CHAPTER 1

Introduction

Thank you for choosing AT&T Internet Security Suite—powered by McAfee. This document will guide you on how to access, download and install your complimentary McAfee security tools included with your High Speed Internet service.

Installing AT&T Internet Security Suite—powered by McAfee includes five steps:

- Start Download Manager
- Remove Incompatible Products
- Select Access and Optimization Options
- Install Components
- Finish Installation

1. Start Download Manager

Before you start to install your software, review the minimum system requirements, ensure that your Internet Explorer security level is set to medium and that your pop up blocker is disabled.

1 In Internet Explorer, go to <u>http://att.software.yahoo.com</u>

Login to your account.

2 Next you're presented with the Software Center page. Click on the **Download** button in the AT&T Internet Security Suite powered by McAfee tile.

3 This brings you to the Internet Security Suite page.

4 Click Install in English.

5 Read and agree to the McAfee End User License Agreement to proceed to your download.

6 Review the instructions on the Download Manager page, write down your serial number, then click **Download**.

7 Wait while your software downloads.

8 Click **Run** on the Security Warning dialog.

9 Click Run on the Security Warning dialog.

8 Wait while we install each security component on your PC.

5. Finish Installation

The AT&T Internet Security Suite, powered by McAfee, should now be installed and working to protect your computer against viruses, spyware, and other potentially unwanted programs.

1 Click Finish to close the installation wizard. You might be asked to restart your computer.

2 To access SecurityCenter, double-click the McAfee icon at the far right of your task bar.

SecurityCenter monitors your computer's security status, knows instantly whether your computer's virus, spyware, email, and firewall protection services are up-to-date, and acts on potential security vulnerabilities.
