your TV listings and manage your DVR online²

To get started:

- 1 Visit **Uverse.com**
- 2 Log on with your AT&T primary member ID (email address) and password

AT&T U-verse on your smartphone or tablet

Enhance your entertainment experience with the free U-verse app for your tablet and smartphone. Enjoy live TV channels or access thousands of hit TV shows On Demand! With U-verse you can catch up or keep up with the sports, news and shows you love from wherever you are.

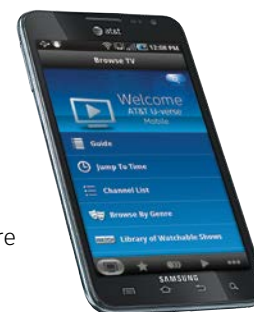

Manage your DVR, browse the guide, watch shows, and use your device as a remote control. Tablet users will also get a free subscription to UGUIDE Magazine - your go-to source for entertainment and all things U-verse.

Link your smartphone or tablet to your TV and:

- > Stream live TV, movies, sports family shows and more
- > Carry your show from room to room and watch on your mobile device
- > Turn your devices into extra TVs so everyone can watch what they want

To get started:

- 1 Download the U-verse app from iTunes or Google Play
- 2 Log on with your AT&T primary member ID (email address) and password to link to your account

connection. Content may vary by device, TV plan, and viewing location. Quality of picture varies by device and data connection. Data charges may apply. TV user guide

Find shows fast with Channel Shortcuts

Browse channels grouped by category and easily find the type of programming you like. Access Channel Shortcuts two ways:

- 1 Press **MENU**. With **Live** selected, use **DOWN ARROW** to select **Channel Shortcuts**. Press **OK** and use **DOWN ARROW** to select your category.
- 2 From the **Guide** screen, press **ENTER**. With **Channel Shortcuts** selected, use **DOWN ARROW** to pick a category and press **OK**.

How to use Parental Controls

Once you have a personal identification number (PIN), you can restrict viewing by TV or movie rating, all adult-only programming, who can rent U-verse Movies, and more.

- 1 Press **MENU**, then **RIGHT ARROW** to **Options**, then down to **Parental Locking**. Press **OK**.
- 2 Use the remote control's number pad to enter your four-digit PIN and press **OK** (press **DELETE** to clear an entry). You'll have to enter your PIN twice. The **Parental Locking** screen will appear with your locking options.

Be sure to scroll down to the second page if you want to lock adult-only content, titles and posters from the standard channels, U-verse Movies, and purchases from Account Manager.

Optimize your TV experience

Watch TV the way you want by customizing your **Guide** screen view, what channels you see, your onscreen language, sound settings, and more. There are two ways to access **Options**:

Access Options from the Menu screen to customize all your preferences

Here you can set favorite channels or channels to hide; choose a parental locking PIN; set your audio preferences, screen resolution, closed captioning, and language settings; and more. Press **MENU** on your remote control. Use **ARROWS** to select **Options**. Use **ARROWS** to select the category of preferences you want to change, and press **OK**.

Access Options while watching live TV

Add the channel you're watching to favorites or change your audio language — without changing the channel. Press **ENTER** on your remote control while watching TV, use **ARROWS** to choose the category of preferences you want to change, and press **OK**.

UVERSE TV > On Demand AND Pay Per View > On Demand

On Demand

AT&T U-verse On Demand is like having an entertainment superstore in your living room. Watch what you love, whenever you want! You'll find:

- > U-verse Movies: Choose from a huge selection including new releases and titles available the same day as DVD
- > Free shows On Demand: Watch movies, kids' shows, sports, hit TV shows, and more—all for free, based on your subscription package¹
- > Premium On Demand: Watch hit TV shows from premium providers like HBO®, STARZ®, and SHOWTIME®, based on your subscription package
- > Subscription On Demand packages: Get unlimited access to specialty programming—kids' shows, anime, karaoke, and more—for a low monthly fee

Press **On Demand** on your remote control to get started.

Tune to Channel 200 to see what's new On Demand with behind-the-scenes features and movie trailers.

Rent Movies On Demand with U-verse Movies

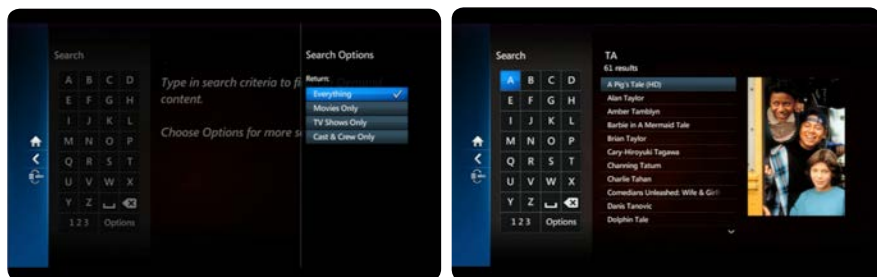

U-verse Movies is evolving the way you watch.² Movies the way they're meant to be seen. The newest releases up to a month before Netflix®. The best entertainment, no envelopes attached.

Rentals are usually available for 24-hour time frames, or extended-viewing time frames up to three days. Many are available in HD. Here's the fastest way to browse U-verse Movies:

- 1 Press **On Demand** on your remote control, use **ARROWS** to select U-verse Movies, and press **OK**.
- 2 In Movies you can browse through categories like Just In and New Releases, or you can see all available movies at a glance by highlighting All Movies and pressing **OK**.
- 3 When you find the movie you want to rent, highlight it and press **OK** (if **parental locks** are set, enter your PIN), then select Rent and press **OK**.
- 4 Press **OK** again to confirm, and the program will begin.

