SAFETY AND COMPLIANCE

WARNING: TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. THE UNIT MUST NOT BE EXPOSED TO DRIPPING OR SPLASHING. DO NOT PLACE OBJECTS FILLED WITH LIQUIDS, SUCH AS VASES, ON THE UNIT.

CAUTION: TO ENSURE REGULATORY COMPLIANCE, USE ONLY THE PROVED POWER AND INTERFACE CABLES.

CAUTION: DO NOT OPEN THE UNIT. DO NOT PERFORM ANY SERVICING OTHER THAN THAT CONTAINED IN THE INSTALLATION AND TROUBLESHOOTING INSTRUCTIONS. REFER ALL SERVICING TO QUALIFIED SERVICE PERSONNEL.

This device must be installed and used in strict accordance with the manufacturer’s instructions as described in the user documentation that comes with the product. Modifications not approved by Motorola may void the user’s authority to operate the device.

Postpone Wireless Access Point installation until there is no risk of thunderstorm or lightning activity in the area.

Avoid using this product during an electrical storm. There may be a risk of electric shock if this product is not designed in strict accordance with the manufacturer’s instructions.

Avoid using this product near water. Even a small amount of water can enter the device and cause damage.

Do not overload outlets or extension cords, as this can result in a risk of fire or electric shock.

Load balancing onto the same circuit may cause the circuit to overload and be fatal. Overloaded AC outlets, extension cords, frayed power cords, damaged or cracked wire insulation, and broken plugs are dangerous. They may result in a shock or fire hazard.

Route power supply cords so that they are not likely to be walked on or pinched by items placed upon them. Pay particular attention to cords where they are attached to plugs and convenience receptacles, and examine the point where they exit from the product.

Place this equipment in a location that is close enough to an electrical outlet to accommodate the length of the power cord.

Place this equipment on a stable surface.

When using this device, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

- Read all of the instructions before you operate this equipment.
- Give particular attention to all safety precautions.
- Read the instructions for future reference.
- Comply with all warnings and caution statements in the instructions.
- Observe all warnings and caution symbols that are affixed to this equipment.
- Comply with all instructions that accompany this equipment.
- Avoid using this product during an electrical storm. There may be a risk of electric shock.
- Avoid using this product near water. Even a small amount of water can enter the device and cause damage.
- Do not overload outlets or extension cords, as this can result in a risk of fire or electric shock.

INSTALLATION
The VAP2500 enables you to transmit multiple standard- and high-definition video streams throughout your home wirelessly. You can enjoy a full range of video services and applications without having to run wires, lay cables, or drill holes.
The U-verse Wireless Access Point operates only with authorized U-verse Wireless Receiver(s).

FRONT PANEL
- **Power**
  - Green = Power is on
  - Off = Power is disconnected from its power source
- **Paired**
  - Blinking orange = WPS button has been pushed and pairing is in progress
  - Solid Green = At least one wireless receiver has been paired
  - Flashing Green = At least one wireless receiver is paired and wireless activity is detected
  - Off = No wireless association
- **Link**
  - Solid Green = Ethernet link is detected
  - Blinking Green = Ethernet link is detected and wired activity is present
  - Off = Ethernet link is not detected
- **WPS**
  - WPS button

REAR PANEL
- **Reset Button**
  - Resets the VAP2500 to its default settings
- **Ethernet Port**
  - Connects to the Ethernet-equipped U-verse Residential Gateway
- **Power Connector**

INSTALLING YOUR WIRELESS ACCESS POINT AND WIRELESS RECEIVER
Follow the instructions below to install your Wireless Access Point and Wireless Receiver.

1. Before you connect the Access Point, ensure the Gateway is powered on.
   - Connect one VAP2500 unit to your Residential Gateway using the provided yellow Ethernet cable.

2. Connect the power adapter to the Access Point and plug it into a wall outlet. You will see the unit's Power and Ethernet LEDs go on.

3. Connect the cord from the DC Power Adapter to the POWER connector on the rear of the Receiver, and plug the adapter into an AC wall outlet, and then connect the Receiver to your TV. (For more details on connecting your Receiver to your TV, refer to your TV user manual.)

4. When power is applied to the Receiver; the Power button lights green. Ensure that your TV is powered on.

5. Once the Receiver powers on, wait until a prompt appears on your TV screen asking if you wish to connect.

6. On the front panel of the Receiver, press and release the OK button. Go to the Access Point and press and hold the WPS button for two seconds then release to activate the WPS process. The WPS LED will blink orange.

7. An icon appears on the TV screen, indicating that the connection sequence is in process. When three horizontal dots appear, the connection has been successful. On the front panel of the Receiver, two or more LEDs on the Signal Strength indicator will light green. You have now established a secure wireless connection between the Access Point and the Receiver and can begin enjoying U-verse service.

INSTALLING ADDITIONAL WIRELESS RECEIVERS
To connect additional Wireless Receivers repeat steps 3-7 above.
