Takes?
5 minutes

Note:
To set up email using web browser on your computer, visit www.cingular.com/blackberrystart.

1. The Email Setup portion of the Setup Wizard will ask you to choose to either create or add an email address or to use a work account with a BlackBerry® Enterprise Server. Unless you have been given an Enterprise Activation Password by your system administrator IT department you should choose **I want to create or add an email address**.

2. You must either login to your BlackBerry® Internet Service account (this account will manage the email supported accounts you setup on your BlackBerry Pearl, you may have up to 10) or create a new one. If you are a new user supported accounts or this is a new BlackBerry Pearl you must choose **Create New Account**.

3. To continue you must accept the BlackBerry Internet Service terms and conditions.

Choose **Yes** by scrolling to the bottom of the screen.

4. Create a User ID and password of your choice for your BlackBerry Internet Service Account.

The User ID and Password must be at least 6 characters and is case sensitive.

Store this login information in a safe place so that you can add additional email accounts to your BlackBerry Pearl or change your settings in the future.

5. Connect the smaller end of the USB cable to your BlackBerry Pearl and connect the larger end of the USB cable to the USB port on your computer.

Note: You may need to configure your connection settings. Click Options then connection settings from the menu of your BlackBerry® Desktop Manager. Select USB.

6. Click the **Synchronize** icon in the BlackBerry® Desktop Manager and setup your configuration options.

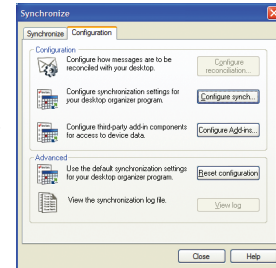

Be sure to click on the Configuration tab to set your configuration settings.

Setup instructions

7. When you have finished setting up the configuration settings click **Synchronize Now**

Note: To learn more about synchronizing data, backing up or restoring data, adding applications, or other functions, click **Help** in the BlackBerry Desktop Software.

I cannot connect to a wireless network.

Try performing one of the following actions:

- a) Verify that your SIM card is inserted correctly.
- b) Verify that you have turned on the connection to the wireless network.

I cannot associate my BlackBerry Pearl with an email address.

Try performing the following actions:

- a) On the email setup web site, verify that you have typed all the email address information correctly. Use the multi-tap input method to type your password.
- b) Log in to the email setup web site and add a supported email address to your BlackBerry® Pearl™ using a browser on your computer. To log in to the email setup web site, type the email setup web site address provided by your wireless service provider in a browser on your computer. If you have already created a login ID and password, use this information to log in. If you have not created a login user ID and password, click **Create New Account** and complete the instructions on the screen.
- c) Verify that the email address is associated with a supported email account (for example, a POP3 or IMAP account). If you cannot add the email address using a browser on your BlackBerry Pearl or your computer, contact your wireless service provider for more information on supported email accounts.

I do not know which email setup option to choose in the Setup Wizard.

1. Select the **I want to add or create an email address** option if the other options do not apply to you. This option is the most common option for individual users. If you select this option, an email setup web site opens. On the web site, you can create a new email address for your BlackBerry® Pearl™ or associate your BlackBerry Pearl with an existing supported email address.
2. Select the **I want to use a work email account with a BlackBerry Enterprise Server** option if a BlackBerry® Enterprise Server system administrator has provided you with a password that you can use to activate your BlackBerry Pearl over the wireless network. If you select this option, an Enterprise Activation screen appears. On this screen, you can type your work email address and the password provided by your system administrator to activate your BlackBerry Pearl.
3. Select **Skip email setup** if any of the following situations apply:
 - a) A representative from the store where you purchased your BlackBerry Pearl has already helped you to set up your email address.
 - b) You have already visited the email setup web site and have set up an email address using a browser on your computer.
 - c) You have an existing email account and have access to a BlackBerry Enterprise Server, but your BlackBerry Enterprise Server system administrator has not provided you with a password that you can use to activate your BlackBerry Pearl over the wireless network. Contact your system administrator for more information about setting up email for your BlackBerry Pearl.
 - d) You have a Microsoft® Outlook Workgroup (Workgroup Installation) email account on a Microsoft Exchange Server version 5.5. or later and you want to use the BlackBerry® Desktop Redirector to forward email messages to your BlackBerry Pearl.

I cannot send messages.

Try performing the following actions:

- Verify that your BlackBerry Pearl is connected to the wireless network. If you are not in a wireless coverage area, your BlackBerry Pearl should send the messages when you return to a wireless coverage area.
- If the menu item for sending a message does not appear, verify that you have added an email address or PIN for your contact.
- If you created an email address or added an existing email address to your BlackBerry Pearl using the email setup web site, verify that you have received an activation message on your BlackBerry Pearl from the BlackBerry Internet Service. If you have not received an activation message (the message might take a short period of time to arrive), use the email setup web site to send a service book to your BlackBerry Pearl.
- If you have not received a registration message from the wireless network, register your BlackBerry Pearl. In the device options, click **Advanced Options**. Click **Host Routing Table**. Press the **Menu** key.  Click **Register Now**.
- Resend the message. Open the message. Press the **Menu** key. Click **Resend**.

I am not receiving messages .

Try performing the following actions:

1. Verify that your BlackBerry Pearl is connected to the wireless network. If you are not in a wireless coverage area, you should receive messages when you return to a wireless coverage area.
2. If you created an email address or added an existing email address to your BlackBerry Pearl using the email setup web site, verify that you have received an activation message on your BlackBerry Pearl from the BlackBerry Internet Service. If you have not received an activation message (the message might take a short period of time to arrive), use the email setup web site to send a service book to your BlackBerry Pearl.
3. If you have not received a registration message from the wireless network, register your BlackBerry Pearl. In the device options, click **Advanced Options**. Click **Host Routing Table**. Press the **Menu** key.  Click **Register Now**.
4. If you use email message filters, verify that your email message filter options are set correctly.

I cannot make or receive calls.

Try performing the following actions:

1. Verify that your BlackBerry Pearl is connected to the wireless network.
2. If you cannot make calls and fixed dialing is turned on, verify that the phone number for your contact appears in your fixed dialing list or turn off fixed dialing.
3. If you have traveled to another country and you have not changed your smart-dialing options, dial the full phone number, including the country code and area code, for your contact.
4. If you are not receiving calls, verify that call blocking and call forwarding are turned off.

Connect to Wireless Network

To connect to the wireless network successfully, the BlackBerry® Pearl™ must be powered on, your wireless service must be active, and you must be in a coverage area.

EDGE	You can use the phone, send and receive email, PIN, SMS text, and MMS messages, and use the browser with a high speed data connection.
GPRS	You can use the phone, send and receive email, PIN, SMS text, and MMS messages, and use the browser.
edge gprs GSM	You can use the phone and send and receive SMS text messages.
SOS	You can only make emergency calls.
OFF	Your device radio is turned off.
X	You are not in a wireless coverage area.

- Verify your BlackBerry Pearl is turned on.
- Your BlackBerry Pearl should automatically connect to the wireless network in your area. If you see “Off” in the top right hand corner of your screen, the wireless functionality is turned off and you need to turn it on.

To turn the wireless network on or off from the Home screen use the trackball to scroll to the Turn **WIRELESS ON/TURN WIRELESS OFF** icon (radio tower) and click the trackball to select it.

When your BlackBerry Pearl is not connected to the wireless network you can continue to use features that don't require a connection such as typing and saving draft email messages, managing tasks, or using the calculator. You will see the error message 'Radio is Off' if you try to use any of the wireless features.