NOTE: While browsing, you can highlight a title and press **INFO** to see details about the program and even rent from the Program Info screen.

Search by title or name

- 1 Press the **On Demand** button on your remote control.
- 2 Use the **DOWN ARROW** to select Search, and press **OK**.
- 3 Use the **ARROWS** to highlight letters one at a time to spell out the show title or actor's name you're searching for; press **OK** after highlighting a letter to enter it in your search. (To enter a number, select 123 and press **OK** to bring up a number keypad. Select ABC and press **OK** to return to the regular keyboard.)
NOTE: As you type in letters and numbers, a list of results appears. The more characters you enter, the more focused your results become.
- 4 When the program you're searching for is displayed, highlight it using the **UP/DOWN ARROWS**, and press **OK**.
- 5 A Program Info screen appears showing details about the program and rental price. Select Rent and press **OK**. Press **OK** again to confirm, and the program will begin.

To return to live TV programming, press **EXIT TO TV**.

Watch On Demand programs

Your rentals are available for you to watch at any time during the rental period.

To watch:

- 1 Press **On Demand** on your remote control and select My Videos from the main Video On Demand screen.
- 2 Use the **ARROWS** to select the video you want, and press **OK** to start watching.

You can switch to another channel at any time while you're watching On Demand programming. The show will pause automatically and you may return to it at any time (within your rental viewing time period) and resume watching exactly where you stopped it. You can also start over at any time.

To stop watching your On Demand selection before it ends or to continue watching later, press **STOP**, select Watch Live TV or Recordings on the screen that appears, and then press **OK**.

To resume watching where you left off, select Channel 1 at any time during the rental period. (To start watching again from the beginning, press **On Demand** to see you're My Videos screen and click the title.)

On Demand billing

Once your On Demand selection is rented, it cannot be cancelled using your remote control or by calling Customer Care. You will be billed. Your On Demand rentals will be automatically added to your monthly AT&T U-verse bill. You can view the charges by logging into your account online at att.com/myatt or on the myAT&T app. You'll find them in the "usage charges" section, listed by title with date rented and rental cost. Prices, dates, and programming are subject to change.

NOTE: Adult programming rentals will be listed by studio name if available; otherwise they will be identified as "adult content."

Set limits on who can rent or watch On Demand shows

Parental locking options let you set limits on who can watch what. See **How to use Parental Controls** on page 8.

Money-saving Movie Coupons

We regularly offer discounts on favorite U-verse Movies programming. To find available movie coupons tune into Ch. 200 (SD)/Ch. 1200 (HD) or go to: uverseonline.att.net/uverse/movie-coupons. The coupon code must be entered before purchasing your movie. Purchases made before the coupon code is entered will not have the coupon discount applied.

Using your coupon code is easy:

- 1 Press On Demand button on your remote control.
- 2 Use **DOWN ARROW** to select My Offers.
- 3 Select Enter New Offers On Demand Coupon and press **OK**.
- 4 Enter your 4–6 digit coupon code, then use the **LEFT ARROW** to select Continue and press **OK**.
- 5 If your coupon is currently available, select Redeem Now to rent.

On Demand categories

• Premium On Demand

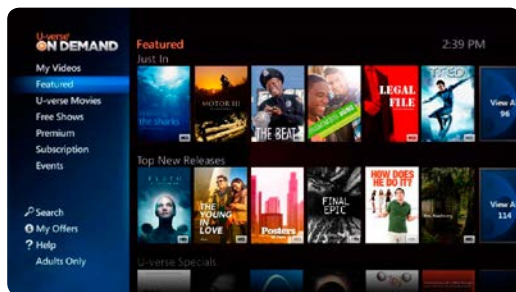

Do you subscribe to a premium movie channel package like HBO®, STARZ®, or SHOWTIME®? Premium On Demand programming is included:

- 1 Press **On Demand** on your remote control, then use the **RIGHT ARROW** to select Premium and the **DOWN ARROW** to highlight the specific premium channel you want (e.g., STARZ On Demand). Press **OK**.
- 2 A group of Premium On Demand programming options will appear. Select from the list using the **DOWN ARROW** and press **OK** to see individual programs.

TV user guide

- 3 Select what you want to watch and press **OK**. You'll see a Program Info screen; Press **OK** to play the program.

• Featured On Demand

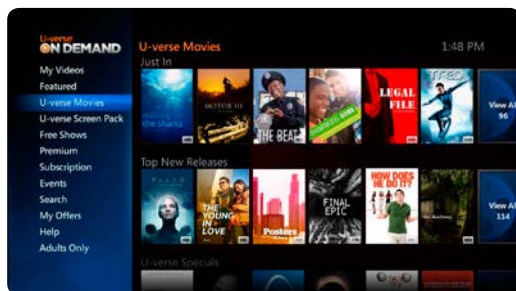

Watch AT&T U-verse exclusive programs and seasonal favorites. Check back often to see what's new!

- 1 Press **On Demand** on your remote control and use **ARROWS** to select the Featured category. A group of Featured On Demand programming options will appear.

- 2 Select from the list using the **DOWN ARROW** and press **OK** to see individual programs.

- 3 Select what you want to watch and press **OK**. You'll see a Program Info screen—highlight Watch Preview and press **OK**, or highlight Rent and press **OK**. Press **OK** again to confirm rental, and the program will begin.

