

Setting up your AT&T Internet Air[®]

Follow these simple setup options

[Connecting with AT&T Smart Home ManagerSM](#)

[Troubleshooting and more info](#)

Before you get started

Here's what's in the box

1

AT&T All-Fi Hub

2

Power supply

Scan to download our app to get started

[Make sure you are registered](#)

Setting up your AT&T Internet Air

Connect using the free AT&T Smart Home ManagerSM app

1. Download

Download the Smart Home Manager app from your app store or scan the QR code with your smartphone. You can also go to att.com/shm from your smartphone to download.

For quick download, open your smartphone camera and point it at the QR code on the box. After a few seconds, you'll get a notification with a link to open in your browser.

2. Sign in

Open the Smart Home Manager app to begin. Either tap **Sign in** if you've registered your Internet Air service ([see page 2](#)) or **Set up equipment** and scan the QR code on the base of your All-Fi Hub when prompted.

3. Set up & activate

On the **Let's begin your AT&T Internet Air setup** screen, select **Get started**, then follow the guided prompts to set up your All-Fi Hub. After that, you're ready to go.

Note: Smart Home Manager is available to AT&T internet service customers with a compatible AT&T gateway or hub.

Setting up your AT&T Internet Air

Optimize your connection using the AT&T Smart Home ManagerSM app

1. Place your All-Fi Hub

To find the direction of your closest signal tower, tap **Help me find this direction**.

2. Test signal quality

Plug in your All-Fi Hub and follow the prompts in the Smart Home Manager app to test signal strength at your chosen location. The All-Fi Hub display will help guide placement to make sure your signal is strong.

For more details, check the [Troubleshooting](#) section.

3. Connect your devices

Once your service is up and running, connect your devices to the Wi-Fi using the network name and password displayed in the Smart Home Manager app.

Setting up your AT&T Internet Air

Test your signal

Signal status will appear on the All-Fi Hub display and in the AT&T Smart Home ManagerSM app.

All green lights:
Signal strength
is great.

Your signal strength is strong enough to activate your hub and start using your new service.

Three green lights:
Signal strength
is good.

Your signal strength is strong enough to activate your hub and start using your new service.

Two green lights:
Let's place your
hub again.

Signal is not strong enough to activate your hub. Go back to step 1 on page 4 and use the Smart Home Manager app to find a better location for it.

One green light:
Let's place your
hub again.

Signal is not strong enough to activate your hub. Go back to step 1 on page 4 and use the Smart Home Manager app to find a better location for it.

Need help? No problem.
