AT&T Protect Advantage® Multi-Device

How it works

- One primary eligible device must be connected to a monthly AT&T postpaid wireless plan (connected device).
- The second, third, and fourth eligible devices can be connected to a monthly AT&T postpaid plan (including smartphones and connected tablets on the same account). They may also be non-connected Wi-Fi-only tablets that are not connected to a monthly AT&T rate plan.
- Your primary connected device is automatically registered at the time of enrollment, but your second, third, and fourth devices can be registered later when you file a claim.
- You cannot have more than four eligible devices registered at any time.
- 30-day waiting period after enrollment for non-connected devices is required before coverage applies.
- Once a claim is approved your mobile number (connected device) or device (non-connected device) is registered and will remain registered as one of your four covered mobile number/devices for a period of 12 months.
- After 12 months (from the date of the approved claim), your covered mobile number (connected) or device (non-connected) registration can be changed.
- Each approved claim restarts the 12-month registration period for that mobile number/device.
- Although unlimited, each approved repair or replacement requires the repaired or replaced device to be registered (registration can be changed 12 months from the date of the approved claim).