• U-verse Movies

To access our entire library of movies, movie extras, TV series, and events, press **On Demand** on your remote control, then use **ARROWS** to select U-verse Movies and choose the category you want to browse. Press **OK** to see each category's listings.

• Free On Demand

We have a huge selection of Free On Demand programming in categories like Sports, Movie Extras, Kids-Family, Music, Comedy Showcase, and En Español. (Free On Demand programming varies by package subscription and is subject to change.)

- 1 Press **On Demand** on your remote control, then use **ARROWS** to select Free Shows and the category you're interested in viewing. Press **OK**.

- 2 Once you select a program title and press **OK**, you'll see a Program Info screen with details about the program. Select Play, then press **OK** to watch.

• Subscription On Demand

Want quality children's programming around the clock? Do you like horror, anime, or karaoke? Get unlimited access to unique programming for a low monthly fee with a Subscription On Demand package! Once you've called to subscribe, here's how to access your package:

- 1 Press **On Demand** on your remote control, then use the **ARROWS** to select Subscription. You'll see all Subscription On Demand package listings.
- 2 Select from the list and press **OK** to see programming options.
- 3 If you select a package that you're subscribed to, press **OK** to choose a program and begin watching. If you select a package that you're not subscribed to, you can browse titles and call customer support to access the package.

• Help On Demand

Want to learn more about a specific AT&T U-verse topic, your equipment, or special features?

- 1 Press **On Demand** on your remote control. Use **ARROWS** to select Help/Ayuda, highlight Help in English or Ayuda en Español, then press **OK**. A group of Help On Demand programming options will appear.

- 2 Select from the list using the **DOWN ARROW**, and press **OK** to see individual programs. You'll see a Program Info screen with details about the program.
- 3 Select Play, then press **OK** to watch.

NOTE: Channel 411 features an introduction to our extensive library of free help videos available On Demand in English and Spanish.

Pay Per View

Get a front row seat to one-time-only events! Nothing captures the excitement of live TV better than Pay Per View. Unlike U-verse Movies, Pay Per View events are shown at scheduled times. You can order Pay Per View up to 14 days in advance. Once it's ordered, an event can't be cancelled.

- 1 0 0** Front Row – highlights on upcoming Pay Per View events.
- 1 0 1** U-verse Pay Per View schedule
- 1 0 2 - 1 0 6** SD Pay Per View channels
- 1 1 0 2 - 1 1 0 3** HD Pay Per View channels

How to order Pay Per View

- 1 SD:** Press **1 0 2** or **1 0 3** or **1 0 4** or **1 0 5** or **1 0 6** on your remote control, then press **OK**.
HD: Press **1 1 0 2** or **1 1 0 3** on your remote control, then press **OK**.
NOTE: You can also press **GUIDE** and use the **UP/DOWN ARROWS** to select one of the Pay per View channels.
- 2** Use the **RIGHT ARROW** to see what's coming up in the schedule. Press **FF** to jump forward 24 hours at a time; press **REW** to go back in 24-hour increments.
- 3** Select the program you want to order, and press **OK**. A Program Info screen will appear with event time and pricing.

- 4** Press **OK** to rent (if parental locks are set, enter your PIN). Press **OK** again to confirm your order. Press **EXIT TO TV** to return to the channel you were watching.

DON'T FORGET! Tune to the event's channel at the scheduled start time. If you tune in late, you won't be able to rewind to view the portion you missed.

Pay Per View billing

Any Pay Per View orders you place are automatically added to your monthly AT&T U-verse bill. You'll find them in the "usage charges" section, listed by title with the date of the event and its price.

NOTE: Once a Pay Per View is ordered, it cannot be cancelled by remote control or Customer Care. You will be billed and the event will air on your TV set. Event schedules subject to change. Prices, programming, and offers subject to change.

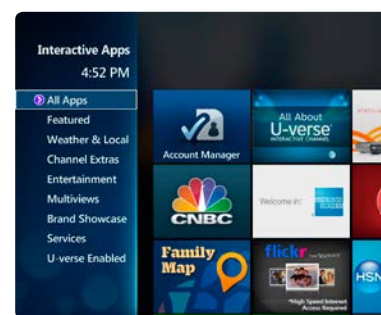

Set limits on who can rent or watch Pay Per View

Parental locking options let you set limits on who can watch what.

- 1** Use **ARROWS** to select Options and Parental Locking.
- 2** Select and enter a four digit PIN.
- 3** Select what you want to block including purchases, programming, and movies by rating.
- 4** Don't forget to save your changes.

Access your TV's interactive features

Two ways to Go Interactive

- 1** Press the **Go Interactive** button on your remote control and find the app that's right for you. Press **OK** to launch it and explore.
- 2** Press **MENU** on your remote control. Then use **ARROWS** to select Interactive and Interactive Apps. Press **OK**.

Add AT&T U-verse High Speed Internet and AT&T U-verse Voice digital home phone service to your AT&T U-verse TV service— they work together.

Caller ID notifications on TV¹

With AT&T U-verse Voice, you can see who's calling on your TV screen without changing the channel. Includes a Message Waiting indicator so you know if they've left a message. Tune to Channel 9900 to manage this, view Call History logs, or even initiate a call with your remote control.

¹Caller ID on TV requires subscription to U-verse TV and U-verse Voice.

TV user guide

View and download U-verse Voice call history

With U-verse Voice and U-verse TV, you can view and sort a list of your most recent call records, either online or on your TV screen. You can view incoming calls, missed calls, and all call logs. If you are a U-verse Voice subscriber, you can sort and download your call logs online.

View and download your U-verse call history online

You can view and download your U-verse call logs online.

- 1 Log in to myAT&T. Don't have a myAT&T login? **Register today.**
- 2 Hover over **Home Phone** then select **Check Voice Mail.**
- 3 Select the **Call Logs** tab.

From here, you can review and sort your calls. You can also download your call logs in XLS, CSV or PDF file formats:

- 1 Select the **Download Call Logs** link.
- 2 Follow the directions to download a detailed list of your calls.

Important Note

You cannot delete the Call History. Call logs display your last 100 calls or 60 days of calls, whichever comes first.

View your U-verse call history on your U-verse TV Screen

If you have U-verse TV service, you can use your U-verse TV remote to tune to your call history. You can even return calls with the press of a button on your remote.

- 1 Tune to **Channel 9900** using your U-verse TV remote, or use the interactive menu (press **Menu** on your U-verse remote control, then scroll to the Interactive section).
- 2 Select a U-verse Voice **phone number** on-screen.
- 3 Press **OK** to view a log of answered and missed calls. You can sort by name, date, or phone number.
- 4 Scroll using the **Browse** arrows. Highlight a **number** and press **OK** to return a call.
- 5 Highlight **Call**, then press **OK**. Your home phone will ring and the call will be placed.

Important Note

You cannot delete the Call History. Call logs display your last 100 calls or 60 days of calls, whichever comes first.

For more information on these and other great apps or features, including ones that work with your mobile device, go to Uverse.com/uverse/applications.

U-verse TV Apps

AT&T U-verse TV Apps

AT&T U-verse TV apps let you interact with your TV—and in most cases they're **included** with your AT&T U-verse TV subscription. We offer lots of seasonal apps, and we're continually adding new ones, so check back often to see what's currently available.

Simply press **GO INTERACTIVE** on your remote control to explore the extensive choices. They're easy to enjoy—there's no need to switch inputs or buy extra equipment. And the few subscription apps can be purchased easily via the Account Manager onscreen app on channel 9910.

U-verse TV Apps

Explore, Entertain, and Interact with U-verse Enabled Apps

With AT&T U-verse Enabled apps, entertainment isn't limited to one screen—you can watch, control, and interact with your TV using your tablet or smartphone. U-verse Enabled apps live on your mobile device and work with your connected AT&T U-verse TV receivers. There's no need to switch inputs or buy extra equipment.

An AT&T U-verse High Speed Internet account is required to connect a supported device to AT&T U-verse receivers.

To connect a device to a TV/receiver:

- Connect your device to your AT&T U-verse High Speed Internet home Wi-Fi
- Tune to channel 9301 and follow these steps:
 1. Read and accept the terms and conditions.
 2. Change the name of the receiver (choose preset, or create a custom name).
 3. Set the Connection Mode to Default (this will make it easier to manage guests and apps).

Repeat these steps with any TV you would like to use with U-verse Enabled apps.

How to find apps

Press **GO INTERACTIVE** on your remote control and select U-verse Enabled to see a full list of available apps, details about supported devices, and QR codes that you can scan with your device to download apps.

Go to Uverse.com/Uverse/apps.

AT&T U-verse High Speed Internet service required to connect supported devices to U-verse receivers.

Application Name	Description	
U-verse App Mobile and Tablet	Manage your DVR schedules and watch from a library of hit TV shows with added features. This U-verse application enhances your in-home viewing experience and can even turn your tablet or smartphone into a remote control!*	
	<i>*Requires qualifying device, U-family or higher TV plan and Wi-Fi or data connection. Content may vary by device, TV plan, and viewing location. Quality of picture varies by device and data connection. Data charges may apply.</i>	
U-verse Easy Remote	Turn your mobile device into one of the best remote controls around. With gestures, voice command, bigger buttons, and more, controlling U-verse has never been easier. This app is designed to assist and enhance the AT&T U-verse TV experience for those with low vision, hearing loss, or low dexterity.	
	<i>*AT&T U-verse High Speed Internet service and qualifying device required.</i>	
U-verse Pix & Flix	Share pictures on your TV screen from your connected iOS device or Facebook® account. Photos can be displayed randomly or in slide show or shuffle mode.	
	<i>*AT&T U-verse High Speed Internet service and qualifying device required.</i>	

*AT&T U-verse High Speed Internet account required.

Quick tips about your AT&T U-verse TV service

Best ways to locate channels quickly

- > Press any **ARROW** to access your onscreen Picture-in-Picture browse bar
- > Print a channel lineup guide for your area at att.com/channellineup

See what's hot to watch now

- > Press **On Demand** on your remote control to access U-verse Movies

Chat with other members online

- > Visit att.com/uversecommunity to post messages and talk with other AT&T U-verse members about TV features, programming, and more

Watch exclusive AT&T U-verse channels

- > **Front Row Channel 100**
Learn what's coming up on Pay Per View
- > **U-verse Movies 200/1200 HD**
Watch U-verse Movies trailers, interviews, and more
- > **Buzz Channel 300/1300 HD**
Go behind the scenes of your favorite TV shows
- > **U-verse Sports Channel 600/1600 HD**
Get previews and an in-depth look at all kinds of sports programming
- > **Help Channel 411**
Get AT&T U-verse TV service help
- > **U-verse Showcase Channel 800/1800 HD**
Sample AT&T U-verse TV high definition at no additional charge with rich and exotic footage of the world's most beautiful places
- > **ATTention Channel 400/1100 HD**
See news about our latest enhancements and more

Easy system setup

You can program your AT&T U-verse remote control and set your TV's screen resolution and Parental Controls using the System Setup Tool:

- > Press **MENU** on your remote and use **ARROWS** to select **Help**
- > Press **OK** to select **System Setup**

Manage your U-verse account

- > View and pay your bill, track your On Demand rental charges, get help and much more with myAT&T. Visit att.com/manage to download the app or go to att.com/myatt to log in now.

AT&T U-verse High Speed Internet user guide

- Get more with att.net
- Set up email on your home computer
- Access the entire national AT&T Wi-Fi Hot Spot network
- PC Health Check
- Assure reliable security for your Wi-Fi home network
- Connect more computers to your Wi-Fi

Features and screen appearance subject to change.

AT&T U-verse High Speed Internet

Now that your AT&T U-verse High Speed Internet service is installed, every networked computer in your home can share the same connection on a Wi-Fi home network. Need to set up Internet-connectable devices, such as a surveillance camera, game console, or other remote-access tool? If yes, then go to att.com/portforwarding for easy set-up instructions.

att.net

At home or on the go AT&T customers get more with att.net.

On att.net you get breaking and local news, a personalized view for weather, sports with your favorite teams, your stock portfolio, daily games, exclusive video entertainment, free software for desktop and apps for mobile!

Plus, you can watch videos including movies and TV shows online and manage your AT&T Services.

Stay Connected

- > Access att.net mail from any computer, tablet or mobile device. Simply log in at att.net using your AT&T primary member ID (email address) or sub-account member ID and password, and click the Mail button
- > Integrate and use all your email services from one convenient place with att.net webmail
- > Connect to Facebook friends and text message from your att.net inbox

Stay Informed

- > Get breaking News, Entertainment, Finance, Sports, and Lifestyle
- > Personalize with your favorite teams, financial portfolios, and local weather

Be Entertained

- > Watch TV Shows, Movies, Sports, and Music Videos online
- > Play games, get game memberships, discounts and a lot more
- > Go to att.net/Entertainment for celebrity news, photo galleries, and live webcasts

Get Software & Tools

- > Instant Messenger, att.net Toolbar for quick access to your Email, Weather, and News from any web page
- > att.net software settings restore tool sets browser and att.net mail settings. Useful if you have new service or a new computer
- > Homepage access to MyATT for Account Management

Stay safer online

Enhance your att.net Internet experience with these powerful add-ons:

AT&T Parental Controls – helps parents set time limits and control access to websites, email, chat and more, even when you're not watching

AT&T Pop-Up Catcher – help eliminate annoying pop-up advertisements you receive while surfing the Internet

AT&T Internet Security Suite, powered by McAfee – offers essential protection to shop, surf, and socialize online, as well as the peace of mind knowing you're protected from the latest threats

- **Exclusive McAfee Active Protection™ Technology** – Unlike the competition, McAfee Active Protection analyzes and blocks new and emerging threats in milliseconds, so you don't have to wait for regular updates to arrive. The result: virtually no gap in your protection
- **Vulnerability Scanner** – Find and seal up holes in Windows and your favorite browsers and applications
- **Real-time Antimalware** – Block threats like viruses, Trojans, and spyware in your files, email, and web downloads using instant risk assessments through the cloud
- **Adaptive Two-Way Firewall** – Let our advanced firewall with buffer overflow protection prevent software from exploiting your OS or stealing information, even in hotspots
- **Malicious Ad Protection** – Block cybercrime networks and their malicious ads and hidden iFrame code from loading and infecting your PC
- **McAfee SiteAdvisor®** – Helps you know whether a website is safe before you click to stop malware threats. Advanced "phishing" protection alerts you to websites that may try to steal your identity or gain access to your financial information
- **McAfee QuickClean™** – Safely removes junk files that slow down your PC
- **ENHANCED Digital Data Shredder** – Destroy sensitive data and erase cookies, memory, cache, browser history, and more
- **PC Tune-up** – Remove unused applications, cached browser files, and other junk to speed up your PC

AT&T Internet Security Suite – powered by McAfee available at no charge to customers who purchase AT&T U-Verse High Speed Internet or AT&T High Speed Internet services with downstream speeds of up to 3.0 Mbps or higher. For AT&T High Speed Internet customers who have a service with a maximum downstream speed of up to 1.5 Mbps or lower, the AT&T Internet Security Suite is an optional service for only \$5 per month. high-speed Internet user guide

Set up email on your home computer

Client-based email* (POP/SMTP) uses software like Outlook Express to download email directly to your computer.

Open the email software you plan to use and enter the following information in the account setup window:

- > Email address: MemberID@att.net
- > Incoming (POP): inbound.att.net
- > Outgoing (SMTP): outbound.att.net (requires authentication)
- > Incoming mail server: POP3
- > Incoming mail port number: 995 [make sure **Secure Connection (SSL)** is checked]
- > Outgoing mail port number: 465 [make sure **Secure Connection (SSL)** is checked]
- > Set password authentication for outgoing mail

NOTE: When updating the secure server settings, check the SSL checkbox first and then update the port number if necessary.

For more email support information, visit att.com/esupport/email.jsp

*There are numerous client-based email products supplied by non-AT&T third-party vendors. You may incur a fee if you require AT&T ConnectTech support for these products. Alternatively, AT&T also provides online self-help at att.com/versesupport for these applications. As always, we recommend that our customers use AT&T Mail access via the Web, which provides a broad set of functionality to manage and access email anywhere and at any time.

Access the entire national AT&T Wi-Fi Hot Spot network*

Check your email, surf, shop, and work on the go.

For information on how to connect to a home Wi-Fi network or an AT&T public Wi-Fi hotspot, go to att.com/wifisupport.

Go “Wi-Fi” instructions

Locate your Wi-Fi Network Name (SSID) and Wi-Fi Password (Wireless Network Key). This information is on your Starter Kit envelope. It can also be found on the side of your Wireless Gateway.

Now configure your Wi-Fi network:

1. Go to your computer’s “Wireless Network Settings” and refresh the network list.
2. Select your Wi-Fi Network Name (SSID) from the list. You may need to scroll through the list to find your SSID.
3. Enter the 10-digit Wi-Fi Password in the Password field to connect to your network.

*Access includes AT&T Wi-Fi Basic. Wi-Fi enabled device required. See www.attwifi.com for details and locations.

Visit att.com/versewelcome to learn more.

25

AT&T U-verse High Speed Internet

Assure reliable security for your Wi-Fi home network

The 10-digit number printed inside brackets on your residential/Wi-Fi Gateway is the Wi-Fi Password (Wireless Network Key) needed to connect your computers to the gateway. WPA (Wi-Fi Protected Access) is the underlying security technology for the Wi-Fi (802.11b/g) standard on the residential/Wi-Fi Gateway.

Mac® OS X users: You may need to enter the “\$” character on the Wireless Network Key (for example, \$0690735510). For directions on connecting Mac computers via USB cable, visit att.com/wifisupport.

Connect more computers to your Wi-Fi home network

You can connect more computers by Ethernet or wirelessly.

- > **Connect an Ethernet cable** from any available Ethernet port on the residential/Wi-Fi Gateway to your computer's Ethernet port
- > **Connect wirelessly** with a wireless enabled notebook or a computer with an 802.11b/g wireless network adapter installed

NOTE: You will need to use your 10-digit Wireless Network Key code. (See illustration above.)

If your PC does not have built-in wireless capability

Install and configure your wireless adapter according to the manufacturer's instructions. Enter the Wi-Fi Network Name (SSID) and Wi-Fi Password (Wireless Network Key). The Wi-Fi Network Name is “2WIRE” or “ATT” followed by several characters. See the illustration above for the Wireless Network Key location.

Mac and Macintosh are registered trademarks of Apple Inc.

AT&T U-verse Voice user guide

- Important information
- How to manage or change Voicemail Settings
- How to manage or change Voice Features
- Create sub-account voice mailboxes online

Important information:

AT&T U-verse Voice: AT&T U-verse Voice, including 911 dialing, will not function during a power outage without battery backup power. AT&T U-verse service is compatible with many monitored home alarms and medical monitoring systems.

See the complete AT&T U-verse Feature Guide at att.com/uvfeatures and more user guides at att.com/userguides.

To manage Phone Features online, log in to your online account at att.com/myatt and click on Home Phone, then "Manage Voice Features".

To manage Voicemail Features click on Home Phone, then "Check Voicemail", and "Voicemail Settings".

How to manage or change Voicemail Settings

Services	Description	Manage Online	How to Activate from Your Phone
Voicemail Setup	Instructs you on how to set up voicemail.	 Go to Voicemail Settings	<ul style="list-style-type: none"> •Dial *98 from your home phone •Follow the prompts to set up a mailbox <p>After creating your PIN, be sure to set up your authentication code. This will allow you to reset your PIN over the phone if you forget it.</p>
Change PIN for voicemail	Allows you to change your existing personal identification number (PIN) that is used to access your mailbox over the phone. Your PIN must be 6 to 10 digits in length and should not be your phone number or voice mailbox number. ¹Caller ID on TV requires subscription to U-verse TV and U-verse Voice.

AT&T U-verse Voice

Create sub-account voice mailboxes online

Create up to eight sub-account mailboxes, one for everyone in the family—each with a unique PIN and greeting and notification options.

- 1 Go to **att.com/myatt**, select **AT&T U-verse**, and enter your AT&T U-verse member ID (email address) and password to log in to myAT&T
- 2 On the **Account Overview** page, click on **Home Phone**
- 3 On the **Home Phone Service** page, click on **Manage Features**
- 4 Go to the **Voicemail Settings** tab and select **Voicemail Setup** and follow instructions to create voicemail sub-accounts

Services	Description	Manage Online	How to Activate from Your Phone
Call Waiting	Plays an audible tone indicating that an incoming call is waiting to be answered. You have the option to put the current call on hold and accept the other call. Or don't accept the call that's waiting and send the caller to your voicemail message box. If you have Caller ID capability, then the number of the incoming caller will be displayed.	 Go to Manage Voice Features	Press "Flash" to activate during a call
Cancel Call Waiting	Allows you to cancel Call Waiting for a specific call, for all calls, or during a current call.	 Go to Manage Voice Features	Per-Call Cancel: *70 + dial number # To deactivate for all calls: *370# To reactivate: *371# Call Waiting Mid-Call Cancel: Flash + *70# + Flash
Directory Assistance Blocking	Allows you to prevent all outgoing calls to Directory Assistance (such as 411 or xxx-555-1212 information).	 Go to Manage Voice Features	
Do Not Disturb	Gives you the option to turn off the ringer on your phone. This can be done either from the handset or online. A busy signal will be heard by the caller when Do Not Disturb is turned on.	 Go to Manage Voice Features	On: *78# Off: *79#
International Call Blocking	International Call Blocking allows you to prevent all outgoing calls to international numbers (when dialing starts with 011 or 010).	 Go to Manage Voice Features	
Locate Me	Never miss an incoming call again! Not only will your U-verse Voice number ring, but up to four other numbers will all ring at the same time. Enter numbers on your Locate Me list—online at att.com/myatt.	 Go to Manage Voice Features	On: Activated Online or dial *312 Off: *313#

AT&T U-verse quick resolution guide

- AT&T Troubleshoot & Resolve tool
- AT&T U-verse TV

quick resolution guide

Troubleshoot & Resolve Tool

Use our Troubleshoot & Resolve tool that is available through myAT&T, online or on the mobile app. You can access Troubleshoot & Resolve 24 hours a day, 7 days a week to quickly and easily help yourself, even when you are away from home, without having to call us.

myAT&T provides you a one-stop resource for viewing and paying bills, checking voice and Video On Demand usage, along with accessing support to get answers for common U-verse questions or to verify and change appointments. Upon accessing support, diagnostic testing is automatically performed on your account to alert you of service impacting outages or issues and guides you through a resolution.

Learn more at att.com/uversehelp

1. Download the myAT&T from app store  or scan this QR code  with your smartphone to get the myAT&T app.
2. If you created an AT&T Access ID and have linked your U-verse account to it, enter it to log in. Otherwise, log in using your Member ID; for example: john.doe@att.net. Select the "Save Password" option for easy access in the future.

3. Below the billing cycle information on the home page, click on the "Troubleshoot U-verse & Internet" link located at the top of the menu.

4. You will be redirected to the Troubleshoot & Resolve home page, which is personalized with topics that most fit your needs. If you don't find what you're looking for, simply type your question in the search bar at the bottom.

Get help...3 ways:

- > App available for download at iOS – iTunes, Android – Google Play, and Windows Mobile.
- > Online by visiting att.com/ufix on your desktop or mobile device.
- > On TV, press MENU on your remote control, scroll to the HELP section then select the Troubleshoot & Resolve menu option.

quick resolution guide

AT&T U-verse TV

Don't have picture or sound, but TV and receiver are both turned on?

- 1 Press **TV** on your remote control.
- 2 Press **TV/VIDEO** to see TV programming.

If you're still having trouble with your AT&T U-verse TV, Internet, or Voice services, try resetting your TV receiver or residential/wireless gateway by unplugging it from the power outlet in the wall. (See below for details for alternate reset if you have different equipment.)

NOTE: Unplugging the TV receiver or residential/Wi-Fi Gateway will interrupt any recordings in progress.

If the trouble is with only one TV

- 1 Turn off the receiver connected to that TV and unplug it.
- 2 Wait at least two minutes before plugging the receiver back in. Turn it on and retry what you want to do.

If the trouble is with more than one TV, or with Internet or Voice service:

- 1 Unplug the residential/Wi-Fi Gateway from the power source. (See below for alternate reset.)
- 2 Wait at least two minutes, then plug the residential/Wi-Fi Gateway back in and retry what you want to do. It may take up to 10 minutes for the gateway to reset.

Alternate reset: If your service is supported with a Home Network Hub and Power Supply Unit (PSU with battery backup), then you will need to press the **Reset** button on the left side of the PSU to reset AT&T U-verse service. The PSU may be located in the garage or a closet near an outside wall.

Want more help? AT&T U-verse Getting Started has answers all in one place online at att.com/startuverse. You can also chat live with an agent while getting started, or call 1.800.288.2020 and say "AT&T U-verse Technical Support."

Change your TV's screen resolution

- 1 Press **MENU** on the remote control, then use **ARROWS** to select Options and System Options, then press **OK**. Select TV Screen Resolution (HD/SD) and press **OK**.
- 2 Use **UP/DOWN ARROWS** to select **Standard Definition**, **Widescreen Standard Definition**, **720p High Definition**, or **1080i High Definition**, to match your TV's capability, then press **OK**.
- 3 Use **ARROWS** to select Continue, and press **OK** to access a Test Screen.
- 4 Select Start Test and press **OK** then follow the prompts to verify that you have the correct setting. Once successful, be sure to save your format. You should now see a blue light on your receiver.

Program your remote to control up to four devices

During installation, the **AT&T** button was set up to control your AT&T U-verse HD-ready receiver. You can also control a TV plus up to two other devices such as a DVD player, stereo receiver, or home theater in a box by programming the **TV**, **DVD**, and **AUX** mode buttons. Once the devices are programmed, press the corresponding mode key on the remote to control that device. To watch a video on how to program your remote control, visit att.com/uverseremote

NOTE: The instructions below don't require you to enter a manufacturer's device code because most codes are stored in the AT&T U-verse remote control's memory. If you're unable to add a device, or want to learn about advanced features like reassigning mode buttons, refer to the remote's manual provided at installation. For more info, visit att.com/userguides.

How to assign devices to TV-DVD-AUX mode buttons

- 1 Power on the device to be programmed.
 - 2 Point the remote control at the selected device.
 - 3 Press and hold the mode key that matches the device you want to program (**TV**, **DVD**, or **AUX**) along with the **ENTER** key. Hold both keys for one second, then release. The four mode keys on the remote control flash twice to indicate you are in search mode.
 - 4 Search by pressing the **SCAN/FF** key repeatedly until the device turns OFF (the selected mode key will flash once for each press of the **SCAN/FF** key). Pause briefly between each key press to allow your device enough time to respond.
 - 5 Press the **POWER** button on the remote control to turn the device back on.
- NOTE:** If the device does not turn off and you have searched all available codes, the selected mode key will flash eight times. If this happens, please start over.
- NOTE:** If the device does not turn on, you may have pressed the **SCAN/FF** key too many times. Press the **REW/SCAN** key to scan backwards and test the **POWER** button again.
- 6 Check **VOLUME** and **MUTE**. Do not test using **REW/SCAN**, **SCAN/FF**, **FWD**, or **EXIT**. If there is any problem with any of the keys, press the **SCAN/FF** button and search until you find a code that will operate all the functions properly.
 - 7 Press the **ENTER** key to save the programming. The appropriate mode key will give a long flash, indicating successful programming.

NOTE: If the programming is interrupted or inactive for more than 30 seconds, the mode keys will flash eight times. This indicates the remote has left the programming mode and returned to normal operation without saving any changes.

If you have an integrated or combination unit such as TV-DVD, TV-DVD-VCR, etc., each component of the unit may need to be programmed separately by using the mode keys. For instance, for a TV-DVD, search for the device code of TV and program into the TV mode key, then search for the device code of DVD and program into the DVD mode key.

Want more help? If you're unable to add a device or want to learn about controlling the volume on all devices using your remote control, visit att.com/userguides. You can also check the remote's user manual provided at installation, or watch Help On Demand on TV: Press **MENU**, select **Help**, then **Help On Demand** to see all program titles.

quick resolution guide

Change your TV's input selection to match its video source

If you're unable to see TV programs on your screen, first try pressing the **TV/VIDEO** button on your remote control to change from Video 1 to Video 2 or Video 3. These separate video inputs (Video 1, Video 2, and Video 3) must match the incoming video source—the receiver, DVD player, or other device connected to the TV. If this doesn't solve the problem, depending on how your devices are connected, it may be that the TV's input selection does not correspond to the input of the AT&T U-verse TV receiver. **See three examples of how to connect the AT&T U-verse HD-ready receiver to your HDTV set on p. 37.**

Check device connections for your TV

TV screen menus and port configurations vary. Most devices have ports that require one or more of the cables shown at right. The manuals for your devices will have specific directions.

To connect your AT&T U-verse HD-ready receiver to your HDTV set, the connection is generally HDMI to HDMI (the highest quality video/audio connection). You can also use color-coded component RCA cables (some HDTV sets do not have an HDMI port) that deliver audio/video signals from the receiver and plug into matching audio/video RCA inputs on the back of your HDTV set.

If you've connected your TV input using Composite (yellow connector), S-Video, or Coaxial, you won't get an HD picture. HD is supported only via HDMI or Component (red/green/blue). The same holds true for Dolby® Digital 5.1 surround sound, which is available only via HDMI or TOS Link (optical). The Baseband (red and white connectors) delivers sound only in stereo.

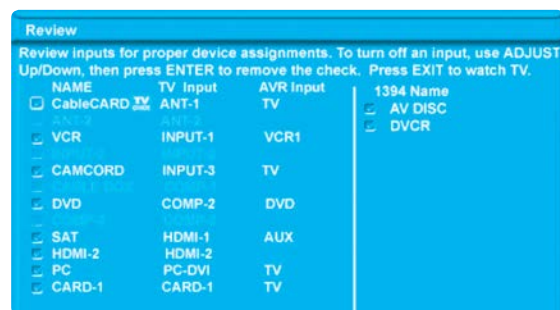

Check to see if the TV recognizes your video inputs correctly

Many newer TVs have an auto-detection system that will automatically detect equipment connected to the various ports on the TV. However, some TVs have to be configured manually.

To change the video input selection manually, press **TV/VIDEO** on your remote control to locate the video input menu for your specific TV.

The video input menu screen below shows checkboxes next to devices the TV is detecting. This menu must match the inputs on the back of the TV where video components are connected in order to correspond with Video 1, Video 2, or Video 3 on your remote control. Follow the screen prompts to check/uncheck boxes for your devices.

NOTE: Refer to your TV manufacturer's guide to resolve issues specifically related to your TV.

quick resolution guide

Choose one of three easy ways to connect your AT&T U-verse receiver to your TV

AT&T U-verse receiver output connector

1 HDMI

Some HDTVs have a High-Definition Multimedia Interface (HDMI) connector that provides the digital and audio connection. This is the easiest connection if your TV has an HDMI input port.

NOTE: If your HDTV has an input port marked DVI (Digital Visual Interface), you will need an HDMI-to-DVI adapter and separate component RCA audio connectors.

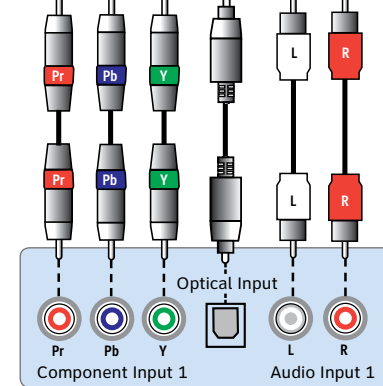

Input connector on rear of TV

2 Color-coded component connectors

If your TV doesn't have an HDMI or DVI input port, you can use color-coded component video cables (Pr, Pb, and Y) for HD video signals. For audio, plug red and white RCA connectors into the left/right audio input and output ports.

AT&T U-verse receiver output connectors

Input connectors on rear of TV

NOTE: Your hardware may be slightly different than pictured.

3 S-Video

If your TV has an S-Video port, you can connect your receiver to your TV using an S-Video cable. For audio, you can use RCA cables or plug a single optical cable into the optical ports.
